Chapter 1

Overview of the Handbook

NATIONAL COMMISSION FOR ALLIED AND HEALTHCARE PROFESSIONS
राष्ट्रीय सहबद्ध और स्वास्थ्य देख-रेख वृत्ति आयोग
स्वास्थ्यम् सर्वार्थसाधनम्
NCAHP
Since-2021

1.0 Overview of the Handbook

The Parliament of India passed the National Commission for Allied and Healthcare Professions bill on March 28, 2021. Accordingly, an interim commission was established for the National Commission for Allied and Healthcare Professions Act in accordance with the rules issued by the central government on May 27, 2021. This commission's commission's primary goals are to evaluate institutions, maintain a Central Register and State Register, regulate and uphold standards of education and services by allied and healthcare professionals, and create a system to enhance access, research, development, and adoption of the most recent scientific advancements. In addition, the commission started the process of preparing the curriculum for Occupational Therapy (OT) education across the country. It has been noted that uniformity in the education and training of Occupational Therapy professionals nationwide must be guaranteed, as previous reports have indicated that there are differences in the educational and training methods of Occupational Therapy courses offered by institutions nationwide

In order to review and update the guidelines for Occupational Therapy education and career pathways with a new structured curriculum based on skills and competencies, the National Commission for Allied & Healthcare Professions under the Ministry of Health & Family Welfare, Government of India, established an expert committee. Thus, this handbook has been developed to familiarize & delineate uniformity in the Occupational Therapy education and formulate guidelines for imparting education and training in Occupational Therapy by the universities, colleges, healthcare providers as well as educators offering Occupational Therapy education. This handbook aims to reduce variations in education by presenting a standardized curriculum, career pathways, nomenclature, and other key elements for the Occupational Therapy profession. The shift from a purely didactic approach is intended to produce better-skilled professionals and enhance the overall quality of of patient care.

1.1 Healthcare Professionals: Who Are They?

According to the National Commission for Allied and Healthcare Professions Act, a "healthcare professional" is defined as a scientist, therapist or other professionals who studies, advises, researches, supervises or provides preventive, curative, rehabilitative, therapeutic or promotional health services and who has obtained any qualification of degree under this Act, the duration of which shall not be less than three thousand six hundred hours spread over a period of three years to six years divided into specific semesters". Primary care refers to the work of health professionals who act as a first point of consultation for all patients within the healthcare system. Such a professional would usually be a primary care physician, such as a general practitioner or family physician, a licensed independent practitioner such as an Occupational Therapist, or a non-physician primary care provider (mid-level provider) such as a physician assistant or nurse practitioner. Depending on the locality, health system organization, and sometimes at the patient's discretion, they may see another health care professional first, such as a pharmacist, a nurse (such as in the United Kingdom) a clinical officer (such as in parts of Africa), or an Ayurvedic or other traditional medicine professional (such as in parts of Asia). Depending on the nature of the health condition, patients may then be referred for secondary or tertiary care. Since the past few years, many professional groups have been interacting and seeking guidance on all those who would qualify under the purview of "healthcare professionals". In the healthcare system, statutory bodies exist for clinicians, nurses, pharmacists and dental practitioners; but a regulatory structure for around 50 professions was absent in India. Currently, the Parliament of India has enacted the National commission for allied and healthcare professions act 2021 to put these 56 professions under the ambit of the allied and healthcare system. The act defines Occupational Therapists as "healthcare professionals due to their nature of duties and responsibilities and numbers of hours of training at entry level qualification that is Bachelor of Occupational therapy, which is much more than 6100 hours spread over Five years including one year of rotatory clinical internship.

1.2 The Scope and need for Occupational Therapy professionals in the Indian healthcare system

Over the last few decades, technological progress has led to significant improvements in the quality of medical care. However, these advancements have also brought about new and complex challenges within the healthcare system. It is now a well-known fact that effective healthcare delivery relies on a multidisciplinary approach, requiring the coordinated contributions of both clinical and non-clinical professionals, extending well beyond the conventional roles of doctors and nurses. Professionals who can competently handle sophisticated machinery and advanced protocols are now in high demand. Diagnosis is now so dependent on technology, that allied and healthcare professionals (AHPs) are vital to successful treatment delivery.

Indian healthcare system is witnessing a growing demand for functional restoration and holistic care, driven by rising rates of chronic illnesses, disabilities, psychosocial issues, and an aging population. In this context, Occupational Therapy has emerged as a crucial discipline that supports individuals in regaining functional independence and improving their quality of life.

The quality of education, training, and community health orientation received by all types of health workers, as well as their ability to work as a cohesive team, are critical factors in the efficient provision of healthcare services operating independently and in a variety of professional teams.

The Indian government wants universal health coverage, but the largest obstacle to achieving its goals may be a shortage of qualified human resources. In India, the advantages of having allied and other medical professionals in the healthcare system are still not fully understood. The Indian healthcare system still relies heavily on the doctor-centric approach, despite the overwhelming evidence that AHPs can improve access to healthcare services and significantly lower healthcare costs. Occupational Therapy professionals play a vital role in the healthcare system, addressing the functional needs of individuals affected by physical, neurological, psychosocial, or developmental conditions. Occupational Therapy professionals contribute to holistic, patient-centered care by enabling individuals to regain independence and improve their quality of life through therapeutic interventions. Occupational Therapy plays an important role in preventive, restorative and rehabilitative care of persons with activity limitations and participation restrictions.

Expanding the integration of Occupational Therapy services into primary, secondary, and tertiary care alongside greater awareness, policy support, and educational standardization is essential to strengthen India's capacity to deliver inclusive, rehabilitative, and community-based healthcare.

Occupational Therapy professionals also play a significant role in caring for patients who struggle mentally and emotionally in the current challenging environment and require mental health support; and help them return to well-being. Children with communication difficulties, the elderly, cancer patients, patients with long-term conditions such as diabetes people with vision problems, and amputees; the list of people and potential patients who benefit from Occupational Therapy is indefinite.

Occupational Therapy plays an essential role in the functional restoration of individuals across a broad spectrum of health conditions. In neurological cases, interventions are designed to enhance motor and functional skills, cognitive-perceptual functioning, and independence in activities of daily living. Within orthopaedic settings, therapists facilitate the recovery of mobility, strength, and the functional use of affected limbs. In paediatric population, Occupational Therapists facilitate development of essential life skills by addressing delays or impairments in gross and fine motor coordination, achieving milestones in all aspects of a child's development, cognitive functioning, self-care, and social participation. In cases involving sensory processing challenges, Occupational Therapists implement structured, evidence-based sensory integration strategies to help children interpret and respond appropriately to sensory input, thereby enhancing attention, emotional regulation, and adaptive behaviors. Interventions are tailored to the individual needs of the child and delivered within a family-centered framework, with the goal of promoting functional independence and improving overall quality of life. In the domain of mental health, Occupational Therapy supports individuals by fostering emotional regulation, developing social and communication skills, enhancing assertiveness, and encouraging meaningful engagement in daily routines. Geriatric populations benefit substantially from Occupational Therapy through strategies aimed at fall prevention, environmental modifications, and support for age-related cognitive and physical changes. In the management of complex medical conditions, therapists address fatigue, reduce functional limitations, and assist with the reintegration of individuals into daily and occupational roles, thereby enhancing quality of life during and post-treatment. Furthermore, Occupational Therapy contributes to cognitive rehabilitation, psychosocial support, palliative care, and

wellness interventions, while also promoting adherence to treatment regimens and facilitating community reintegration. Across these domains, Occupational Therapy fosters independence, promotes well-being, and improves overall health outcomes. Therefore, the scope of Occupational Therapy practice is extensive, covering a wide array of professional domains, as outlined below:

- Across the age span of human development from neonate to old age
- with patients having complex and challenging problems resulting from systemic illnesses such as in the case of diabetes, cardiac abnormalities/conditions, and elderly care to name a few.
- Towards health promotion and disease prevention, as well as assessment, diagnosis management/intervention. through Models of practice and Frame of Reference and evaluation of interventions and protocols for treatment.
- In a broad range of settings from a patient's home to community (return to work, community reintegration through environmental modifications).
- primary care centers, to tertiary care settings.

1.3 Learning objectives and goals for students of Occupational therapy

The handbook has been designed with a focus on performance-based outcomes pertaining to different levels. The learning goals and objectives of the undergraduate and post-graduate Occupational Therapy education program will be based on the performance expectations. They will be articulated as learning goals (why we teach this) and learning objectives (what the students will learn). Using the framework, students will learn to integrate their knowledge, skills and abilities in a hands-on manner in a professional healthcare setting. These learning goals are divided into nine key areas:

1. Develop competencies for Independent Occupational Therapy practice.
2. Communication with stakeholders
3. Member of a multidisciplinary health team
4. Ethics and accountability at all levels (clinical, professional, personal and social)
5. Commitment to professional excellence
6. Leadership and mentorship
7. Social accountability and responsibility
8. Scientific attitude and Research scholar
9. Lifelong learning and transfer of knowledge

1.3.1 Independent Clinical Practice

Each student will plan and carry out the management, investigation, and prevention strategies using the best available data and a patient/family-centered approach. They will also provide the necessary follow-up services. The goals of the program should allow the students to:

- Utilize the fundamentals of science and evidence-based practice.
- Use relevant standardized and non-standardized tools when necessary.
- Identify the indications for Occupational Therapy intervention and perform them appropriately.
- Deliver patient care in a variety of settings, effectively and economically, while prioritizing the needs of each individual patient.
- Recognize how biological, psychological, spiritual, and economic factors affect patients' well-being and respond appropriately.
- Include techniques for specific emergency care, disease prevention, and health promotion of the patients with a knowledge of the healthcare concerns related to various socioeconomic backgrounds and social norms.

1.3.2 Communication with stake holders

The student will acquire the skills necessary to effectively and appropriately communicate with patients, clients, caregivers, other medical professionals, and other community members. One essential component of providing health care services is communication. The goals of the program should allow the students to:

- Clearly explain the diagnosis to the patient and determine suitable treatment plans in a sensitive way that is in the best interests of the patient and society.
- Clearly discuss the diagnosis with the patient, and decide appropriate as possible and respond appropriately to the information.
- Describe the proposed healthcare service's nature, goal, potential advantages and disadvantages, limitations, and, if available, reasonable alternatives.
- Appropriately communicate with and provide pertinent information to other stakeholders, including members of the healthcare team.

- Use communication effectively and flexibly in a manner that is appropriate for the reader or listener; Investigate and take into consideration the patient's ideas, beliefs, and expectations during interactions with them, along with varying factors such as age ethnicity, culture, and socioeconomic background.
- Develop efficient techniques for all forms of written and verbal communication including accurate and timely record keeping.
- Evaluate their own communication abilities, cultivate self-awareness, and be capable of enhancing their interpersonal relationships. with them, along with varying factors such as age, ethnicity, culture and socioeconomic background
- Have the ability to advocate for health promotion and offer lifestyle modification aadvice.

1.3.3 Participation in a multidisciplinary healthcare team

For the student, good team communication is very important, including being open and honest about goals, choices, uncertainty, and errors. In order to achieve coordinated, high-quality care, at least two healthcare professionals must collaborate to accomplish common goals both within and across settings when providing health services to individuals families, and/or their communities. This is known as team-based health care. The program's goals will be to enable the students to:

- Acknowledge, express, comprehend, and encourage team goals that represent the priorities of the patient and their family.
- Establish clear expectations for each team member's roles, responsibilities, and accountability. This maximizes the team's efficiency and enables them to use the division of labor effectively, achieving more than the sum of their individual efforts.
- Establish mutual trust among team members to foster strong reciprocity norms and increase opportunities for collective success.
- Create a culture of general and specific understanding by communicating well so that the team prioritizes and continuously improves its channels of communication.
- Acknowledge quantifiable procedures and results so that the team and the individual can decide on and execute accurate and prompt feedback on goals and team performance. Performance can then be monitored and enhanced both instantly and gradually using these.

1.3.4 Ethics and accountability (personal, professional, social, and clinical)

In order to apply these fundamental ideas to their work as Occupational Therapists, students will gain an understanding of clinical ethics and the law. Program goals should allow students to:

- Explain and apply the basic concepts of clinical ethics to actual cases and situations.
- Acknowledge the importance of providing patients with healthcare resources in a fair, equitable, and non-discriminatory manner.
- Show that you understand and apply fundamental legal principles to your occupational therapy practice.
- When establishing, preserving, and ending patient-provider relationships, exercise professional accountability and show respect for each patient's unique rights to autonomy, privacy, and confidentiality

NATIONAL COMMISSION FOR ALLIED AND HEALTHCARE PROFESSIONS
स्वास्थ्यम् सर्वार्थसाधनम्
NCAHP
Since-2021
राष्ट्रीय सहबद्ध और स्वास्थ्य देख-रेख वृत्ति आयोग

1.3.5 Commitment to professional excellence

Technical proficiency, appearance, confidence, empathy, compassion, understanding, patience, manners, verbal and nonverbal communication, an anti-discriminatory and nonjudgmental attitude, and appropriate physical contact are just a few of the qualities and traits that the student will demonstrate in his or her thoughts and actions to demonstrate professionalism. Within the bounds of the law, the program's goals will be to enable students to:

- Showcase unique, meritorious, and superior practice that results in excellence and demonstrates a dedication to competence, standards, ethical principles, and values.
- Exhibit the trait of being accountable to everyone, including peers, employers, service users, standard-setting/regulatory bodies, and oneself, for all actions and inactions.
- Make sure that self-interest does not drive actions or inactions
- Show consideration for co-workers and service users.
- Exhibit humanity in daily activities by acting with dignity, respect, emathy compassion and honour

1.3.6 Leadership and mentorship

In order to guarantee clinical efficiency and patient satisfaction, the student must assume a leadership position when necessary. In addition to being able to effectively manage both themselves and others, they must be able to react independently and confidently to both planned and unpredictable situations. Opportunities to enhance the experience of seeking medical attention and the provision of healthcare services must be developed and maximized. Program goals should empower students to:

- Be change agents and leaders in service development and quality improvement to improve people's health and healthcare experiences.
- Care should be systematically evaluated, and the results should be used to improve people's experiences and care outcomes as well as to inform clinical treatment procedures and services.
- Prioritize tasks and efficiently use time and resources to maintain or improve the standard of care. Acknowledge and be conscious of how one's own beliefs, values, and presumptions may affect one's practice.

- Learn supervision, feedback, reflection, and evaluation, from their experiences and take responsibility for their own professional and personal growth.
- Use a variety of professional and personal development skills to help others and themselves become more competent.
- Work both individually and collaboratively; students must have the capacity to assume a leadership role in order to safely plan, assign, and manage occupational therapy care, manage risk, and maintain accountability for the care provided; actively engage and value the contributions of others to integrated person-centered care; and effectively collaborate across agency and professional boundaries.
- Aware of when and how to interact with patients, refer them to other agencies and professionals, respect the choices of others and service users, encourage collaborative decision-making, produce positive results, and facilitate seamless transitions between agencies and services.

1.3.7 Social responsibility and accountability

The students will understand that healthcare and allied health professionals must be socially responsible, prudent resource managers, and advocates within the healthcare system. They will focus all of their research and service efforts on addressing their top health concerns because they have a mandate to serve the community, region, and country. The goals of the program should empower the students to:

- Respond to the needs of the population and exhibit understanding of the local, regional, and national determinants of health
- Create and support innovative practice patterns by offering evidence-based treatment and experimenting with fresh approaches that will better apply research findings and address the needs of individuals and communities
- Create a common vision for a future health care system that is sustainable and evolving by cooperating with and strengthening alliances with other stakeholders, such as academic health centers, governments, communities, and other pertinent professional and non-professional organizations.
- Advocate for the resources and services required to provide the best possible care for patients

1.3.8 Scientific attitude and Research scholar

Throughout their interactions with peers and patients, their academic pursuits, their research, and every other facet of their professional lives, the student will apply good scientific and/or scholarly principles. The goals of the program should allow the students to:

- Practice evidence-based practice by applying scientific method principles
- Take ownership of their educational experiences
- Develop fundamental skills like patient education, feedback-giving, presentation skills, and the design and dissemination of research knowledge
- Structure their continuing professional education to address the unique needs of the population.

1.3.9 Lifelong learning and transfer of knowledge

While using contemporary tools and technology, the student should be dedicated to ongoing skill and knowledge development. The program's goals will be to enable students to:

- Construct and improve their current skills
- Learn new skills
- Conduct objective self-assessments of their knowledge and abilities
- Implement recently acquired knowledge or abilities in patient care
- Continue to reflect on themselves and draw on their experiences to improve their learning and personal and professional development
- Identify and choose a suitable, personally and professionally fulfilling career pathway
- Develop a research question
- Be knowledgeable about basic, clinical, and translational research in its application to patient care
- Search (including electronically) and critically evaluate medical literature to enable its application to patient care

1.4 Purpose & Scope:

1.4.1 Purpose

The main technical, cognitive, emotional, and ethical facets of occupational therapy practice can be outlined in a set of professional education standards. Such a guideline has numerous advantages. Policymakers, regulatory agencies, occupational therapy students, and anybody else who wishes to understand the professional standards of the field in India may find this to be an essential tool.

The separate but connected goals exist. They are as follows:

- The goal of societal minimum standards for occupational therapy education is to guarantee that occupational therapy's contribution to people's health and well-being is acknowledged on a national and worldwide scale
- To satisfy societal expectations regarding welfare and high-quality healthcare
- Promoting uniformity and quality in occupational therapy practice both domestically and abroad is the professional goal of minimum standards, which includes several components: fostering research on occupational performance, occupational therapy education, and practice; fostering the national and international exchange of knowledge, faculty, and students between programs; fostering the international mobility of qualified therapists; and strengthening occupational therapy communities worldwide by fostering a shared understanding, experience, and language of OT education.
- The minimum standards for occupational therapy are intended to establish uniformity in OT education in India and to make it globally acceptable. Establish a baseline for assessing whether the OT program is fulfilling the required minimum standards.
- Review educational program through the process of self-evaluation
- Promote graduate commitment to lifelong learning through Continued Occupational Therapy Education (COTE) and other professional development program

1.4.2 Scope:

A broad spectrum of beneficiaries who are interested in academic training or occupational therapy education in India can use the document. The following summarizes some of the main points of this document: These standards are available for use by regulators:

- The objectives of entry-level occupational therapy courses should be developed or modified in accordance with occupational therapists' regulatory expectations.
- Professional education should be monitored in all of its aspects, including the acquisition of core subject knowledge as well as other crucial aspects like professionalism, lifelong professional development and learning, interpersonal skills, and the integration of core knowledge into clinical practice.
- To guarantee that occupational therapy entry-level education in India adheres to consistent standards that are comparable to the WFOT Minimum Competency Standards for the same population. This document may also be used by the students studying occupational therapy.
- To comprehend the prerequisites for occupational therapy practice and education
- To comprehend the different facets of professional development, such as subject knowledge, professionalism, lifelong learning and professional development, interpersonal skills, and the incorporation of fundamental knowledge into clinical practice.

1.5 Occupational Therapy support personnel or organizations

- To understand occupational therapists' roles and responsibilities

1.5.1 Government and Policymakers

- To inform expectations regarding occupational therapy services for development of policy and education
- To provide background information for health human resource planning and policy development

1.5.2 Other Professionals

- To understand occupational therapists' roles and competencies

1.5.3 International agencies

- To provide information for credentialing of occupational therapy programs

1.6 Introducing Novel Components to the Teaching of Occupational Therapy

1.6.1 Competency-based curriculum

Notwithstanding the hierarchy and degree of responsibility in healthcare settings, a notable skill gap has been noted among the professionals providing healthcare services. The wide range of approaches used in healthcare education and the disparity in expectations for graduates at work and after completing a course are the causes of the wide variation in service quality. While the course design focuses on what one is expected "to know," it is assumed that students will learn what they are expected "to perform" at work. Therefore, the competency-based curriculum bridges the gap between "know what" and "do how."

The curriculum design being used has a significant impact on the efficacy and efficiency of any educational program. As scientific and medical knowledge has advanced, educators have come to the realization that learning is no longer restricted to learning lists of facts and figures; in fact, by the time a professional want to work in the healthcare industry, the knowledge they have learned may be out of date. Competency-based education, a curriculum idea created to give professionals the skills they require, is therefore the solution. A competency-based program is a combination of skills and competencies that are developed to teach pertinent content across a variety of courses and settings, based on the needs of the individual or population (e.g., clinical knowledge, patient care, or communications approaches). Competency-based education places more emphasis on competencies, outcomes, performance, and accomplishments than the traditional educational system, which emphasizes objectives, content, teacher-centric learning, and summative evaluation. Learner-centered teaching activities and ongoing, formative evaluation are used in this situation. In order to obtain competency-based credentials, a professional must demonstrate a specific set of competencies that allow them to accomplish specific objectives. Employers, students, and other stakeholders can set realistic expectations thanks to competency frameworks, which include a concise description of a person's abilities upon completion of the credential. The curriculum design outlined in this handbook will therefore be based on skills and competencies in order to meet the demands of the current and future healthcare delivery systems.

1.6.2 Encouraging professionals to learn independently

It is now relevant to review the learning processes for appropriate modifications as a result of the shift in emphasis from traditional to competency-based education. Learning is no longer limited to the walls of a classroom or the lessons that a teacher teaches, as is well known. The platform has been expanded and new ways for students to learn and acquire skills and knowledge have been introduced by the new tools and technologies. Learner-centric and self-directed learning are two of the cutting-edge strategies.

In its broadest sense, self-directed learning refers to a process where people, with or without assistance from others, take charge of determining their own learning needs, creating learning objectives, locating learning resources, selecting and putting into practice learning strategies, and assessing learning results (Knowles, 1975).

Instead of just responding to transmissions from resources, self-directed learning involves learners taking the initiative to use them, which improves their learning. AHPs and other health professionals can benefit from lifelong, self-directed learning (SDL), which has been recognized as a critical skill for medical graduates (Harvey, 2003). Numerous studies conducted all over the world have demonstrated the superiority of the self-directed learning approach over the teacher-centric approach.

Learners become more reliant on their teachers, and the focus of instruction shifts to the subject. When a teacher supplies the learning materials, students are typically content with what is offered; however, when they are asked to complete the same assignment, they must always look through a lot of resources on the topic. In contrast to traditional classroom instruction, the handbook encourages self-directed learning and provides a platform for students who want to pursue lifelong learning.

1.6.3 Credit hours versus the conventional method

The University Grants Commission (UGC) and the National Assessment and Accreditation Council (NAAC) have recently emphasized the necessity of adopting an efficient grading system to gauge student performance and developing a Choice-Based Credit System (CBCS) that is comparable to international standards. Every significant provider of higher education in the world runs a credit system. These include the Credit Accumulation and Transfer System (CATS) in the UK, the Pan-Canadian Protocol on the Transferability of University Credits, the European Credit Transfer System (ECTS), the "National Qualifications Framework" in Australia, and the systems in the US, Japan, and other countries.

A completely convertible credit-based system that is accepted at other universities is now required on a global scale. The popularity of programs like "twinning programs," "joint degrees," and "study abroad" has made it necessary to give students mobility and flexible curriculum options.

The current curriculum structure is broken down into smaller sections with an emphasis on study hours that can be converted into credit hours in accordance with international standards that are adhered to by many other nations in order to guarantee the graduates' acceptance on a global scale.

1.6.4 An integrated curriculum structure

In its purest form, vertical integration is the process of integrating clinical knowledge and skills into the basic science years while also highlighting and extending the teaching of basic science concepts' applications during the clinical years. Only the first half of the process is included in many so-called "vertical integration" initiatives.

The process of identifying concepts or abilities that are cross-cutting (like the basic sciences) and particularly clinically relevant, then using them as a cohesive theme for presentations, clinical examples, and course materials is known as horizontal integration; for instance, integrating human anatomy, physiology, pathology, and other basic science courses about organ systems; or integrating computer skills, ethics, legal concerns, finance, politics, humanities, and culture into various course components, such as the clinical continuum.

Through the use of a common language of medical science, an integrated curriculum seeks to help students reach a level of scientific fluency that goes beyond simple fact and concept acquisition. This will enable them to start thinking creatively about medical issues.

In addition to bridging the gaps between theory and practice, as well as between hospital-based and community practice, this creative new curriculum has been designed to support both horizontal and vertical integration between disciplines. The amount of time spent on laboratory and basic sciences (along with their clinical applicability) would be the maximum during the first year of training, gradually declining during the second and third years, placing a greater emphasis on clinical exposure and learning.[11] Nevertheless, it might vary from one course to another based on the professional group.

1.6.5 Learning methodologies

With a focus on self-directed learning, the curriculum will include a foundation course that focuses on communication, basic clinical skills and professionalism; and will incorporate clinical training from the first year itself. It is advised that basic and laboratory science education be combined with adequate clinical experience at the primary care level. The introduction of case scenarios for class discussions and case-based learning should also be prioritized.

An effective healthcare system is built on healthcare education and training, and India's educational system has not yet benefited from the ongoing global technological revolution. Clinical skills are taught and learned at the patient's bedside or in other clinical settings, like laboratories, with the addition of didactic instruction in classrooms and lecture halls, according to the report "From Paramedics to Allied Health: Landscaping the Journey and way ahead." The adoption of successful assessment patterns has led to a paradigm shift toward outcome-based education in addition to keeping up with the rapid advancement of technology. But in institutions where it is currently scarce, the need for competence demonstration must be encouraged. The report also lists a few Indian healthcare and allied education institutions that have set up clinical skill centers, labs, and high-fidelity simulation labs to improve training and practice for healthcare and allied education professionals. Simulated patients, computer-assisted resources, and mannequins are used to replicate all or a portion of a clinical encounter, as the report reiterates. By properly training the workforce on newer technologies, simulators help address a number of problems, including inefficient use of resources and equipment, limitations in providing hands-on training in real-life situations, and inefficient methods for assessing skills. The numerous teaching and learning approaches that make use of cutting-edge resources and technologies are listed in the table below:

Table 1.1 Clinical teaching-learning process that employ cutting-edge methods

Patients	• Teach and evaluate in specific clinical settings • Develop soft skills for evaluation, OT diagnosis and planning for intervention and activity prescription. • Use Occupational Therapy Practice Framework (evaluation of Occupational performance areas, performance components and performance contexts) perform a physical examination. • Application of methods, modalities and strategies in Occupational Therapy • Practice periodical evaluation • Get performance feedback
Mannequins	• Application of the skills learned. • Develop fundamental procedural knowledge. • Apply basic science for understanding clinical problem solving ADL training, Basic life support
Simulators & Mobile Health (mHealth) Applications	• Develop your leadership and teamwork skills • Execute pulmonary and cardiac care techniques • Use your patient care skills • Use your knowledge of fundamental science to solve clinical problems • Deliver programs, reminders, and educational resources
Use of Videos/ Artificial Intelligence and Machine Learning	• Videos of patients, mannequins, and subjects that have already been recorded • Online photos and videos from reputable organizations and institutions • Reference and textbook materials, among other things • Analyze large datasets to predict outcomes and tailor therapy
Task under Occupational therapists	• Tasks as specific to the Occupational Therapy Profession: sensory integration, pre-feeding stimulation & techniques, Ergonomics & work hardening, Functional assessment & training, Disability evaluation & certification, customizing splints/orthosis & adaptive devices, home modifications, school-based OT, mental health screening and rehabilitation, industrial rehabilitation, Customizing orthosis & adaptive devices etc.

1.6.6 Methods of Assessment

The annual assessment system is the traditional method of evaluating students. Internal and external tests, as well as a theory exam at the end of the year or semester, make up the majority of institutions' assessments. In essence, this evaluates knowledge rather than abilities or proficiencies. In competency-based training, students are evaluated according to how well they perform the skills that correspond to their competencies. As a result, each of the three qualities—knowledge, abilities, and attitudes—is evaluated in accordance with the specific competency.

Nowadays, a number of new techniques and resources are easily available, but using them calls for specialized training. Below are a few of these:

- Objective Structured Clinical Examination (OSCE), Objective Structured Practical Examination (OSPE), Objective Structured Long Examination Record (OSLER)
- Mini Case Evaluation Exercise
- Case-based discussion (CBD)
- Direct observation of procedures (DOPs)
- Portfolio
- Multi-source feedback
- Patient satisfaction questionnaire

These days, many healthcare and allied courses use an objective structured clinical examination (OSCE). It assesses proficiency in clinical examination, administration of various assessment tools and application of Occupational Therapy procedures/prescriptions. In Occupational Therapy, the basic essential elements consist of functional analysis of the occupational roles, translation of these roles ("competencies") into outcomes, and assessment of trainees' progress in these outcomes on the basis of demonstrated performance. The competencies attained, not the underlying procedures or amount of time spent in formal educational settings, are the only factors that define progress. The majority of approaches emphasize regular evaluation of learning outcomes by using predefined, accepted assessment criteria (such as rating scales for scoring or observation checklists). Teachers must therefore be aware of these developments and appropriately implement them in the educational system.

Chapter 2

Approach to the Curriculum Development

2.0 Approach to the Curriculum Development

Following the publication of the report "From Paramedics to Allied Health: Landscaping the journey and the way ahead," the Ministry of Health and Family Welfare gave top priority to the main suggestions and issues brought up by different healthcare and allied professional associations and specialists, as stated in the report. The report's main recommendations included the necessity of standardizing the curriculum and pedagogical requirements for the main courses taken by allied and healthcare professionals.

2.1 Actions taken during the curriculum development:

A uniform standard curriculum is required, and it should be upgraded to meet the nation's current needs while taking into account the NCAHP Act and its provisions for the regulation and upkeep of standards of education and services by allied and healthcare professionals. This curriculum has been developed in light of the standards of occupational therapy professions worldwide and with reference to the modifications in curricula at reputable national and international universities and institutions. A comprehensive and internationally recognized set of educational standards founded on skills and competencies is part of this.

2.1.1 Constitution of Occupational Therapy Task force committee:

To guarantee broad geographic representation and meet a range of needs throughout the country, a taskforce committee was constituted by NCAHP with professional experts in the fields of academia, practice, and research from top government and private institutions throughout India. These individuals designed the curricula using a standardized framework and functioned as subject matter experts. The task force committee was given guidelines by the commission to update and recommend new guidelines for occupational therapy education and practice in India.

2.1.2: Taskforce meetings:

A series of twenty-five online meetings lasting two to three hours each involving all taskforce member were organized to complete the work of development of This hand book.

2.1.3 Literature review:

The handbook of the "Minimum standards of Academic council of occupational therapy of All India Occupational Therapists' Association," UGC guidelines, and the curricula of all the top Indian universities were referred as the fundamental framework. These served as a starting point for revision and upgrading to meet international standards in occupational therapy education and practice while taking into account technological developments and updates.

A consensus was established among the task force committee members regarding the inclusion or exclusion of various suggestions, informed by both member deliberations and a comprehensive review of the literature. The diverse and extensive expertise of the task force members in their respective domains had played a pivotal role in evaluating the relevance of the proposed curriculum within the broader healthcare context, marking a significant milestone in the standardization of Occupational Therapy education in India." Detail deliberations were made regarding the framework, content, competencies, hours, examination pattern, and recommended teaching, learning & assessment methods. The curriculum was developed for Bachelor of Occupational Therapy (BOT), Master of Occupational Therapy (MOT), and PhD programs.

2.1.4 Public opinion: was solicited on public platform for 15 days through which more than 2000 comments were received, reviewed and incorporated appropriately as per the recommendations of the Taskforce members.

NATIONAL COMMISSION FOR ALLIED AND HEALTHCARE PROFESSIONS
स्वास्थ्यम् सर्वार्थसाधनम्
NCAHP
Since-2021

2.2

The versatile and immense experience of task force members in their respective streams, to assess the applicability of the curricula drafted in view of the healthcare system as a whole will be a milestone in standardization of Occupational Therapy education in India. After lengthy discussion, all of the experts agreed for drafting the curriculum in the line of the following thematic areas:

1. The occupational therapy profession requires the development of minimum curriculum guidelines.
    - Future-focused and patient-centered curricula are ideal.
    - Needs to incorporate the most recent technological developments.
    - Needs to permit worldwide mobility and be in line with international standards.
2. No institution should offer any distance learning or part-time programs in healthcare science; all programs should be offered full-time.
3. The following must be covered in curricula:
    - The profession's definition
    - Entry requirements
    - Entry qualification: Bachelor-level programs other than entry qualification that are desired in the profession
    - Qualification nomenclature
    - The length of the internship combined with the length of each program level

      Competencies must drive the curriculum content and are required at the end of each level

      The number of desired faculty members (along with their hierarchy and designations) and the minimum requirements for each program level
    - Batch size and student-to-faculty ratios
    - Program evaluation framework and assessment at the conclusion of each program

      Information about journals, reference books, and necessary and desired equipment must also be taken into account

4. To guarantee the bare minimum of proficiency in fundamental subjects, a predetermined credit-based system must be adhered to. It is necessary to assign credits and hours to every subject.
5. A shared entrance method to be taken into account for the program
6. "English" should be used as the teaching language.
7. Each program level will incorporate a competency framework that includes performance criteria as well as relevant knowledge, skills, and behaviors.
    - The competencies ought to be quantifiable and in line with evaluations
    - The weighting of the content, number of hours, and credits for foundation courses may vary depending on the needs of different professions, and they may be distributed throughout the program
    - Focus on soft skills and communication.
8. An internship must be required for all programs
    - Rotatory internships can also be required by clinical programs to give students more clinical exposure
    - Since the internship is a component of the academic program, educational institutions should be responsible for making sure that students complete it at the affiliated hospital
    - To guarantee that students receive practical experience, standalone institutions must have a memorandum of understanding (MoU) with a medical college, hospital, or healthcare facility in accordance with the guidelines (i.e., the desired number of OPD, etc.) specified in the curriculum
    - The memorandum of understanding should specify the clinical supervision of the students; clinical preceptors or institutional staff may be taken into consideration
    - Internship students must receive a stipend of a fair amount
    - Since internships are a component of the academic program, they cannot be counted as work experience
    - The curriculum must also include student or observer participation
    - If available, simulation and skill labs can be utilized during the first few years of observership or studentship to practice program-specific skills

- A few hours each year may be set aside for workshops or seminars on emerging technologies
- Students and interns should be given transportation if the clinical facility is located off campus
- After the internship is over, all practical skills must be monitored, documented in a digital logbook, and assessed

9. Master's programs ought to be encouraged in order to foster field specialization and produce qualified faculty members.
10. PhD in Occupational therapy should be encouraged in educational and research institutions. Appropriate regulations for the institutions, co-supervisor or research supervisor, PhD length and procedure for the entire PhD program should be formulated.

2.3 Occupational Therapy Professional Council Member Meeting:

A physical Meeting was organized among all Five council members at NCAHP office on 20th and 21st May 2025 for finalizing the draft curriculum.

स्वास्थ्यम् सर्वार्थसाधनम्
NCAHP
Since-2021

3.1 Statement of Philosophy–

The philosophy of Occupational Therapy is rooted in the belief that engagement in meaningful occupation is essential for health, well-being, and quality of life. Occupational Therapy views individuals as holistic beings whose physical, emotional, cognitive, and social components are interdependent. This client-centered profession emphasizes the therapeutic use of purposeful and meaningful activities to enable people of all ages to participate in the roles and routines of daily life. The dynamic interaction between the person, environment, and occupation forms the core of Occupational Therapy practice, aiming to promote independence, dignity, and functional performance across various life domains.

Occupational Therapists must have commitments to lifelong learning and to search for the evidence that supports and advances practice. Critical thinking, problem solving, intellectual perseverance and courage are all essential characteristics of the successful occupational therapist.

3.2 Definition of Occupational Therapy & Occupational Therapist

- "Occupational Therapy is a holistic, evidence based client centered first contact and/or referral profession of modern health care system, based on science of occupation with primary focus on purposeful goal-oriented activity/occupations, enhanced with the use of latest technological systems for evaluation, diagnosis, education and treatment of the clients whose function(s) is (are) impaired by physical, psychosocial & cognitive impairments, whether congenital or acquired, affecting their quality of life with the aim to prevent disability, promote health & well-being and return to optimum occupational roles.
- Specific occupational therapy services include but are not limited to: preventive health literacy, assessment & interventions in activities of daily living (ADL), work & productive activities, play, leisure and spiritual activities; functional capacity analysis, prescription, designing and training in the use of assistive technology, adaptive equipment & splints, and environmental modifications to enhance functional performances." (AIOTA 2017)

- In occupational therapy, occupations refer to the everyday activities that people do as individuals, in families and with communities to occupy time and bring meaning and purpose to life. Occupations include things people need to, want to and are expected to do. Occupational Therapy is thus an applied science based on scientific reasoning that enhances ability of client to participate in purposeful occupational tasks.

- Occupational therapists have a broad education in the medical, social behavioral, psychological, psychosocial and occupational sciences, which equips them with attitudes, skills and knowledge to work collaboratively with people, individually or in groups or communities. Occupational therapists work for all people, including those who have an impairment of body structure or function owing to a health condition, have activity limitations or who are restricted in their social participation.

- Occupational therapists believe that participation can be supported or restricted by the physical, affective or cognitive abilities of the individual, the characteristics of the occupation, or the physical, social, cultural, attitudinal and legislative environments. Therefore, occupational therapy practice is focused on enabling individuals to change aspects of their person, the occupation, the environment, or some combination of these to enhance occupational participation (WFOT). The core concepts of professional practice correlate well with the current concepts of the model of International Classification of Functioning Disability and Health [ICF] WHO 2001.

NATIONAL COMMISSION FOR ALLIED AND HEALTHCARE PROFESSIONS
स्वास्थ्यम् सर्वार्थसाधनम्
NCAHP
Since-2021
सशक्त और स्वास्थ्य देख-रेख वृत्ति आयोग

- The NCAHP Act 2021 defines an Occupational Therapy Professional as the following:

  - "Occupational Therapy Professional is a person who delivers client-centered services concerned with promoting health and wellbeing through occupation to enable people to participate in the activities of everyday life, which includes professionals such as Occupational Therapists who achieve this outcome by working with people and communities to enhance their ability to engage in the occupations they are expected to do, or by modifying the occupation or the environment to better support their occupational engagement. The Occupational Therapist can practice independently or as a part of a multi-disciplinary team and has a minimum qualification of a baccalaureate degree.

  - The Occupational Therapist assesses/evaluates, diagnoses, plans & implements the treatment and rehabilitation program of all age groups of persons (neonates to geriatric population) having any impairment which hamper their participation in their daily functions and prevent them from achieving their life roles. Occupational Therapy professionals use scientific knowledge base & advocacy skills to protect, promote and optimize health & functional Independency and prevent illness/injury, alleviate suffering of human responses while assuming responsibility via. Holistic Approach.

  - The Occupational Therapist can practice independently or as a part of a multi-disciplinary team and has a minimum qualification of a baccalaureate degree. (NCAHP Act 2021)

  - **The International Standard Classification of Occupations (ISCO)** given by the International Labour Organisation (ILO) is 2269.

3.3 Responsibilities / Activities

Occupational Therapy is a health care profession & is an essential part of health & community service delivery system. Occupational Therapist helps individuals, families, groups, communities, organizations, or populations to develop strategies and opportunities to maximize the engagement in one's 'occupations' includes things people need to, want to and are expected to do according to their living context. Occupational Therapists use a scientific approach based on evidence and clinical reasoning for their decision-making process.

Occupational Therapists practice independently of other health care/service providers and also within multidisciplinary rehabilitation/habilitation programs to prevent, gain, maintain or restore optimal function and quality of life in individuals. Such a decision-making process by Occupational Therapist, ensuring that the needs of patients are met involves multiple steps:

- Comprehensive Assessment
- Diagnosis
- Decision making on intervention planning with appropriate clinical reasoning
- Planning an individual / beneficiary specific evidence based intervention
- Implementation of the proposed intervention
- Monitoring
- Modifying the intervention based on the input from monitoring
- Re-evaluating the client / beneficiary of occupational therapy services
- Effectively liaison with all the other associated professionals

3.4 Scope of Practice:

Occupational therapists are committed to the provision of culturally appropriate care to all clients. They work within a multicultural society, remaining cognizant of their own cultural values whilst also striving to understand and respect the particular cultural context of their clients. All Occupational Therapists registered to practice are qualified to provide safe and effective occupational therapy & are guided by their own code of ethical principles. They have me National entry-level education and practice standards, and have successfully passed a standardized Occupational Therapy competence examination The minimum education requirement is often a baccalaureate degree in Occupational Therapy.

The roles implicit by occupational therapists include, but are not limited to

- Clinician
- Counsellor
- Occupational-related health risk assessor and advisor (e.g., Evaluation of Work-Related Musculoskeletal Disorders (WRMSDs), worksite ergonomic evaluation, driving evaluation etc.)
- Program director (e.g., a specific program to promote mental health among elderly OR adolescents etc.)
- Rehabilitation director
- In addition to these roles related to the 'direct delivery' of occupational therapy services, an occupational therapist may also manage other roles like,
- Researcher
- Academician
- Diplomat

3.5 Practice settings

Occupational Therapy is delivered in a variety of settings which allow it to achieve its purpose. Prevention, health promotion, treatment/intervention, habilitation, and rehabilitation take place in multiple settings that may include, but are not confined to, the following:

- Government organizations/institutions/hospitals/projects
- Non- government organizations
- Private sectors like
- Acute care hospitals & nursing homes (Indoor & out door patients)
- Rehabilitation centers
- community settings including primary health care centers, individual homes and field settings
- Special schools /Main stream Schools/ Integrated schools/preschool centers
- Child development centers
- Geriatric clinics/centers
- Chronic care facilities/ Nursing homes

- Social agencies/Community-Based Rehabilitation (CBR) & Disaster Management Projects
- Hospice care facilities
- Mental Health Setups /Institutions and Hospitals
- Corporate offices/Ergo Furniture manufacturing industries & others
- Occupational health centers
- Public settings (e.g., shopping malls, public transport) for ACCESS
- Prisons
- Education and Research Institutes/Centers
- Fitness clubs, health clubs, gymnasium
- Forensic medicine
- Women wellness clinics/centers
- Some occupational therapists develop expertise in a specific working area, or with a specific age group or disability.

3.6 Professional code of ethics

Premble

Applications of Code and Ethics Standards Principles are considered universally and where a conflict exists, occupational therapy personnel will pursue responsible efforts for resolution. The guiding principles of Code of ethics are intended to orient the individuals within the profession, ensure the clients best interests and to protect the professional itself and its position. Professional ethics ensure a place of trust within the health care system for those who choose to practice occupational therapy. The ethical principles mainly include Autonomy, Veracity, Justice, Fidelity, and Beneficence among others. Occupational Therapists duly registered with the NCAHP /State Council are expected to abide by this Code of Ethics. The goal of the Code of Ethics is to achieve and maintain high standards of professional integrity toward clients, colleagues, partners, stakeholders and the public. The Code describes the expected conduct of all registered members in occupational therapy practice, including those involved in direct service to clients, management, administration, education and research.

The following Code of Ethics is expected from the professionals practicing Occupational Therapist:

- Possess the qualities of integrity, loyalty and reliability.
- Use professional communication with clients, colleagues, partners and stakeholders.
- Value and respect clients right to be self-directed in their decision-making in accordance with their own needs, values and available resources.
- Value and respect client's rights to be treated with respect and dignity within a safe and non-judgmental environment.
- Ensure confidentiality and privacy of personal information.
- Recognize and manage issues related to conflict of interest.
- Maintain a standard of professional competency to provide high quality service.
- Abide by legislative requirements and codes of ethics established by provincial occupational therapy regulatory organizations (As applicable) and other organizations to which the members have obligations (e.g., employer, facility)
- Contribute to interdisciplinary collaboration and development of partnership to advance the occupational performance of the population served.
- Understand and manage ethical implications involved in all practice domains, including research.
- Participate in continuing professional development throughout their career and apply new knowledge and skills to their professional work which is based on best available evidence.
- Promote their profession to the public, other professional organizations and government at regional, provincial and federal levels and
- Contribute to the development and/or dissemination of professional knowledge.

Occupational Therapists shall work on the basis of first contact / referral and shall observe the code of ethics specified as below:

3.6.1 Responsibility to Self as a Professional

Occupational Therapists should demonstrate knowledge & skill of high academic & professional standards, open-mindedness & respect and maintain professional integrity while rendering services. They shall provide services within the framework of occupational therapy based on curriculum, experience, research and practice.

3.6.2 Responsibility to the Recipient of Services

- Occupational Therapists shall:
- Provide services to recipients without discriminating on the basis of caste, colour, religion, race, ethnicity, geography, age, gender, gender identity, sexual orientation, economic status, impairments and disabilities, marital status, culture and political affiliation.
- At all-time strive to give treatment of the highest level of professional skill. Establish a collaborative relationship with recipients of service including families, significant others, and caregivers in setting goals and priorities throughout the intervention process. This includes full disclosure of the benefits, risks, and potential outcomes of any intervention; the personnel who will be providing the intervention(s); and/or any reasonable alternatives to the proposed intervention.
- Ensure that confidentiality and right to privacy are respected and shall discuss only pertaining facts with other professional persons involved in the treatment program.
- Ensure that people receiving their services feel safe, accepted, and are not threatened by actions or attitudes of the therapist.
- Respect the consumer's right of consent or refusal for services, involvement in research, or educational activities.
- Shall intentionally refrain from actions that cause harm or injury to the recipient of services.

- Avoid relationships that exploit the recipient of services physically, emotionally, psychologically, financially, socially, or in any other manner that conflicts or interferes with professional judgment and objectivity.
- Avoid engaging in any sexual relationship or activity, whether consensual or non- consensual, with any recipient of service, including family or significant other, while a relationship exists as an occupational therapy practitioner, educator, researcher, supervisor, or employer.
- Avoid any undue influences, such as alcohol or drugs, that may compromise the provision of occupational therapy services, education, or research.
- Avoid exploiting any relationship established as an occupational therapist to further one's own physical, emotional, financial, political, or business interests at the expense of the best interests of recipients of services.
- Take appropriate steps to facilitate meaningful communication and comprehension in cases in which the recipient of services has limited ability to communicate.

3.6.3 Responsibility to Professional Colleagues

The Occupational Therapist must show professional concern for those practicing the same or other Professional skills, recognizing that only by achieving and fostering mutual respect and understanding the effective service can be rendered to the clients and others.

3.6.4 Responsibility to the Employers

The Occupational Therapist should be responsible to his employing Institution and should assist in interpretation of its functions within the community. He/she must accept his/her proper share of responsibility to the Organization and administration to the department to which he/she is appointed.

3.6.5 Responsibility to develop Professional Knowledge

Occupational Therapists shall be responsible for actively maintaining, updating and developing their personal professional competence and apply their developed /acquired skill and knowledge in the professional work based on best available evidence. If carrying out research and/or studies the client's informed consent should be obtained and there should not be any conflict of interest involved. The novel ideas / techniques in the field of Occupational Therapy must be evidence based. The researcher's contribution to development of body of knowledge must be acknowledged as per research norms.

3.6.6 Responsibility to the Profession of Occupational Therapy

The Occupational Therapist must recognize his/her responsibilities in contribution to the growth and development of his/her profession through the exchange of information, rising of treatment and educational standards and improving conditions or employment. They should be committed to promote occupational therapy in public, government and/or private sector bodies at state, national and international Levels. Occupational Therapists shall uphold and foster the values, integrity, and ethics of the profession. The Occupational Therapist shall report to appropriate authorities any acts in practice, education, and research that appear unethical or illegal.

3.6.7 Responsibility to the Community

Occupational Therapists shall-Promote information and understanding relative to the function and procedures of Occupational Therapy. Ensure that their fee structure is fair and reasonable. They shall charge fees which are a fair reflection of services delivered both to individual and organizations with which they have contracts for service. At all times recognize the fact that, in the eyes of the public, the attitude and philosophy he/she presents, portrays the profession.

3.6.8 Responsibility towards Professional Organisation

The Occupational Therapist must recognize his/his responsibilities for improving conditions or employment by supporting his/his professional organizations at the local, national and international levels. Occupational Therapists must become an integral part of the national associations for multidimensional growth of the profession in the country.

3.7 Recognition of Title & qualification on the basis of carrier progression

- Within the multidisciplinary team, the professional responsible for administrating Occupational Therapy treatment also at times referred to as the Occupational Therapist. The terminology of Occupational Therapist is an internationally adopted nomenclature and thus should also be applicable in an Indian context.
- The Commission recognizes any Healthcare professional as "Occupational Therapist" who has acquired Bachelor of Occupational Therapy from recognized university/College as per the regulations of the Commission.
- The recommended title thus stands as the "Occupational Therapist" with the Prefix **"Dr"** and suffix **"OT"**
- It is a known fact that with the career advancement, the nomenclature will also vary and will also depend on the sector and profile of the professional/ profession.
- The tables below indicate the various channels of career progression in three distinct sectors such as clinical setting, academic and research route. It is envisaged that the Occupational Therapist will have one entry pathway – graduates with baccalaureate. The level of responsibility will increase as the career progresses. The tables also indicate the corresponding level of qualification with experience required by the professional to fulfill the requirements of each level.

- Provision of time bound career progression for Occupational Therapist in Clinical, Academic and Research sector as per NMC.
- Considering the extent of patient dealing in case of Occupational Therapist and such other professions, Government aims to phase out the Diploma and PG Diploma level courses and promote only Bachelor's and Master's degree courses. In the academic front, to work at the position of a Lecturer/Assistant Professor the candidate must attain Master's degree.

**** Pay scales for Clinical, research and academic designations will be same at different levels. E.g. Pay scale of Senior Occupational therapist (Clinical), Assistant Professor (Academic) and Scientist C (Research) at the same level, will be the same*

- A minimum of 55 % marks in MOT examinations is required from in taking designation or research designation. A relaxation of 5% may be provided at the graduate and master's level for the Scheduled Caste/Scheduled Tribe/ Differently-abled (Physically and visually differently-abled) categories for the purpose of eligibility and for assessing good academic record during direct recruitment to teaching positions. The eligibility marks of 55%marks (or an equivalent grade in a point scale wherever grading system is followed) and the relaxation of 5% to the categories mentioned above are permissible, baseodn only the qualifying marks without including any grace mark procedures.
- Mandatory Ph.D. will be applicable after five years of implementation of these rules where ever mentioned in above Tables- 3.1, 3.2, & 3.3. These qualifications are applicable for future recruitment.

  In the case of teachers who are already holding teaching posts and have more than 10 years teaching experience will continue to hold their post in their respective institution.
- All Academic Post are full time teaching Post and a teaching experience from Head/ Principal/ Director of a recognized Occupational Therapy college or Institution will only be valid for counting any teaching experience.
- All teaching staff will engage in clinical practice at the attached hospitals/OPD, assuming dual responsibilities. Their workload will be calculated accordingly, with hours spent in clinical settings considered equivalent to theory hours.
- All teaching faculties should compulsarly be trained in "Implementation of Competency-based curriculum for BOT" organized by competent authority.
- It is preferably for all teaching faculties to attend "Faculty Development program" every three years.
- Occupational Therapists on clinical posts who impart and are responsible for clinical training and supervision of Occupational Therapy students/ interns will be provided with academic experience by the Dean /Principal of the respective recognized Occupational Therapy college will only be valid.

3.8 Job availability

As per ILO documentation, employers worldwide are looking for job applicants who not only have technical skills that can be applied in the workplace, but who also can communicate effectively, including with customers; can work in teams, with good interpersonal skills; can solve problems; have good ICT skills; are willing and able to learn; and are flexible in their approach to work. Graduates can expect to be employed in hospitals and private practices as Occupational Therapist. A career in research, following the completion of a higher degree such as a PhD, is an option chosen by some graduates. Graduates are eligible for employment overseas where their qualifications, training and experience are highly regarded. Graduates have good employment prospects, and will enter a field in which the demand for professionals has increased in recent years and will keep on increasing due to chronic conditions, lifestyle change. An ageing population requiring increased medical rehabilitation services, together with the continuing introduction of hi-tech equipment, ensures strong demand for future graduate

3.9 Education of the Occupational Therapist

When developing any education program, it is necessary that program planning should be outcome-based, meeting local and national manpower requirements, personal satisfaction and career potential for the professionals with supporting pathways in the development of the profession. One of the major changes is the shift from a focus based on traditional theoretical knowledge and skills to competency-based education and training. Optimal education/training requires that the student is able to integrate knowledge, skills and attitude in order to perform a professional act adequately in a given situation.

Thus, the curriculum in Chapter 4 aims to focus on skills and competencies-based approaches for learning and are designed accordingly. The curriculum is designed with an aim to standardize the content across the nation. The aim of 5 years degree program is to enable the development of an OT as a key member of the multidisciplinary team and to enable him/her to execute advanced preparation/planning/delivery of Occupational Therapy treatment with quality assurance.

With the change in the disease dynamics and multifold increase in the cases needing specialized Occupational Therapy treatment, it is imperative that a well-structured program of postgraduate education is also encouraged so as to enhance research capacity within the country to widen the scope of clinical practice for the profession. Thus, a master's degree program is recommended with minimum of two years of education in specialized field of Occupational Therapy. The post graduate students can contribute significantly in research and academics.

PhD also plays a significant role in the academic system of occupational therapy; however, the curriculum has not indicated any prescriptive guidelines for that level apart from mapping it on the career and qualification map.

3.10 Requirements of Infrastructural, Functional Equipment and Human Resources:

The establishment of an Occupational Therapy college

No person shall establish a college/institute without obtaining prior permission from the commission.

The following organizations shall be eligible to apply for permission to set up an Occupational Therapy college, namely: -

1. A State Government/Union territory
2. A University and Deemed to be University,
3. An autonomous body promoted by Central and State Government by or under a Statute for the purpose of medical education;
4. A society registered under the Societies Registration Act, 1860 (21 of 1860) or corresponding Acts in State
5. Companies registered under the Company Act may also be allowed to open occupational Therapy colleges.

6. Occupational Therapy education prepares a person for independent practice and involves extensive clinical training in almost every specialty & super specialty of modern medicine and all other aspects of health care. Henceforth, new occupational Therapy College/institutes can only be established in National Medical Commission (NMC) recognized medical colleges. These colleges/ institutes will need to fulfil the entire essential requirement as following. However, the institute may share common facilities, faculties and infrastructure with the medical college.

3.10.1 LAND AND BUILDING –

a) If the college is in the premises of NMC permitted/ recognized medical college, no separate land is required. Existing norms of land for medical college will suffice. Besides that, the constructed area/Building norms for Occupational Therapy College must be fulfilled as per the requirements mentioned below. In all other cases, the applicant must provide the land details on which the institution will be established for providing Occupational Therapy education. In such cases, the Occupational Therapy College should have an attachment with the medical college & hospital (through signed MOU) in nearby vicinity. It should be in the name of the society/ trust /company applying for the same (sale deed/lease/gift deed etc.).

b) The applicant Institution / Trust should have a separate independent building for Occupational Therapy College and facilities for clinical training as per the curriculum as prescribed by the commission from time to time.

c) Such a building should be constructed in such a way that there is adequate parking space and recreational area or open space for students as prescribed by the commission.

d) Such a building should have adequate space and should have outpatient Occupational Therapy department, various laboratories as needed, office space, class rooms, a hostel and other ancillary facilities.

e) Minimum exclusive built-up area for such a college should be 31,000 sq.ft.

f) Building should be barrier free accessible to persons with disability and as per NBCI guidelines (National Building Code of India).

g) Building must be recorded on the appellate institute name or if the land is under lease agreement, it must be for at least 10 years

h) Building must have requisite clearances from the respective civic and administrative authorities like Fire NOC, structural stability certificate, land use certificates, etc.

i) Building must have CCTV cameras for CCTV surveillance in every area of common use as can be prescribed.

j) Biometric facility for students and staff, faculty attendance record/documentation buildings with disability friendly and accessible facility

3.10.1.1 Occupational Therapy Department/ O.P.D:

A well-equipped OPD facility in the Occupational Therapy department with instruments of all specialties like Musculoskeletal & Hand, Neurology, Paediatric, Cardiorespiratory, sports medicine, Geriatrics, Mental Health and Community should be available at the college premises. A student/ patient ratio of 1:5 should be maintained. In addition to the own Occupational Therapy OPD in the college building (in case of the existing institutions) if required, the College can get attachment (through signed MOUs) to a maximum of 5 Occupational Therapy depts./ OPDs in various hospitals with a minimum 50 patients OPD workload per day. An outpatient department at the tie-up facility cannot be considered as an independent Occupational Therapy OPD/ unit of the college. Besides the Occupational Therapy OPD at the campus, the institute should also start a community/extension center in nearby rural /semi urban area.

3.10.1.2 HOSPITAL / HOSPITAL ATTACHMENT –

a. If the college is in the premises of MCI/NMC permitted/recognized Medical College as constituent college, then, there is no requirement for attachment of any other hospital.

b. In all other cases proof of availability of 250 beds own/attached hospital (Government/Private) for clinical training of 50 students shall be furnished (student: Bed ratio of 1:5). The hospital must be within 10 km radius of the College. College must provide mandatory bus service to the students if the hospital is located more than 1 km away from the College. Within 5 years of application of these Rules, the colleges must have their Own Prescribed Hospital on the college premises.

c. College can be affiliated to maximum five (05) hospitals having indoor and outdoor facility in the following specialties to have cumulative/total bed strength of 250.

Table 3.4 Cumulative bed strength as per Specialties / Super Specialties Occupational Therapy

Sr. No.	Specialties / Super Specialties Occupational Therapy
1	Orthopedics Neurology & Neurosurgery
2	Medicine including rheumatology, geriatrics and emergency medicine
3	Surgery including plastic surgery and burns
4	Mental Health
5	Orthopedics, Hand & Sports Science
6	Paediatric, Paediatric surgery and Neonatal ICUs
7	Respiratory medicine
8	Cardiology, ICU and cardiothoracic surgery
9	Geriatrics
10	Total bed strength = 250

d. Tie up hospitals cannot get attached to more than two colleges. If the affiliated hospital is attached with two colleges, the bed strength must be adequately divided amongst the colleges as per the prescribed student: bed ratio.

e. The affiliated hospital shall provide information regarding any MOU with other colleges, if any & MOU should be for at least five years or as per the respective state policy.

f. The MOU should mention the available clinical specialties, patient loads, and availability of required equipment for clinical training with names and designations of the faculties responsible for the training in the hospital.

g. FACULTY: The college/institute must arrange for occupational therapy faculties for supervision and clinical teaching of students inside the hospital. This can be done either by posting its own occupational therapy faculties in the hospital or making remunerative arrangement for recruiting occupational therapy faculties of the hospital.

h. Hospitals may recruit its faculties of occupational therapy for supervision and clinical training of Occupational Therapy students and supervision of occupational therapy interns with similar eligibility, pay scales, and promotional avenues of occupational therapy institutes.

3.10.1.3 Occupational Therapy College Building: Total area: 31,000 sq.ft

NATIONAL COMMISSION FOR ALLIED AND HEALTHCARE PROFESSIONS
स्वास्थ्यम् सर्वार्थसाधनम्
NCAHP
Since-2021
राष्ट्रीय सहबद्ध और स्वास्थ्य देख-रेख वृत्ति आयोग

3.10.1.4 Space requirements for an annual intake of 30 students of Bachelor in Occupational Therapy (BOT):

Occupational Therapy course can be started by any Medical Teaching College.

Along with the course, the college will be expected to start an Occupational Therapy Department to provide Occupational Therapy services to patients and provide clinical experience to students. For this Separate building is recommended.

The Head of this department will have to be a senior most professor & certified Occupational Therapy practitioner with a minimum of master's degree in Occupational Therapy (Preferably PhD).

The faculty of the department of Occupational Therapy will have a dual responsibility of running the clinical work along with conducting lectures and practical for the students.

***ATTACHMENT TO NMC RECOGNIZED MEDICAL COLLEGE IS RECOMMENDED.**

Note: - Facilities like auditorium, canteen and playground could be shared with other the program me conducted in the campus by the same trust / society /educational board under the same university.

13	Obstetrics & Gynecology
14	PSM
15	Cardiology
16	ENT
17	Plastic surgery
18	Ophthalmology
19	Biostatistics

Teachers of Specialty Medical Subjects:

These Teachers should be necessarily Post Graduates in specialty Subjects preferably attached to NMC Recognized Medical College. These teachers can be part-time or external teachers. A photo declaration should be given by part-time teachers indicating their willingness/to work at the said Institution and declaration of working with other colleges.

*** It is recommended to have Biometric Attendance of all staff.

The qualifications of

a. Anatomy, Physiology, Biochemistry, Pathology, Microbiology, Pharmacology Orthopaedics, General Medicine, General Surgery, Neurology, Neurosurgery, , Pediatrics, Obstetrics and gynecology, Cardiology, Cardiac surgery, Plastic surgery, MD/MS/ MSc,/PhD./DM/M.Ch. in respective specialty

b. Prosthetics and orthotics, Psychology & Sociology, Biostatistics – post graduate with 55% marks in respective specialty (subject) having knowledge of English, Computer Applications in depth.

c. *Staff for pre-clinical/ Para clinical, clinical/Medical Subjects can be appointed on fulltime or part time basis as guest/part time faculty

3. Staffing Pattern – Teaching & Non-Teaching Staff

It is recommended that a core faculty and student ratio of 1:3 for PG and for UG 1:10 to be followed.

The size of student intake should be in proportion to the number of OT faculties (10:1)

Note :- Each faculty should not take more than (02) lectures per day

Qualification & Experience of Staff in the Occupational Therapy Course: -

As per UGC Regulation on Minimum Qualification for appointment of teachers and other Academic Staff in Universities and Colleges

Table 3.11 Required core Occupational Therapy teaching staff (Core faculty) for BOT program (Ratio of teacher to student 1: 10 should be maintained)

Intake capacity	Post	No. of posts in the start of 1st year of BOT	No. of posts in the start of 2nd year of BOT	No. of posts in the start of 3rd year of BOT	No. of posts in the start of 4th year of BOT
30	Professor & Principal/ Dean	1	1	1	1
	Professor	--	--	--	1
	Associate Professor	1	1	2	2
	Assistant Professor	1	4	6	8

Chapter 4:

Competency Based Curriculum of Occupational Therapy

Bachelor of Occupational Therapy (BOT) Program - (5 years Program):

4.0 Introduction:

The purpose of this curriculum is to delineate the cognitive, affective and psychomotor skills deemed essential for completion of this program and to perform as a competent Occupational Therapist

4.1 Learning Objectives: At the completion of this course, the student should be -

1. Able to examine, evaluate, diagnose, plan, execute and document occupational therapy treatment independently or along with a multidisciplinary team.
2. Evaluate patients for impairments and functional limitations and able to execute all routine occupational therapy procedures as per the evaluation.
3. Able to operate and maintain Occupational Therapy equipment used in the treatment of patient. Also able to plan & execute Occupational Therapy treatment independently.
4. Able to provide education about various occupational therapy interventions to the patients and care givers.

4.2 Expectations from the future Occupational Therapy graduates

1. Coursework entitles independent Occupational Therapy assessment and treatment in any healthcare delivery centers in India by the graduates.
2. The coursework is designed to train students to work as independent occupational therapist or in conjunction with a multidisciplinary team to diagnose and treat as per patient's need.
3. Course works will develop skill in the graduates for physical/ functional diagnosis, treatment planning, management, administration of Occupational Therapy treatment.
4. Occupational Therapist graduate is encouraged to pursue further qualification to attain senior position in the professional field and also to keep abreast with the recent advances, new technology and research. The professional should opt for continuous professional education credits offered by national and international institutes.

5. The graduate will be a competent and reflective occupational therapy practitioner who can function safely and effectively while adhering to legal, ethical and professional standards of practice in a multitude of occupational therapy settings for clients across the lifespan and along the continuum of care from wellness and prevention to rehabilitation of dysfunction.
6. The graduate will utilize critical inquiry and evidence-based practice to make clinical decisions essential for autonomous practice.
7. The graduate will function as an active member of professional and community organizations. The graduate will be a service-oriented advocate dedicated to the promotion and improvement of community health.
8. The graduate will demonstrate lifelong commitment to learning and professional development.

4.3 Eligibility for admission:

Selection procedure:

1. Admission to Bachelor of Occupational Therapy course shall be made on the basis of the **candidate having appeared for the National Eligibility Entrance Test (NEET).**
2. He/she must have passed the Higher Secondary (10+2) or equivalent examination recognized by any Indian board or a duly constituted Board with 50% aggregate marks in Physics, Chemistry and Biology (Botany & Zoology).
3. Candidates who have passed the Senior Secondary school Examination of National Open School with a minimum of English, Physics, Chemistry and Biology (Botany & Zoology) with 50% aggregate marks in Physics, Chemistry and Biology (Botany & Zoology).
4. Candidates who have studied abroad and have passed the equivalent qualification as determined by the Association of Indian Universities will form the guideline to determine the eligibility and must have passed in the subjects of Physics, Chemistry, Biology and English in12th Standard level.

5. He/she has attained the age of 17 years as on date of admission
6. He/she has to furnish medical fitness certificate from a registered medical practitioner at the time of submission of application form, to get admission in Bachelor of Occupational Therapy program.
7. **Guidelines regarding admission of Candidate with "Specified Disabilities" under the Rights of Persons with Disabilities Act, 2016 (RPWD Act 2016) with respect to admission in BOT Course.**
    - The "Certificate of Disability" shall be issued in accordance with the Rights of Persons with Disabilities Rules, 2017 notified in the Gazette of India by the Ministry of Social Justice and Empowerment [Department of Empowerment of Persons with Disabilities (Divyangjan)] on 15th June 2017.
    - The extent of "specified disability" in a person shall be assessed in accordance with the "Guideline for the purpose of assessing the extent of specified disability in a person included under the Right of Persons with Disabilities Act, 2016 (49 of 2016)" notified in the Gazette of India by the Ministry of Social Justice and Empowerment [Department of Empowerment of Persons with Disabilities (Divyangjan)] on 4th January 2018.
    - The minimum degree of disability should be 40% (Benchmark Disability) in order to be eligible for availing reservation for persons with specified disability.
    - The term 'Persons with Disabilities' (PwD) is to be used instead of the term 'Handicapped"
    - Quota/ reservation policy as per the State Government norms to be followed by the State Council as applicable during allotment of seats.
    - Candidate who fails to attend the Medical Examination on the notified date(s) will forfeit the claim for admission and placement in the waiting list except permitted by the competent authority under special circumstances
8. The name of the student(s) who remain(s) absent from classes for more than 15 days at a stretch after joining the said program without giving any notice will be governed as per the respective University rules.

4.4 Duration of the Program: Bachelor's Degree level: 5 years (Including one year compulsory rotatory internship).

Emphasis should be on the academic content establishing a strong scientific basis and on the application of theory to clinical/reflective practice. Introduction to clinics as observer should be started from 1st year & clinical practice under supervision should be started from 2nd year onwards. This should be on a continuum of rotation from theory to practice over the program.

4.5 Number of Academic Hours:

4 years [40 weeks per year) (39 hr /week x 40 weeks)
Academic Training, excluding internal and university examination, extracurricular activities, Public Holidays and Vacation.

Teaching Hours: 1560 hours/ year Total of 6240 hours for 4yrs annual pattern
Elective posting: Minimum 35 hours per week for 4 weeks =140 hours
Internship (CRI): 01-year (52 WEEKS) full-time rotatory internship program.
A minimum of 2016 hours of internship (to be completed in 52 weeks).
Total hours: 8396 includes teaching (didactic lecture, case study discussion, seminars, small group presentation Practical, Tutorials Laboratory work & Clinical learning in the presence of teacher) ,Elective posting and CRI.

4.6 Medium of instruction:

English shall be the medium of instruction for all the subjects of study and for examination of the course.

4.7 Educational Methods

The teaching methods will adopt competency-based learning for the students. Apart from classroom teaching (contact hours), self-learning will be facilitated to make a graduate a lifelong learner. Harnessing the technological advancements, hybrid or virtual learning by using mannequins, simulators, videos, online classes and other methods will be adopted

The range of educational methods may include case studies, learning with and from recipients of occupational therapy, discussions, skills training, assignments, reflective practice, projects, literature review, experimental learning, problem-based learning, inter-professional learning, lectures, online classes for didactic lectures & clinical training etc.

Modalities to improve the quality of educational methods include peer review of teaching, student feedback, discussion among staff, review meetings, moderation and monitoring processes, advisory and examination boards etc.

4.8 Attendance:

A candidate has to secure minimum-

1. 75% attendance in theory subjects
2. 85% in Skills training (practical) for qualifying to appear for the final examination.
3. If the students fail to attain above mentioned percentage of attendance, he/ she is eligible to appear university examination in next academic year after attaining necessary attendance.
4. No relaxation, whatsoever, will be permissible to this rule under any ground including indisposition etc.

4.9 The Continuous CIA (CIA)

The Continuous CIA (CIA) forms the Formative Assessment component of the evaluation system while the end year examination as explained along with the formative assessment will become the summative assessment

Assessments should be completed by the academic staff, based on the compilation of the student's theoretical & clinical performance throughout the training program.

To achieve this, all assessment forms and feedback should be included and evaluated. The passing marks for every subject shall be 50% marks in theory and practical separately.. If a student fails in practical or theory CIA examinations, he/ she is not eligible to appear university examination. However, the students will be allowed to appear in next academic year university examination after attaining necessary CIA marks in theory and practical.

4.10 Commencement of the course -

The course shall commence not later than 1st September of an academic year

4.11 Commencement of Examination:

University examination should be conducted at the end of each academic year. However,, two examination in an academic year is essential and has to be conducted by the university, one Annual/Supplementary examination in an academic year.

Qualifying marks passing in the University examination:

50% marks in theory and practical separately.

4.12 Promotion criteria -

The Students will be promoted to next year, only if the number of failed subjects is two or less than two. Students must pass the failed subjects in the supplementary examination before appearing for the final examination of next year, failing which he/she will not be allowed to appear for the proceeding year. For example, the student should pass in failed subjects of Ist year, before appearing for 2nd year final examination and before the 3rd year final examination in case of failed subjects of II year and so on.

Only after passing in all the subjects in all years, he/she will be eligible for the internship.

Review of answer papers of failed candidates -

As per the regulations prescribed for review of answer papers by the University.

4.13 Re-admission after break of study -

Candidates having a break of study of five years and above from the date of admission and more than two spells of break will not be considered for readmission

The five years period of break of study shall be calculated from the date of first admission of the candidate to the course for the subsequent spells of break of study. Candidates having break of study shall be considered for re admission provided that they are not subjected to any disciplinary action and no charges are pending or contemplated against them.

All re-admissions of candidates are subjected to the approval of the Vice Chancellor.

The candidates having a break in the study, up to five years shall apply for readmission to the Registrar of this University. The candidates shall be granted exemption in the subjects they have already passed.

4.14 Maximum duration of the program -

Candidates should complete the Bachelor of Occupational Therapy degree course within a period of ten years from the date of joining in the course.

4.15 Discharge from the program –

If a student admitted to a course of study in an University and for any reason not able to complete the course or qualify for the degree by passing the examinations prescribed within a period comprising twice the duration prescribed in the regulations for the concerned course, he/she will be discharged from the said course, his/her name will be taken off the rolls of the University and he/she will not be permitted to attend classes or appear for any examination conducted by the University thereafter.

In respect of courses where internship is prescribed and if a student is for any reason not able to complete the internship within a period comprising twice the duration prescribed in the Regulations for the concerned course, such cases will be placed before a committee to be constituted by the Vice- Chancellor for making appropriate decision on a case-to-case basis, based on individual merits.

Notwithstanding anything contained in the foregoing, the students who fall in the category clause I above and who are in the final year of the respective courses be given one more last and final chance to appear for the University Examination with a condition that if they do not pass the examination even in their last chance, they shall be discharged from the course. The Controller of Examinations will admit such candidate to the University examinations only after their producing an undertaking (as per format given in student's manual) to this effect.

4.16 Migration/transfer of candidates -

Vice Chancellor shall have the powers to approve any migration/transfer of candidates up to 2nd year of BOT, deems fit in the Board of Management of the university.

4.17 Vacation -

The University may declare a maximum of 30 days of vacation in an academic year to the students. The period(s) of vacation can be decided by the university.

4.18 Classification of successful candidates -

A successful candidate:

- Who secures 75% and above in the aggregate marks shall be declared to have secured 'FIRST CLASS WITH DISTINCTION' provided he/she passes the whole examination in the FIRST ATTEMPT;
- Who secures above 60% and less than 75% in the aggregate marks and completes the course within the stipulated course period shall be declared to have passed the examinations in the 'FIRST CLASS, provided he/she passes the whole examination in the FIRST ATTEMPT';
- Who secures above 50% and less than 60% in the aggregate marks and completes the course within the stipulated course period shall be declared to have passed the examinations in the 'SECOND CLASS';
- All other successful candidates shall be declared to have PASSED the examinations.

4.19 Credit, Grading and Transcript

Credit: A unit by which the course work is measured. It determines the number of hours of instructions. One credit is equivalent to one hour of teaching (lecture or tutorial) or two hours of practical work/field.

Credits will be assigned on the basis of the lectures (L) / tutorials (T) / Clinical Training (CR) / laboratory work (P) / Research Project (RP) and other forms of learning

L - One credit for one hour lecture per week (1 credit course = 15 hours)
P/T - One credit for every two hours of laboratory or practical (1 credit course = 30 hours)
CR - One credit for every three hours of Clinical training/Clinical rotation/posting (1 credit course = 45 hours)

RP - One credit for every two hours of Research Project per week – Max Credit 20- 25 (1 credit course = 30 hours)

Credit Point: It is the product of grade point and number of credits for a course. Calculation of credit (As per national credit framework)

Grade Point: It is a numerical weight allotted to each letter grade on a 10-point scale.

Letter Grade: It is an index of the performance of students in a said course.

Grades are denoted by letters O, A+, A, B+, B, C and F.

NATIONAL COMMISSION FOR ALLIED AND HEALTHCARE PROFESSIONS
स्वास्थ्यम् सर्वार्थसाधनम्
NCAHP
Since-2021

4.20 Computation of AGPA and CGPA

The UGC recommends the following procedure to compute the Annual Grade Point Average (AGPA) and Cumulative Grade Point Average (CGPA):

The following procedure should be used to compute the Annual Grade Point Average (AGPA) and Cumulative Grade Point Average (CGPA):

The AGPA is the ratio of sum of the product of the number of credits with the grade points scored by a student in all the courses taken by a student and the sum of the number of credits of all the courses undergone by a student

The CGPA is also calculated in the same manner taking into account all the courses undergone by a student over all the years of a program

The AGPA and CGPA shall be rounded off to 2 decimal points and reported in the transcripts.

Cumulative Grade Point Average (CGPA): It is a measure of overall cumulative performance of a student overall years. The CGPA is the ratio of total credit points secured by a student in various courses in all year and the sum of the total credits of all courses in all the year. It is expressed up to two decimal places.

Letter Grades and Grade Points:

10- point grading system with the following letter grades will imply the performance of the students in said program.

Letter Grade	O	A+	A	B+	B	C	F/RA	AB	I / RC
Grade points	10	9	8	7	6	5	0	0	0

Table 4.1 Consolidated Grade Card - BOT Program (only if the student passes in first attempt)

Consolidated Grade Card - BOT Program		
Letter Grade	**%Mark range**	**Grade point**
O (Outstanding)	90-100	10
A+ (Excellent)	80-89	9
A (Very Good)	70-79	8
B+ (Good)	60-69	7
B (Above Average)	55-59	6
C (Average)	50-54	5
F/RA (Fails/Reappear)	Less than 50	0
AB (Absent)		0
In complete(I)		0
Repeat course (RC= **Detained due to shortage of Attendance/ failed in CIA**		0

4.21 Supervised Clinical training/Fieldwork

It is mandatory to include demonstrations & practical sessions, supervised clinical work, seminars, hands on therapeutic workshops, throughout the course period to train the students for proficiency in Occupational Therapy applications to contribute towards the well-being of clients.

Actual clinical work in clinical settings, all hands-on procedures related to patient care involves patient evaluation, assessment, diagnosis, goal planning, writing, and execution of goals, intervention procedures, patient and family education & documentation of individual patients/clients. Each student is expected to maintain the log book for documentation/record of each patient in every clinical assignment throughout the program & which the respective clinical supervisor should sign regularly.

Fieldwork placement should be of sufficient duration to allow integration of theory with practice. The number of students placed at the clinical fieldwork should be in proportion to the number of available patients. The example of competencies of clinical placement of all the four years is shown in annexures.

4.22 ELECTIVE MODULE:

Guidelines for Elective module during clinical training for Competency Based Undergraduate Curriculum for Occupational Therapy

4.22.1 INTRODUCTION

Elective can be defined as a brief course made available to the learner during his/her occupational therapy undergraduate study period, where the student can choose from the available options depending upon their interest and career preferences. It is an integral part of Competency Based Education Curriculum. Electives are learning experiences, which are student centric and created in the curriculum itself to provide opportunities for the learner to explore, discover and experience areas or streams of interest in their profession.

It provides diverse opportunities to the students apart from the traditional learning process and creates a pathway for exploring and developing new fields of study

4.22.2 PURPOSE OF ELECTIVES

Customization: Elective courses allow students to tailor their educational experience to their interests, strengths, and career goals.

Diversification: Elective courses help students develop a well-rounded education by exposing them to a variety of subjects beyond their major or core requirements.

Specialization: Elective courses can also allow students to delve deeper into specific topics within their field of study.

Flexibility: Elective courses provide students to choose courses that fit their interests, learning style.

Personal growth: Elective courses can help students develop new skills, discover new passions, and grow both academically and personally.

4.22.3 OBJECTIVES

To provide an opportunity, where an undergraduate occupational therapy student can explore their interest in specialty areas, by working in hospital/ community setting.

To help the student in identifying his/her future career path by direct experiences in diverse areas as well as selecting their speciality areas in post graduate program. A direct individual experience will help in developing self-directed learning skills.

4.22.4 GUIDELINES FOR THE FORMATION OF ELECTIVES STRUCTURE

1. One month is designated for 2 elective fieldwork (2 weeks) after completion of the 3rd year University examination during the vacation period and before completion of 4th year University examinations.
2. It is mandatory for learners to do an elective. The elective time should not be used to make up for missed clinical postings, shortage of attendance or other purposes.
3. Elective 1 shall be done in any one of the areas relating to OT in musculoskeletal, Neurology, paediatrics area.
4. Elective 2 shall be done in any one of the areas relating to mental health, community based rehabilitation, geriatrics, onco rehabilitation and cardio-pulmonary rehabilitation. Both electives will be from a list of electives developed and available in the institution.
5. Institutions will develop their own electives with the supervisor's name, and the number of students in each elective based on the institution's available infrastructure and allocate electives to the students accordingly.
6. The student must submit a log book based on both the electives.Attendance in the electives should be minimum 85% and submission of log book maintained during elective postings is required for eligibility to appear in the 4th year university examination.
7. The salient features of each Elective and their differences are summarised in Table 4.2.

Table 4.2: Salient features of Elective 1 and Elective 2

	Elective 1	Elective 2
When	3rd year University examination during the vacation period and before completion of 4th year University examinations.	3rd year University examination during the vacation period and before completion of 4th year University examinations.
Duration	2 weeks	2 weeks
Focus of electives	OT in Musculoskeletal, Neurology and Paediatrics field	Mental health, community based rehabilitation, geriatrics, onco rehabilitation.
Nature of learning	Supervised Experiential Immersive Self-directed	Supervised Experiential Immersive Self-directed
Regular clinical postings	Will not be offered	Will not be offered
Attendance	Mandatory 85% attendance is required as a prerequisite to appear 4th year University examinations.	Mandatory 85% attendance is required as a prerequisite to appear 4th year University examinations.
Assessment	Formative Record of activities in log Book to be submitted as prerequisite to appear 4th year University examinations.	Formative Record of activities in log Book to be submitted as prerequisite to appear 4th year University examinations.
External institution in same city /Other city/ other state	To be decided by Institute	To be decided by Institute

4.22.4 PLANNING THE LEARNING EXPERIENCE

- The first step in the process is to plan the learning experience and having the diversity of electives, there will be some variation in the content, style and degree of learning.
- Steps for the institution to plan the elective modules:
- An identified preceptor responsible for guiding the student
- A pre-published timetable of activities identified for the learner during the elective
- List of learning resources for the learner to be used during the elective provision to be part of the team to obtain an immersive learning experience
- A well defined formative assessment with appropriate requirements for log book entry program evaluation by the stakeholders.
- Prerequisites, if any, to be completed before offering the elective by the institute

4.22.5 IDENTIFYING LEARNING EXPERIENCES

To ensure that there is an immersive learning experience and greater attention to the learner, each preceptor identified must be alloted with only a minimum number of students. Therefore, it is important to identify a sufficient number of preceptors and resources in the institute.

Students-initiated to select the elective posting from an external institute may be permitted as long as they do not violate institutional rules with prior permission from the respective University.

Examples of learning experiences for each of elective 1 and elective 2 in the template are found in Annexure 4.

Examples of elective 1 and elective 2 are provided in Table 4.3

Table 4.3 Example of Elective 1 and Elective 2.

Elective 1	Elective 2
Haemophillia Management	Barrier free environment (accessibility)
Sports Rehabilitation	Community-Based Rehabilitation
Cognitive Perceptual Rehabilitation	Day care center
PreSchool and School OT	Gericare
Diabetic Foot care	Virtual Reality
Advanced Pre-prosthetic and Prosthetic Management	Aqua Therapy
Early Intervention	Robotics
Sensory Integration Therapy	Driving Rehabilitation
Neurodevelopmental Therapy	Assistive Technology
Back School	Deaddiction
Hand therapy	Obesity Management
OT in Neonatology	Stress Management
Trauma care	Oncology Rehabilitation
Ergonomics in Hospital Set-Up	cardio-pulmonary rehabilitation

4.22.6 STUDENT COUNSELING AND ALLOCATION OF ELECTIVES

The list of available learning experiences for each elective and the names of preceptors for each should be available to students on the institutional notice board at least three months before the commencement of the electives. A process for submitting applications for both electives with choices should be made available to the students. Written information on each learning experience must be available for students to examine and make an informed choice.

A counselling session with faculty mentors to help students choose electives is desirable.

Students must also be made aware of the rules regarding attendance, work schedule, documentation and assessment requirements for each elective. The allocation of electives may be done based on student choice and availability of faculty who have been identified to be in-charge of the electives posting.

4.22.7 EXTERNAL INSTITUTIONS

The need to provide a broad diverse experience for students, institutions should have MOU with external institutions within the country to accommodate students for undertaking an elective experience in both elective 1 and elective 2.

There should not be any conflict with the rules and policies of the University Also institute preceptor or faculty who can liaise with the external preceptor will help to solve problems and ensure smooth conduct of the elective.

4.22.8 STUDENT SAFETY AND SECURITY:

During the Internal/external elective posting, safety and security of the student is of utmost importance. It must be made clear to the preceptors by the college authorities that students need to be supervised and must not be involved in patient care as the responsible health provider.

4.22.9 ASSESSMENT

Assessment will be formative. Attendance of not less than 85% and successful completion and the submission of logbook is a requirement for the student to become eligible to appear for the 4th year University examination.

Assessment elements could include participation in clinic/OPD, case records, submission of assignments, reflection on learning, preparation of presentations, design and participation in patient education programs, fabrication of splints etc whichever is appropriate.

4.22.10 Elective EVALUATION

Provision for evaluation of the program based on information from all stakeholders should be made in order to evaluate the effectiveness of the elective posting and need for modifications and improvement.

4.23. Compulsory Rotatory Internship (CRI)

4.23.1 Introduction:

After completing the 4 academic years of the program, 52 weeks (1year) full-time CRI is mandatory. Internship shall be part of the curriculum of the Bachelor of Occupational Therapy and shall be called "Compulsory Rotatory Internship".

4.23.2 Eligibility:

Those candidates declared to have passed the final year examination in all subjects will be eligible for CRI which should be done in any of the medical colleges/district hospitals/rehabilitation centres recognized by the affiliated university, shall be presumed to be training centres for the purpose of Internship.

4.23.3 Duration:

- ✓ Total duration- One year or twelve months (52 weeks which includes public holidays and causal leave)
- ✓ The intern shall have to work minimum 42 hours per week.
- ✓ Total number of clinical hours = 2016 hours
- ✓ Total number of credits allotted= 45 credits
- ✓ Maximum of 26 weeks may be allowed for the externship if opted by the student

Stipend:

Occupational Therapy interns should be paid a stipend during the internship at par with medical/dental interns.

The title during placement of internship would be Occupational Therapy "B.OT. Intern"

4.23.4 Objectives and skill-based outcome:

- ✓ To enhance skills of the students in OT evaluation, assessment, diagnosis, clinical reasoning, judgment, programme planning, intervention, outcome of intervention, follow up, referral, and documentation pertaining to all the dysfunctions and impairments learnt throughout the curriculum of four years.
- ✓ To acquire following: safety regulations regarding self and others throughout the occupational therapy process; identify safety hazards and implement safety procedures.
- ✓ Effective interaction with members involved in the Occupational Therapy practice like client, family & also make liaison with other professionals (Rehab Team)
- ✓ Learn to improve their presentation and communication skills
- ✓ Learn research-related skills through research related activities
- ✓ Demonstrate knowledge of various services covered under the various health insurance plans, Employee's state insurance corporation schemes, and community-based health insurance schemes for below poverty line clients and hospital-based health discount cards.

- ✓ Document occupational therapy services to ensure accountability of services provided and record treatment outcomes objectively.
- ✓ Understand the application of the occupational therapy consultative process with individual clients, groups, organizations or communities.
- ✓ Discharging the client from occupational therapy services when outcomes have been met which may involve summarizing outcomes, making appropriate referrals or recommendations & plan others discharge needs after discussing with the clinical OT supervisor.
- ✓ Develops, builds, and maintains rapport, trust, and ethical professional relationships through effective communication.
- ✓ Establishes and maintains inter-professional relationships, which foster effective client-centered collaboration.
- ✓ Understand the principles of continuous quality improvement.
- ✓ Be able to carry out the daily/weekly Quality Control (QC) checks.
- ✓ Be able to review the literature & present it in the journal club.
- ✓ Be able to suggest implementation of research findings.
- ✓ Be able to suggest/ initiate topics for Occupational Therapy research
- ✓ Be able to interpret, apply, and disseminate information as a member of the Occupational Therapy team.
- ✓ Emphasis will be laid on practical applications of theoretical concepts in the form of clinical reasoning, and its application to the treatment situations to guide clinical decision making from evaluation. The CRI should cover all clinical areas concerned with Occupational therapy for inpatient and outpatient services. The student will work under the supervision of the clinical supervisors, and is expected to be involved in all aspects of the occupational therapy process: referral, assessment, intervention, reimbursement, billing and documentation.

4.23.5 Areas of Clinical placement during CRI:

- ✓ During the period of internship the student shall be posted in rotation in the OPD & IPD facilities of the clinical departments of the hospitals of the institution/university.
- ✓ The hospitals must have separate Occupational Therapy department with qualified and registered Occupational Therapy professionals under NCAHP.

Table 4.5 Distribution of assignment period throughout the internship of 52 weeks:

S No	Departments of Occupational Therapy	Period
1	Orthopedics & sports clinic	8 weeks
2	Psychiatry	8 weeks
3	Neuro & Neurosurgery	8 weeks
4	Paediatrics & Neonatology	8 weeks
5	Burns, Hand & Plastic Surgery	6 weeks
6	Community based Rehabilitation	8 weeks
7	Oncology	2 weeks
8	General Medicine	2 weeks
9	General Surgery	2 weeks
10	Cardio- Pulmonary rehabilitation	2 weeks

Responsibilities during CRI:

- ✓ Students must engage in practice/ skill-based learning of professional conduct. Their learning outcomes must be maintained in the form of logbooks, case studies, Short Research project and symposium and seminar.

4.23.6 DOCUMENTATION

Initial Assessment Documentation: An intern must document the following information:

1) Based on SOAP format
2) Subjective examination (symptomatic)
3) Objective examination (measurable, observable)
4) Action/Analysis (interpretation of current condition/intervention provided)
5) Plan of action
6) Written or verbal feedback to the client or caregivers
7) Agreement to treatment plan by the patient or "person responsible"
8) Discharge plan

Progress Documentation:

It may include the following information:

- Any individual intervention should be documented in SOAP format (including response to intervention/s using outcome measures)
- Oral consent is obtained and documented when there is a significant change in treatment/ treatment options/ status
- Written consent obtained for designated invasive procedures Change in status or events that may affect discharge plans/goals
- Documented consultation with key clinical team members

4.23.7 Evaluation of interns:

Formative assessment will be done based on their satisfactory attendance, performance in the clinical areas/ short term research project , submission of the logbook, and presentation during symposium/seminar/case presentation.

The internship assessment weightage will be based on the following criteria:

- ✓ Log book -40%
- ✓ Presentation during Symposium/Seminar/case presentation – 30%
- ✓ Project work -20%
- ✓ Attendance- 10%

Table 4.6 EVALUATION OF interns during each clinical posting:

S. No.	Description	Satisfactory/ Unsatisfactory
1	Attendance	
2	Discipline and general behavior in the Department	
3	Approach to patients	
4	Inquisitiveness regarding the subject	
5	Knowledge about evaluation of conditions	
6	Knowledge about various therapeutic modalities	
7	Knowledge about actual application of therapeutic skills

4.24 "Competency-based Undergraduate Curriculum in Occupational Therapy

4.24.1 Practical Competencies for the Occupational Therapy Graduate

The Foundational Elements of Practice

- Adheres strictly to the Code of Ethics regulation by NCAHP.
- Ensures compliance with safety regulations and accurately reports incidents.
- Demonstrates a commitment to safety by proactively assessing risks and implementing preventive measures during Occupational Therapy intervention, ensuring the well-being of all individuals involved.

4.24.2 Clinical Competencies for the Occupational Therapy Graduate:

Assessment and analysis

- Adequately supports the evaluation process using a clear and logical rationale that considers client information, contexts, theories, frames of reference, and/or practice models.
- Acquires adequate and essential information from pertinent sources during the assessment procedure.
- Utilizes appropriate screening and assessment tools based on diverse factors.The client's occupational profile and occupational performance are determined by conducting interviews and utilizing other appropriate evaluation methods.
- Acknowledges that assessment involves evaluating and analyzing client factors and contexts that either facilitate or impede occupational performance.
- The accurate and efficient administration of assessments and surveys, both standardized and non-standardized, is conducted to ensure the validity and reliability of the findings.

- Modifies evaluation procedures based on client factors and contexts.
- Analyzes & interprets the client's strengths and challenges in occupational performance.
- Employs systematic methods to record the client's occupational performance for clear, accurate, and concise synthesis and documentation of the evaluation process and results

INTERVENTION

- The therapist effectively presents a coherent and rational justification for the intervention process, drawing upon evaluation findings, contextual factors, theories, frames of reference, practice models, and evidence.
- Formulates a client-centered plan that is accurate and appropriate based on the evaluation results, contexts, theories, frames of reference, and/or practice models.
- Decisions regarding interventions are based on research, evidences and relevant resources
- The individual chooses interventions that prioritize the client's needs and are based on their occupation, aiming to motivate and challenge them towards achieving predetermined goals that align with desired outcomes.
- Executes intervention plans that are client-centered and emphasize the importance of occupation.
- Selects and, when necessary, adjusts the intervention strategy in order to attain predetermined objectives that align with the desired outcomes.

NCAHP Since-2021

- Modifications are made to the task and/or environment in order to enhance the client's performance.
- Modifies the intervention plan and a determination is made regarding the need to continue or discontinue services based on the client's status.
- Documentation is used to illustrate the effectiveness of interventions by capturing the client's response to services.

Quality & patient safety

- Ensure that information is recorded in accordance with the latest laws, rules, ordinances, and
- customs of the State of India.
- Participate in systematic initiatives for quality assurance and improvement.
- Contribute to and/or engage in research and development within registered areas of expertise.
- Ensuring the safety of intervention recommendations and informing individuals about potential hazards, when necessary, is a crucial aspect of accountability.
- Establishes a safe environment for individuals, their families, and others, while also ensuring the proper upkeep of equipment used in occupational therapy treatments.
- Takes responsibility entails recognizing and documenting hazards and occurrences in healthcare and welfare settings, and subsequently undertaking actions to protect the safety and security of individuals.

MANAGEMENT OF OCCUPATIONAL THERAPY SERVICES

- The individual exhibits the capacity to collaborate with others and delegate suitable tasks, while retaining overall responsibility for treatment, as evidenced by practical application or discussion.
- Exhibits understanding of costs and funding systems associated with occupational therapy services, including federal, state, third party, and private payers, through practice or discussion.
- The individual displays a strong understanding of the organization.Meets the productivity standards or volume of work that occupational therapy students are expected to achieve.
- Provide supervision for students participating in occupational therapy training.
- Offer advisory support to official authorities, commercial enterprises, nonprofit organizations, and non-governmental entities.

COMMUNICATION AND PROFESSIONAL BEHAVIORS

- Exhibits the ability to communicate clearly and effectively, using both verbal and nonverbal methods.
- Guarantees the production of documentation that is both clear and precise.
- Engages in collaboration with fieldwork educator(s) to optimize the learning experience. e.g how one can initiate communication, seek feedback on performance,and identify their own strengths and challenges.
- The professional takes responsibility for developing professional competence by actively pursuing learning opportunities and collaborating with fieldwork educators and other professionals.

- Demonstrates the ability to promptly and constructively address feedback received.
- Demonstrates consistent adherence to acceptable work behaviors.
- Showcases proficient time management skills.
- Manages relationships effectively through therapeutic use of self and adjusts approach to meet the needs of clients and others.
- Demonstrates respect for diversity factors of others. Examples: culture, socioeconomic status, beliefs, identity

Sustainable Development

- Ensure the sustainable utilization of the existing resources in regards to the economy, society, and environment.

Disasters & crisis

- Engages in the activities conducted by specialized organizations established in response to significant accidents and disasters.
- Adapt their activities to the unique circumstances that arise during crises and catastrophic situations.
- Conducts risk assessments to identify potential crises and disasters that may affect vulnerable individuals, and implement measures to minimize the impact on their ability to engage in activities and participate.

Digital competencies

- Utilize digital platforms to conduct research, communicate, and engage professionally.
- Modify activities in accordance with the changes brought about by digitization in society.
- Highlight the opportunities and risks associated with digitalization for individual, group, and community engagement.
- Engage in the progression of digital systems, tools, and services that are significant to the profession.

4.24.3 Course-wise outcome :

It contains core course-wise outcomes so called "sub-competencies" that must be achieved at the end of instruction in that subject. These are organised in tables . The core course outcomes are in the first part. Outcomes (competencies) in each course are grouped according to topics number-wise. It is important to review the individual course outcomes (competencies) in the light of the topic outcomes as a whole. For each competency outlined the learning domains (Knowledge, Skill, Attitude, and Communication) are identified. The expected level of achievement in that subject is identified as – [knows (K), knows how (KH), shows how (SH), perform (P)]. As a rule, 'perform' indicates independent performance without supervision and is required rarely in the pre-internship period. The outcome is a core (Y - must achieve) or a non-core (N - desirable) outcome. Suggested learning and assessment methods (these are suggestions) and explanation of the terms used are given under the section "definitions used in this document". Last two columns indicate subjects within the same phase and other phases with which the topic can be taught - together - aligned (temporal coordination), shared, correlated or nested.

Section 3- understanding the competency table

A	B	C	D	E	F	G	H	I	J
No.	Competencies	Domain	K/KH/SH/P	Core	Suggested Teaching Learning Method	Suggested Assessment method	No. required tocertify (P)	Vertical Integration	Horizontal Integration
Physiology									
Summary Name of Topic: General Physiology Number of Competencies: (08)									
PY1.1	Describe the structure and functions of a	K	KH	Y	Lectures, Small group discussion	Written/Viva			Biochemistry
IM25.4	Elicit *document* and present a medical history that helps delineate the	S	SH	Y	Bed Side Clinic, DOAP	Skill assessment		Community Medicine	

Unique number of the competency

Description of competency

Identifies the domain

competency is core or

Identifies if the

no of times a skill needs to be done

Subject (s) in the same phase with which the

First two alphabets represent the subject (see list); number following alphabet reflects topic number, following period is a running number.

illustrative purposes only and should not be compared with the same in curriculum documents

Table 4.11 DOMAINS OF Learning

K	Knowledge
S	Skill
A	Attitude
C	Communication

Table 4.12 LEVELS OF COMPETENCIES

K	Knows	A knowledge attribute - Usually enumerates or describes
KH	Knows how	A higher level of knowledge - is able to discuss or analyze
S	Shows	A skill attribute: is able to identify or demonstrate the steps
SH	Shows how	A skill attribute: is able to interpret/ demonstrate a complex procedure requiring thought, knowledge and behavior
P	Performs (under supervision or independently)	Mastery for the level of competence - When done independently under supervision a pre-specified number of times - certification or capacity to perform independently results Mastery for the level of competence - When done independently under supervision a pre-specified number of times - certification or capacity to perform independently results

Table 4.13 Definitions used.

Section 4: Definitions used	
Lecture	Any instructional large group methodincluding traditional lecture and interactive lecture
Small group discussion	Any instructional method involving small groups of students in an appropriate learning context
DOAP (Demonstration- Observation - Assistance - Performance)	A practical session that allows the student to observe a demonstration, assist the performer, perform in a simulated environment, perform under supervision or perform independently
Skill Assessment	A session that assesses the skill of the student including those in the practical laboratory, skills lab, skills station that uses mannequins/ paper case/simulated patients/real patients as the context demand
Core(Y)	A competency that is necessary in order to complete the requirements of the subject (traditional must know)
Non -core(N)	A competency that is optional in order to complete the requirements of the subject (traditional nice (good) to know/ desirable to know)
National Guidelines	Health programs as relevant to the competency that are part of the National Health Program

4.24.4 Scheme of Examination:

1. Setting Question Paper will be done Section A and Section B (where ever applicable) in the Syllabus of annual pattern.
2. The examination of NUE Subjects will be at the college level and the students' needs to pass the college level examination with minimum 50% scoring before appearing for the University Examination. The marks/ grades of NUE subjects will not be added with University Marks but will be reflected in the Marks Sheet given by the University
3. Regular periodic examinations shall be conducted throughout the course. There shall be not less than 4 internal exams in annual pattern. Day to day records, attendance and log book should be given importance in CIA.
4. Learners must secure at least 50% marks of the total marks (theory and practical separetly) for CIA in a particular subject in order to be eligible for appearing at the final University examination of that subject

CIA (IA):

The final CIA marks shall be an average of all internal exams as below:

Annual pattern

For 100 marks course-

Institute have to conduct 2 periodical continuous CIA, one model examinations and converted into 30 marks for CIA.

For 50 marks course

Institute have to conduct 2 periodical continuous CIA, one model examinations and converted into 15 marks for CIA.

University Examination:

Mandatory 50% passing marks in theory and practical separately (practical = practical/clinical + viva)

(Theory= theory paper(s) only)

Continuous CIA (CIA) marks are not to be added to marks of the University examination and should be shown separately in the grade card

Table 4.14 Scheme of Examination for 50 marks course

Written		Eligibility/Passing Marks		Practicals		Eligibility/Passing Marks	
CIA	University exam	CIA	University exam	CIA	University exam	CIA	University exam
25	50	13	25	25	50	13	25

स्वास्थ्यम् सर्वार्थसाधनम्
NCAHP
Since-2021

Table 4.15 The CIA will be based on the following criteria -

Theory			Practical/Viva		
Written	Attendance Quiz/ Seminar/ Logbook/ Open book test/ Surprise test/ Capstone project, etc	Total	Practical	Clinical attendance/ Assignments/ Journals/Clinical Training card/Capstone Project/ Case presentations, etc	Total
15	10	25	15	10	25

For a candidate who fails in a subject(s), his/ her marks of CIA will be carried forward

Table 4.16 Scheme of Examination for 100 marks course

Written		Eligibility/Passing Marks		Practical		Eligibility/Passing Marks	
CIA	University exam	CIA	University exam	CIA	University exam	CIA	University exam
50	100	25	50	50	100	25	50

Table 4.17 The CIA will be based on the following criteria -

Theory			Practical/Viva		
Written	Attendance Quiz/ Seminar/ Logbook/ Open book test/ Surprise test/ Capstone project, etc	Total	Practical	Clinical attendance/ Assignments/ Journals/Clinical Training card/Capstone Project/ Case presentations, etc	Total
30	20	50	30	20	50

For a candidate who fails in a university examinations, his/ her marks of CIA will be carried forward

The results of CIA should be displayed on the notice board within a 2 weeks of the test. Universities shall guide the colleges regarding formulating policies for remedial measures for students who are either not able to score qualifying marks or have missed on some assessments due to any reason.

Summative assessment consists of University examinations. Each theory paper and practical will have 100 marks or 50 marks. It is mandatory to secure 50% marks in theory and practical separately (practical = practical/ clinical + viva) [theory=theory paper(s) only] is required to pass in the university examination.

स्वास्थ्यम् सर्वार्थसाधनम्
NCAHP
Since-2021

4.24.5 Designing of question paper

Designing of question paper should take into consideration all levels of knowledge domain e.g. Bloom's taxonomy of cognitive domain. Use appropriate verbs for the questions at each level to assess higher levels of learning. An example is given below in Table. Use combination of various types of questions e.g. structured essays (Long Answer Questions - LAQ), Short Answers Questions (SAQ) and objective type questions (e.g. Multiple Choice Questions - MCQ). Marks for each part should be indicated separately. MCQ should not have more than 20% weightage

Scheme of Marks for University Theory exam 100 Marks

MCQs, Short answer questions , Brief answer questions and Long answer Questions

Scheme of Marks for University Theory exam 50 Marks

MCQs, Short answer questions , Brief answer questions .

The question paper should be evenly distributed to cover all the sections appropriately from competencies. The blueprint grid can help the paper setters to balance the question papers in content related aspects as depicted below in Table. Moderation of theory question paper by subject expert may be arranged by Universities.

Weightage

Bloom's Taxonomy helps educators create learning goals that cover a range of skills, from basic recall to critical thinking and problem-solving. The six hierarchical levels representing cognitive skills are depicted with their weighted percentage for effective learning experience for effective learning experience for Occupational Therapy students as described below in the table:

Table 4.18 of "Weightage of Levels of Taxonomy" for effective learning experience for BOT Graduates

Level	Total
Remember	20%
Understands	20%
Analyze	20%
Application	20%
Evaluate	10%
Create	10%

स्वास्थ्यम सर्वार्थसाधनम्
NCAHP
Since-2021

4.24.6 PRACTICAL/CLINICAL EXAMINATION

Include assessment in the psychomotor and affective domain. Assessment of clinical and procedural skills should be based on direct observations by the examiners.

Assessment tools like case presentations, Objective Structured Clinical Examination (OSPE OSCE and/or Objective Structured Practical Examination (OSPE) and Directly Observed Procedural Skills (DOPS) should be employed using checklists.

Practical/clinical examinations will be conducted in the laboratories and /or hospital wards/ OPD. Viva/oral examination should assess the approach to patient management, emergencies, and attitudinal, ethical, and professional values.

Practical examination should be conducted by pair of examiners (one internal from same university and one external from another university) only and not by a single examiner / examiners of same university

Summative assessment (For Universities)

Summative assessment consists of university examinations for various subjects is given in Table 4.19.

HUMAN ANATOMY

COURSE DESCRIPTION: For first year BOT students this course gives the detail knowledge about the cells, different systems such as musculoskeletal, cardiovascular, pulmonary, digestive , Nervous also the functional anatomy of various systems

Course Goals : Give the detailed knowledge of Human structure ,body functions ,anatomical orientation of different systems .The knowledge about cardiovascular & circulatory system, cell functions ,the detail skeletal system & muscular system

Course Objectives

KNOWLEDGE

Student will be able to

1. Gain knowledge of human body's structure and function
2. Understand normal anatomical position, various planes, relation, comparison, laterality & movement in our body
3. Know different types of cells and describe their functions
4. Describe the major components of the skeletal system and describe their functions, different types of bones and provide an example of each type
5. Learn and identify the major components of the integumentary system and their functions.
6. Differentiate types of bones and provide an example of each type.
7. Learn and identify the three types of muscle and the muscular system's functions.
8. Learn and identify the major components of the digestive, circulatory, respiratory, endocrine, reproductive & urinary system and their functions.
9. Learn and explain the major components of the nervous system and their functions

SKILL

1. Identify or recognize various muscle tissues, bones and organs of the body
2. Identify the parts of the brain and other organs of the body.
3. Recognize the importance of an in-depth knowledge of the topics consistent with a proper medical education.
4. Identify the fundamental role of a proper theoretic knowledge of the subject in the clinical practice.
5. Identify the possible use of the acknowledged skills in the future career.
6. Assess the importance of the acquired knowledge in the overall medical education process.

ATTITUDE

1. Knowledge of anatomy will help to communicate with the clients and peers efficiently

Scheme of examination for University Practical exam 100 Marks

Competency Table: Human Anatomy

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
HUMAN ANATOMY								
TOPIC: ANATOMICAL TERMINOLOGY NUMBER OF COMPETENCIES: (2)								
AN 1.1	Demonstrate normal anatomical position, various planes, relation, comparison, laterality & movement in our body	K, S	SH	Y	Lecture, DOAP session	Written/ Viva voce/skills assessment		
AN 1.2	Describe composition of bone and bone marrow	K	KH	Y	Lecture	Written/ Viva voce		
TOPIC: GENERAL FEATURES OF BONES & JOINTS NUMBER OF COMPETENCIES: (6)								
AN 2.1	Describe parts, blood and nerve supply of a long bone	K	K	Y	Lecture	Written		
AN 2.2	Enumerate laws of ossification	K	K	Y	Lecture	Written		
AN 2.3	Enumerate special features of a sesamoid bone	K	K, KH	Y	Lecture, DOAP	Written		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
AN 2.4	Describe various types of cartilage with its structure & distribution in body	K	K		Lecture, DOAP	Written		
AN 2.5	Describe various joints with subtypes and examples	K	K, KH		Lecture, DOAP	Written		
AN 2.6	Explain the concept of nerve supply of joints & Hilton's law	K	K, KH		Lecture, DOAP	Written		
TOPIC: GENERAL FEATURES OF MUSCLE NUMBER OF COMPETENCIES: (2)								
AN 3.1	Classify muscle tissue according to structure & action	K	KH	Y	Lecture	Written, Viva voce		
AN 3.2	Enumerate parts of skeletal muscle and differentiate between tendons and aponeuroses with examples	K	KH	Y	Lecture	Written, Viva voce		
TOPIC: GENERAL FEATURES OF SKIN AND FASCIA NUMBER OF COMPETENCIES: (3)								
AN 4.1	Describe different types of skin & dermatomes in body	K	KH	N	Lecture, DOAP session	Written	OTDP II	
AN 4.2	Describe structure & function of skin with its appendages	K	H	Y	Lecture, DOAP session	Written, Viva voce		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
AN 4.3	Describe superficial fascia along with fat distribution in body	K	KH	Y	Lecture, DOAP session	Written, Viva voce		
Topic: General features of the cardiovascular system & Circulatory system Number of competencies: (9)								
AN 5.1	Differentiate between blood vascular and lymphatic system	K	KH	Y	Lecture	Written, Viva voce		
AN 5.2	Differentiate between pulmonary and systemic circulation	K	KH	Y	Lecture	Written, Viva voce		
AN 5.3	List general differences between arteries & veins	K	KH	Y	Lecture	Written, Viva voce		
AN 5.4	Explain functional difference between elastic, muscular arteries and arterioles	K	KH	Y	Lecture	Written, Viva voce		
AN 5.5	Describe portal system giving examples	K	KH	Y	Lecture	Written, Viva voce		
AN 5.6	Describe the concept of anastomoses and collateral circulation with significance of end-arteries	K	KH	Y	Lecture	Written, Viva voce		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
AN 5.7	Explain function of meta-arterioles, precapillary sphincters, arterio-venous anastomoses	K	KH	N	Lecture	Written		
AN 5.8	Define thrombosis, infarction & aneurysm	K	KH	N	Lecture	Written		
AN 5.9	Describe the types of circulation and its importance, classification of vessels (anatomical and physiological) Structure of blood vessels. Factors affecting venous return. anastomosis, end arterie. Pulmonary and systemic circulation, define portal circulation with examples							
Topic: General Features of lymphatic system Number of competencies: (3)								
AN 6.1	List the components and functions of the lymphatic system	K	KH	N	Lecture	Written		
AN 6.2	Describe structure of lymph capillaries & mechanism of lymph circulation	K	KH	N	Lecture	Written		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
AN 6.3	Explain the concept of lymphoedema and spread of tumors via lymphatics and venous system	K	KH	N	Lecture	Written		
Features of individual bones (Upper Limb) **Number of competencies: (6)**								
AN 7.1	Identify the given bone, its side, important features & keep it in anatomical position	K, S	SH	Y	DOAP session	Viva voce, Practicals/, OSPE		
AN 7.2	Identify & describe joints formed by the given bone	K, S	SH	Y	Lecture, DOAP session	Viva voce		
AN 7.3	Enumerate peculiarities of clavicle	K	KH	Y	Lecture, DOAP session	Viva voce		
AN 7.4	Demonstrate important muscle attachment on the given bone	K, S	SH	Y	Practical, DOAP session, Small group teaching	Viva voce, Practicals	Orthopaedics	
AN 7.5	Identify and name various bones in articulated hand, Specify the parts of metacarpals and phalanges and enumerate the peculiarities of pisiform	K, S	SH	Y	Practical, DOAP session, Small group teaching	Viva voce, Practicals		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
AN 7.6	Describe scaphoid fracture and explain the anatomical basis of avascularnecrosis	K	KH	N	DOAP session	Viva voce		
Topic: Upper Limb regions-Shoulder, Axilla, Arm		**No of Competencies -20**						
AN 8.1	Describe attachment, nerve supply & action of pectoralis major and pectoralis minor	K	KH	Y	Lecture, Practical	Written	Biomechanics & Kinesiology	FOT I
AN 8.2	Breast: Describe the location, extent, deep relations, structure, age changes, blood supply, lymphatic drainage, microanatomy and applied anatomy of breast	K	KH	Y	Practical, Lecture	Written, Viva voce		
AN 8.3	Describe development of breast	K	KH	N	Lecture	Written		
AN 8.4	Identify & describe boundaries and contents of axilla	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP Session	Written, Viva voce		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
AN 8.5	Identify, describe and demonstrate the origin, extent, course, parts, relations and branches of axillary artery & tributaries of vein	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session	Written, Viva voce, skill assessment		
AN 8.6	Describe, identify and demonstrate formation, branches, relations, area of supply of branches, course and relations of terminal branches of brachial plexus	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session	Written, Viva voce, skill assessment		
AN 8.7	Explain variations in formation of brachial plexus	K	KH	Y	Practical, Lecture	Written, Viva voce		
AN 8.8	Explain the anatomical basis of clinical features of Erb's palsy and Klumpke's paralysis	K	KH	N	Lecture	Written		
AN 8.9	Explain anatomical basis of enlarged axillary lymph nodes	K	KH	N	Lecture	Written		
AN 8.10	Describe, identify and demonstrate the position, attachment, nerve supply and actions of trapezius and latissimus dorsi	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP Session	Written, Viva voce, skill assessment		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
AN 8.11	Describe the arterial anastomosis around the scapula and mention the boundaries of triangle of auscultation	K	KH	N	Lecture	Written		
AN 8.12	Describe and identify the deltoid and rotator cuff muscles	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session	Written, Viva voce, skill assessment		
AN 8.13	Describe & demonstrate attachment of serratus anterior with its action	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session	Written/ Viva voce/skill assessment		
AN 8.14	Describe and demonstrate shoulder joint for– type, articular surfaces, capsule, synovial membrane, ligaments, relations, movements, muscles involved, blood supply, nerve supply and applied anatomy	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session	Written/ Viva voce/skill assessment		
AN 8.15	Explain anatomical basis of Injury to axillary nerve during intramuscular injections	K	KH	N	Lecture	Viva voce		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
AN 8.16	Describe and demonstrate muscle groups of upper arm with emphasis on biceps and triceps brachii	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session	Written, Viva voce, skill assessment		
AN 8.17	Identify & describe origin, course, relations, branches (or tributaries), termination of important nerves and vessels in arm	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session	Written, Viva voce, skill assessment		
AN 8.18	Describe the anatomical basis of Saturday night paralysis	K	KH	Y	Practical, Lecture	Written, Viva voce	Plastic surgery, OTSC, Orthopaedics	
AN 8.19	Identify & describe boundaries and contents of cubital fossa	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session	Written, Viva voce, skill assessment		
AN 8.20	Describe the anastomosis around the elbow joint	K	KH	N	Lecture	Written		

NCAHP Since-2021

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
Topic: Upper limb regions -Forearm & Hand No of competencies -21								
AN 9.1	Describe and demonstrate important muscle groups of ventral forearm with attachments, nerve supply and actions	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session			
AN 9.2	Identify & describe origin, course, relations, branches (or tributaries), termination of important nerves and vessels of forearm	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session			
AN 9.3	Identify & describe flexor retinaculum with its attachments	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session			
AN 9.4	Explain anatomical basis of carpal tunnel syndrome	K	KH	Y	Lecture			
AN 9.5	Identify & describe small muscles of hand. Also describe movements of thumb and muscles involved	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session			

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
AN 9.6	Describe & demonstrate movements of thumb and muscles involved	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session			
AN 9.7	Identify & describe course and branches of important blood vessels and nerves in hand	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session			
AN 9.8	Describe anatomical basis of Claw hand	K	KH	Y	Lecture			
AN 9.9	Identify & describe fibrous flexor sheaths, ulnar bursa, radial bursa and digital synovial sheaths	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session			
AN 9.10	Identify, describe and demonstrate important muscle groups of dorsal forearm with attachments, nerve supply and actions	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session			

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
AN 9.11	Identify & describe origin, course, relations, branches (or tributaries), termination of important nerves and vessels of back of forearm	K/S	SH	Y	Practical, Lecture, Small group discussion DOAP session			
AN 9.12	Describe the anatomical basis of Wrist drop	K	KH	Y	Lecture			
AN 9.13	Identify & describe compartments deep to extensor retinaculum	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session			
AN 9.14	Identify & describe extensor expansion formation	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session			
AN 9.15	Describe and explain Fascia of upper limb and compartments, veins of upper limb and its lymphatic drainage	K	KH	Y	Lecture			
AN 9.16	Describe dermatomes of upper limb	K	KH	N	Lecture			

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
AN 9.17	Identify & describe the type, articular surfaces, capsule, synovial membrane, ligaments, relations, movements, blood and nerve supply of elbow joint, proximal and distal radio- ulnar joints, wrist joint & first carpometacarpal joint	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session			
AN 9.18	Describe Sternoclavicular joint, Acromioclavicular joint, Carpometacarpal joints & Metacarpophalangeal joint	K	KH	N	Lecture			
AN 9.19	Identify the bones and joints of upper limb seen in anteroposterior and lateral view radiographs of shoulder region, arm, elbow, forearm and hand	K/S	SH	Y	Practical, Small group discussion, DOAP session			
AN 9.20	Identify & demonstrate important bony landmarks of upper limb: Jugular notch, sternal angle, acromial angle, spine of the scapula, vertebral level of the medial end, Inferior angle of the scapula	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session			

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
AN 9.21	Identify & demonstrate surface projection of: Cephalic and basilic vein, Palpation of Brachial artery, Radial artery, Testing of muscles: Trapezius, pectoralis major, serratus anterior, latissimus dorsi, deltoid, biceps brachii, Brachioradialis	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session			
Topic – Thoracic cage No of Competencies-7								
AN 10.1	Identify and describe the salient features of sternum, typical rib, Ist rib andtypical thoracic vertebra	K/S	SH	Y	Lecture, DOAP sessi0n	Viva voce/ skill assessment	Orthopaedics	
AN 10.2	Identify & describe the features of 2nd, 11th and 12th ribs, 1st, 11th and 12ththoracic vertebrae	K/S	SH	N	Lecture, DOAP session	Viva voce/ skill assessment		
AN 10.3	Describe & demonstrate the boundaries of thoracic inlet, cavity and outlet	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session	Written/ Viva voce/skill assessment		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
AN 10.4	Describe & demonstrate extent, attachments, direction of fibres, nerve supply and actions of intercostal muscles	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session	Written/ Viva voce/skill assessment		
AN 10.5	Describe & demonstrate mechanics and types of respiration	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session	Written/ Viva voce/skill assessment		
AN 10.6	Describe costochondral and interchondral joints	K	KH	N	Lecture	Written		
AN 10.7	Mention boundaries and contents of the superior, anterior, middle and posterior mediastinum	K	KH	Y	Practical, Lecture	Written/ Viva voce		
Topic – Heart , pericardium, Mediastinum			**No of Competencies-7**					
AN 11.1	Describe & demonstrate subdivisions, sinuses in pericardium, blood supply and nerve supply of pericardium	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session	Written/ Viva voce/skill assessment	Medicine, OTMC	

स्वास्थ्यम सर्वार्थसाधनम

स्वास्थ्य देखभाल

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
AN 11.2	Describe & demonstrate external and internal features of each chamber of heart	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session	Written/ Viva voce/skill assessment		
AN 11.3	Describe & demonstrate origin, course and branches of coronary arteries	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session	Written/ Viva voce/OSPE		
AN 11.4	Describe anatomical basis of ischaemic heart disease	K	KH	Y	Lecture	Written/ Viva voce		
AN 11.5	Describe & demonstrate the formation,course, tributaries and termination of coronary sinus	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session	Written/ Viva voce/OSPE		
AN 11.6	Mention the parts, position and arterial supply of the conducting system of heart	K	KH	Y	Lecture	Written		
AN 11.7	Describe & demonstrate the external appearance, relations, blood supply, nerve supply, lymphatic drainage and applied anatomy of oesophagus	K/S	SH	Y	Practical, Lecture, DOAP session	Written/ Viva voce/OSPE		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
Topic Lungs &Trachea No of Competencies-6								
AN 12.1	Mention the blood supply, lymphatic drainage and nerve supply of pleura, extent of pleura and describe the pleural recesses and their applied anatomy	K	KH	Y	Practical, Lecture	Written/ Viva voce		Medicine, OTMC
AN 12.2	Identify side, external features and relations of structures which form root of lung & bronchial tree and their clinical correlate	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session	Written/ Viva voce/OSPE		
AN 12.3	Describe a bronchopulmonary segment	K	KH	Y	Lecture	Written/ Viva voce		
AN 12.4	Identify phrenic nerve & Describe its formation & distribution	K/S	SH	Y	Lecture, Practical	Written/ Viva voce		
AN 12.5	Mention the blood supply, lymphatic drainage and nerve supply of lungs	K	KH	Y	Lecture	Written/ Viva voce		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
AN 12.6	Describe the extent, length, relations, blood supply, lymphatic drainage and nerve supply of trachea	K	KH	N	Lecture	Written		
Topic: Radiological Anatomy Number of competencies: 2								
AN 13.1	Understand Various imaging techniques with Principles of plain radiograms and CT scan, Ultrasonography,	K	KH	N	Lecture	Written		
AN 13.2	Bones and joints seen in AP and lateral view radiographs of shoulder, elbow, wrist joints & hand	K	KH	N	Lecture	Written	Orthopaedics	
Features of individual bones (Lower Limb) No of Competencies-3								
AN 14.1	Identify the given bone, its side, important features & keep it in anatomical position	K/S	SH	Y	DOAP session	Viva voce		
AN 14.2	Identify & describe joints formed by the given bone	K/S	SH	Y	Lecture, DOAP session	Viva voce		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
AN 14.3	Describe the importance of ossification of lower end of femur & upper end of tibia	K	KH	Y	Lecture	Viva voce/ Practicals	Medicine, Orthopaedics	
Topic-- Lower limb Region - Thigh		**No of competencies - 11**						
AN 15.1	Describe and demonstrate the type, articular surfaces, capsule, synovial membrane, ligaments, relations, movements and muscles involved, blood and nerve supply, bursae around the hip joint	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session	Written/ Viva voce/skill assessment		
AN 15.2	Describe and demonstrate origin, course, relations, branches (or tributaries), termination of important nerves and vessels of anterior, medial & gluteal region of thigh	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session	Written/ Viva voce/skill assessment		
AN 15.3	Describe and demonstrate major muscles with their attachment, nerve supply and actions	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session	Written/ Viva voce/skill assessment		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
AN 15.4	Describe and demonstrate boundaries, floor, roof and contents of femoral triangle	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP	Written/ Viva voce/skill assessment		
AN 15.5	Describe anatomical basis of sciatic nerve injury during gluteal intramuscular injections	K	KH	Y	Lecture, DOAP session	Written/ Viva voce		
AN 15.6	Explain the anatomical basis of Trendelenburg sign	K	KH	Y	Lecture, DOAP session	Written/ Viva voce		
AN 15.7	Describe and demonstrate the hamstrings group of muscles with their attachment, nerve supply and actions	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session	Written/ Viva voce/skill assessment		
AN 15.8	Describe and demonstrate the boundaries, roof, floor, contents and relations of popliteal fossa	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP Session	Written/ Viva voce/skill assessment		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
AN 15.9	Describe and demonstrate the type, articular surfaces, capsule, synovial membrane, ligaments, relations, movements and muscles involved, blood and nerve supply, bursae around the hip joint	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session	Written/ Viva voce/skill assessment		
AN 15.10	Describe anatomical basis of complications of fracture neck of femur	K	KH	N	Lecture	Written/ Viva voce		
AN 15.11	Describe dislocation of hip joint and surgical hip replacement	K	KH	N	Lecture	Written/ Viva voce		
Topic - Lower limb Region -Knee, Leg & Foot No of competencies - 16								
AN 16.1	Describe and demonstrate major muscles of anterolateral compartment ofleg with their attachment, nerve supply and actions	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session	Written/ Viva voce/skill assessment	Orthopaedics	

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
AN 16.2	Describe and demonstrate origin, course, relations, branches (or tributaries), termination of important nerves and vessels of of leg	K/S	SH	Y	Practical, Lecture, Small group discussion,	Written/ Viva voce/skill assessment		
AN 16.3	Explain the anatomical basis of foot drop	K	KH	Y	Lecture,	Written/ Viva voce	OTSC, Surgery	
AN 16.4	Describe and demonstrate the type, articular surfaces, capsule, synovial membrane, ligaments, relations, movements and muscles involved, blood and nerve supply, bursae around the knee joint	K/S	SH	Y	Practical, Lecture, Small group discussion,	Written/ Viva voce/skill assessment		
AN 16.5	Explain the anatomical basis of locking and unlocking of the knee joint	K	KH	Y	Small Group teaching	Written/ Viva voce		
AN 16.6	Describe knee joint injuries with its applied anatomy	K	KH	N	Lecture	Written/ Viva voce		
AN 16.7	Explain anatomical basis of Osteoarthritis	K	KH	N	Lecture	Written/ Viva voce	Orthopaedics ,OTSC	
AN 16.8	Explain the anatomical basis of rupture of calcaneal tendon	K	KH	N	Lecture	Written/ Viva voce		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
AN 16.9	Describe factors maintaining importance arches of the foot with its importance	K	KH	Y	Lecture	Written/ Viva voce		
AN 16.10	Explain the anatomical basis of Flat foot & Club foot	K	KH	N	Lecture	Written/ Viva voce		
AN 16.11	Explain the anatomical basis of Metatarsalgia & Plantar fasciitis	K	KH	N	Lecture	Written/ Viva voce		
AN 16.12	Describe and demonstrate the type, articular surfaces, capsule, synovial membrane, ligaments, relations, movements and muscles involved, blood and nerve supply of tibiofibular and ankle joint	K/S	SH	Y	Practical, Lecture, Small group discussion,	Written/ Viva voce/skill assessment		
AN 16.13	Describe the subtalar and transverse tarsal joints	K	KH	N	Lecture	Written/ Viva voce		
AN 16.14	Describe and demonstrate Fascia lata, Venous drainage, Lymphatic drainage, Retinacula & Dermatomes of lower limb	K	KH	Y	Lecture, Small group discussion, DOAP session	Written/ Viva voce/OSPE		
AN 16.15	Explain anatomical basis of varicose veins and deep vein thrombosis	K	KH	Y	Lecture	Written/ Viva voce		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
AN 16.16	Identify & demonstrate important bony landmarks of lower limb: -Vertebral levels of highest point of iliac crest, posterior superior iliac spines, iliac tubercle, pubic tubercle, ischial tuberosity, adductor tubercle, -Tibial tuberosity, head of fibula, -Medial and lateral malleoli, Condyles of femur and tibia, sustentaculum tali, tuberosity of fifth metatarsal, tuberosity of the navicular	K/S	SH	Y	Practical, Lecture, Small group discussion	Viva voce/ OSPE		
Topic--Face, Scalp, neck No of Competencies-13								
AN 17.1	Demonstrate anatomical position of skull, Identify and locate individual skull bones in skull	K/S	SH	Y	Lecture,	Viva voce/ skill assessment	Medicine ,Surgery	

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
AN 17.2	Describe features of typical and atypical cervical vertebrae (atlas and axis)	K/S	SH	Y	Lecture,	Viva voce/ skill assessment		
AN 17.3	Describe the features of the 7th cervical vertebra	K/S	SH	N	DOAP session	Viva voce		
AN 17.4	Describe & demonstrate muscles of facial expression and their nerve supply	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session	Written/ Viva voce/skill assessment		
AN 17.5	Describe sensory innervation of face	K	KH	Y	Practical, Lecture	Written/ Viva voce		
AN 17.6	Describe & demonstrate origin /formation, course, branches /tributaries of facial vessels	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session	Written/ Viva voce/skill assessment		
AN 17.7	Describe & demonstrate branches of facial nerve with distribution	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session	Written/ Viva voce/skill assessment OSPE		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
AN 17.8	Identify superficial muscles of face, their nerve supply and actions of facial muscles	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session	Written/ Viva voce/skill assessment		
AN 17.9	Explain the anatomical basis of facial nerve palsy	K	KH	Y	Lecture	Written		
AN 17.10	Describe & demonstrate attachments, nerve supply, relations and actions of sternocleidomastoid	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session	Written/ Viva voce/skill assessment		
AN 17.11	Explain anatomical basis of Erb's & Klumpke's palsy	K	KH	Y	Lecture	Written	Surgery, OTSC	
AN 17.12	Explain anatomical basis of wry neck	K	KH	N	Lecture	Written		
AN 17.13	Describe & demonstrate attachments of 1) inferior belly of omohyoid, 2) scalenus anterior, 3) scalenus medius & 4) levator scapulae	K/S	SH	N	Lecture, Practical	Written/ Viva voce		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
Topic-Facial region No of Competencies-10								
AN 18.1	Describe & identify extra ocular muscles of eyeball	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session	Written/ Viva voce/skill assessment	Surgery	
AN 18.2	Describe & demonstrate nerves and vessels in the orbit	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session	Written/ Viva voce/skill assessment		
AN 18.3	Describe anatomical basis of Horner's syndrome	K	KH	N	Lecture	Written		
AN 18.4	Explain the anatomical basis of oculomotor, trochlear and abducent nerve palsies along with strabismus	K	KH	Y	Lecture	Written		
AN 18.5	Describe & demonstrate attachments, direction of fibres, nerve supply and actions of muscles of mastication	K/S	SH	Y	Practical, Lecture, Small group discussion,	Written/ Viva voce/skill assessment		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
AN 18.6	Describe & demonstrate articulating surface, type & movements of temporomandibular joint	K/S	SH	Y	Practical, Lecture, Small group discussion,	Written/ Viva voce/skill assessment		
AN 18.7	Explain the clinical significance of pterygoid venous plexus	K	KH	Y	Lecture	Written		
AN 18.8	Describe the features of dislocation of temporomandibular joint	K	KH	N	Lecture	Written		
AN 18.9	Describe & demonstrate the morphology, relations and nerve supply of submandibular salivary gland & submandibular ganglion	K/S	SH	Y	Practical, Lecture, Small group discussion,	Written/ Viva voce/		
AN 18.10	Describe the basis of formation of submandibular stones	K	KH	N	Lecture	Written		
Topic _-Vertebral column, Spinal Cord No of Competencies - 17								
AN 18.1	Describe the parts, extent, attachments, modifications of deep cervicalfascia	K	KH	Y	Lecture	Written		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
AN 18.2	Describe & demonstrate location, parts, borders, surfaces, relations & blood supply of thyroid gland	K/S	KH	Y	Practical, Lecture, Small group discussion,	Written/ Viva voce		
AN 18.3	Demonstrate & describe the origin, parts, course & branches subclavianartery	K/S	KH	Y	Practical, Lecture, Small group discussion,	Written/ Viva voce/	Surgery, Orthopedics	
AN 18.4	Describe & demonstrate origin, course, relations, tributaries and termination of internal jugular & brachiocephalic veins	K/S	SH	Y	Practical, Lecture, Small group discussion	Written/ Viva voce/		
AN 18.5	Describe the course and branches of IX, X, XI & XII nerve in the neck	K	KH	Y	Lecture	Written		
AN 18.6	Describe the anatomically relevant clinical features of Thyroid swellings	K	KH	N	Lecture	Written		
AN 18.7	Describe the clinical features of compression of subclavian artery and lower trunk of brachial plexus by cervical rib	K	KH		Lecture	Written		

NCAHP Since-2021

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
AN 18.8	Describe the contents of the vertebral canal	K/S	SH	Y	Practical, Lecture, Small group discussion,	Written/ Viva voce/skill assessment		
AN 18.9	Describe the boundaries and contents of Suboccipital triangle	K	KH	Y	Practical, Lecture, Small group discussion,	Written/ Viva voce/skill assessment		
AN 18.10	Describe the curvatures of the vertebral column	K	KH	Y	Lecture	Written/ Viva voce		
AN 18.11	Describe & demonstrate the type, articular ends, ligaments and movements of Intervertebral joints, Sacroiliac joints & Pubic symphysis	K/S	SH	Y	Practical, Lecture, Small group discussion,	Written/ Viva voc/eOSPE		
AN 18.12	Explain the anatomical basis of Scoliosis, Lordosis, Prolapsed disc, Spondylolisthesis & Spina bifida	K	KH	N	Lecture	Written		
AN 18.13	Identify external features of spinal cord	K/S	SH	Y	Practical, Lecture, Small group discussion,	Written/ Viva voce/	OTOC, OTNC	

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
AN 18.14	Describe extent of spinal cord in child & adult with its clinical implication	K	KH	Y	Lecture	Written/ Viva voce		
AN 18.15	Draw & label transverse section of spinal cord at mid- cervical & mid- thoracic level	K	KH	Y	Lecture	Written/ Viva voce		
AN 18.16	Enumerate ascending & descending tracts at mid thoracic level of spinal cord	K	KH	Y	Lecture	Written/ Viva voce		
AN 18.17	Describe anatomical basis of syringomyelia	K	KH	N	Lecture	Written	OTNC, Neurology	
Topic- BrainNo of Competencies- 21								
AN 19.1	Identify external features of medulla oblongata	K/S	SH	Y	Lecture, AP session	itten/ Viva voce	Neurology, OTNC	
AN 19.2	Describe transverse section of medulla oblongata at the level of 1) Pyramidal decussation, 2) Sensory decussation 3) ION	K	KH	Y	Lecture	itten/ Viva voce		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
AN 19.3	Enumerate cranial nerve nuclei in medulla oblongata with their functionalgroup	K	KH	Y	Lecture	Written/ Viva voce		
AN 19.4	Describe anatomical basis & effects of medial & lateral medullary syndrome	K	KH	N	Lecture	Written		
AN 19.5	Identify external features of pons	K/S	SH	Y	Lecture, DOAP session	Written/ Viva voce/		
AN 19.6	Draw & label transverse section of pons at the upper and lower level	K	KH	Y	Lecture	Written/ Viva voce		
AN 19.7	Enumerate cranial nerve nuclei in pons with their functional group	K	KH	Y	Lecture	Written/ Viva voce		
AN 19.8	Describe & demonstrate external & internal features of cerebellum	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP	Written/ Viva voce/		
AN 19.9	Describe connections of Cerebellar cortex and intracerebellar nuclei	K	KH	Y	Lecture	Written/ Viva voce/		
AN 19.10	Describe anatomical basis of cerebellar dysfunction	K	KH	N	Lecture	Written		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
AN 19.11	Identify external & internal features of midbrain	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session	Written/ Viva voce/skill assessment		
AN 19.12	Describe internal features of midbrain at the level of superior & inferior colliculus	K	KH	Y	Lecture	Written/ Viva voce		
AN 19.13	Describe anatomical basis & effects of Benedikt's and Weber's syndrome	K	KH	N	Lecture	Written		
AN 19.14	Enumerate cranial nerve nuclei with its functional component	K	KH	Y	Lecture	Written/ Viva voce	Neurology, OTNC	
AN 19.15	Describe & demonstrate surfaces, sulci, gyri, poles, & functional areas of cerebral hemisphere	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session	Written/ Viva voce/skill assessment		
AN 19.16	Describe the white matter of cerebrum	K	KH	Y	Lecture	Written/ Viva voce		
AN 19.17	Enumerate parts & major connections of basal ganglia & limbic lobe	K	KH	Y	Lecture	Written/ Viva voce		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
AN 19.18	Describe boundaries, parts, gross relations, major nuclei and connections of dorsal thalamus, hypothalamus, epithalamus, metathalamus and subthalamus	K	KH	Y	Lecture	Written/ Viva voce		
AN 19.19	Describe & identify formation, branches & major areas of distribution of circle of Willis	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session	Written/ Viva voce/skill assessment		
AN 19.20	Describe & demonstrate parts, boundaries & features of IIIrd, IVth & lateral ventricle	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session	Written/ Viva voce/skill assessment		
AN 19.21	Describe anatomical basis of congenital hydrocephalus	K	KH	N	Lecture	Written

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
Topic: : Abdominal cavity Number of competencies: 4								
AN 20.1	Describe boundaries and recesses of Lesser & Greater sac	K	KH	Y	Practical, Lecture, Small group discussion, DOAP session	Written/ Viva voce	Surgery	
AN 20.2	Describe & identify the origin, course, important relations and branches of Abdominal aorta, Coeliac trunk, Superior mesenteric, Inferior mesenteric & Common iliac artery	K	KH	Y	Practical, Lecture, Small group discussion, DOAP session	Written/ Viva voce/skill assessment		
AN 20.3	Describe important nerve plexuses of posterior abdominal wall, describe the abdominal muscles in different layers	K	KH	N	Lecture	Written		
AN 20.4	Describe & demonstrate the attachments, openings, nerve supply &action of the thoracoabdominal diaphragm	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session	Written/ Viva voce/skill assessment		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
Topic: Perenial Region ,Sacral Plexus		**Number of competencies: 8**						
AN 21.1	Describe the (position, features, important eritoneal and other relations, blood supply, nerve supply, lymphatic drainage and clinical aspects of) important male & female pelvic viscera	K	KH	Y	Practical, Lecture, Small group discuss	Written/ Viva voce/		
AN 21.2	Desccribe the origin, course, important relations and branches of internal iliac artery	K	H	Y	Practical, Lecture, Small group discussion	Written/ Viva voce		
AN 21.3	Describe the branches of sacral plexus	K	KH	Y	Lecture	Written		
AN 21.4	Describe the neurological basis of Automatic bladder	K	KH	N	Lecture	Written		
AN 21.5	Describe the superficial & deep perineal pouch (boundaries and contents)	K	KH	Y	Lecture, Small group discussion	Written/ Viva voc		
AN 21.6	Describe & identify Perineal body	K	KH	Y	Lecture, Small group discussion, DOAP session	Written/ Viva voce		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
AN 21.7	Describe Perineal membrane in male & female	K/S	KH	Y	Lecture, Small group discussion, DOAP session	Written/ Viva voce/		
AN 21.8	Explain the anatomical basis of Perineal tear, Episiotomy, Perianal abscess and Anal fissure	K	KH	N	Lecture	Written		
Topic: Larynx, Eyes,hearing & organs of equilibrium Number of competencies: 4								
AN 22.1	Describe the morphology, identify structure of the wall, nerve supply, blood supply and actions of intrinsic and extrinsic muscles of the larynx	K/S	SH	Y	Practical, Lecture, Small group discussion	Written/ Viva voce		OTSC
AN 22.2	Describe the anatomy of ear	K	KH	N	Lecture	Written		
AN 22.3	Describe anatomy of eyes & muscles	K	KH	N	Lecture	Written		
AN 22.4	Explain the anatomical basis of hypoglossal nerve palsy	K	KH	N	Lecture	Written		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
Topic: Radiological Anatomy Number of competencies: 2								
AN 23.1	Understand Various imaging techniques with Principles of plain radiograms and CT scan, Ultrasonography,	K	KH	N	Lecture	Written	orthopaedics	
AN 23.2	. Bones and joints seen in AP and lateral view radiographs of hip, knee, ankle joints and foot	K	KH	N	Lecture	Written		
Topic: Applied Anatomy Number of competencies: 3								
AN 24.1	**Muscles Describe** Classification, each type: structure, ultrastructure, function, applied anatomy	K	KH	N	Lecture	Written		
AN 24.2	**Nervous Tissue** Describe structure, coverings, functions of Peripheral nerve&. Ganglia:	K	KH	N	Lecture	Written		
AN 24.3	**Skin** Describe Types: features of skin with examples and functions, cells, appendages	K	KH	N	Lecture	Written

HUMAN PHYSIOLOGY

Course Description

An overall goal of this course is to enable students to understand the role of molecules, cells, tissues, organs, and organ systems (endocrine, nervous, muscular and immune systems) in human health and disease. This class focuses on understanding physiology –the functioning of a living organism and its component parts. This requires going beyond memorization of facts to acquire an understanding of how and why the body functions the way it does, and what happens when it does not function properly.

COURSE OBJECTIVES

A. KNOWLEDGE

1. Understanding of the physiology and basic regulatory concepts related to the functioning of life processes
2. Understand the functions of important physiological systems including the cardio- respiratory, renal, reproductive and metabolic systems;
3. Define homeostasis and explain how homeostatic mechanisms normally maintain a constant interior milieu. .
4. State the functions of each organ system of the body, explain the mechanisms by which each functions, and relate the functions and the anatomy and histology of each organ system.
5. Understand and demonstrate the interrelations of the organ systems to each other
6. Predict and explain the integrated responses of the organ systems of the body to physiological and pathological stresses.

7. Understand physiology of the neuromuscular system, particularly the regulation of strength and velocity of a contraction by muscle receptors interacting with the nervous system.
8. Understand the function of the cardiovascular, circulatory and respiratory systems at rest and during exercise, and their adaptations to training.
9. Explain the pathophysiology of common diseases related to the organ systems of the body receptors interacting with the nervous system.
10. Understand the function of the cardiovascular, circulatory and respiratory systems at rest and during exercise, and their adaptations to training.
11. Explain the pathophysiology of common diseases related to the organ systems of the body.

B. SKILL

1. Perform, analyse and report on experiments and observations in physiology
2. Recognise and identify principal tissue structures.
3. Identify different blood cells in a film, and indicate the identifying features of each type of leukocyte.
4. Clinically examine the Cardiovascular and respiratory system and record BP and pulse at rest and in different postures

C. ATTITUTE

1. Demonstrate ability to communicate adequately, sensitively, effectively and respectfully with patients and colleagues.
2. Demonstrate ability to apply newly gained knowledge.

Examination scheme

Scheme of examination for University Practical exam 100 Marks

Spots- Identification	Clinical Examination- CVS, Pulse, BP, PNF, CNS & Viva Voce	Presentation & Communication skills	Total
40marks	40 marks	20marks	100 marks

Competency Table: Human Anatomy

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
HUMAN PHYSIOLOGY								
Topic: General Physiology **Number of competencies: 7**								
PI 1.1	Introduction to Physiology, Organisation of Human Body	K/S	SH	Y	Lecture, DOAP session	Written/ Viva voce		Biochemistry
PI 1.2	Compartments of Body Fluid	K	KH	Y	Lecture	Written/ Viva voce		
PI 1.3	Homeostasis and Biofeedback Mechanism	K	KH	Y	Lecture	Written/ Viva voce		
PI 1.4	Cell Physiology	K	KH	Y	Lecture	Written/ Viva voce		
PI 1.5	Cell Membrane and Concept of Membrane Potentials	K	KH	Y	Lecture	Written/ Viva voce		
PI 1.6	Transport Across Cell Membrane	K	KH	Y	Lecture	Written/ Viva voce		
PI 1.7	Concept of Osmolar and Tonicity Units	K	KH	Y	Lecture	Written/ Viva voce		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
Topic: Haematology		**Number of competencies: (10)**						
PI 2.1	Describe the composition and functions of blood components	K	KH	Y	Lecture, Small group discussion	Written/Viva voce	Pathology	
PI 2.2	Discuss the origin, forms, variations and functions of plasma proteins	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 2.3	Describe and discuss the synthesis and functions of Haemoglobin and explain its breakdown. Describe variants of haemoglobin	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 2.4	Describe RBC formation (erythropoiesis & its regulation) and its functions	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 2.5	Describe different types immunity and its regulation	K	KH	Y	Lecture, Small discussion	Written/Viva voce		
PI 2.6	Describe WBC formation (granulopoiesis) and its regulation	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
PI 2.7	Describe the physiological basis of hemostasis and, anticoagulants. Describe bleeding & clotting disorders (Hemophilia, purpura)	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 2.8	Describe different blood groups and discuss the clinical importance of blood grouping, blood banking and transfusion	K	KH	Y	Lecture, Small group discussion, ECE- Visit to blood bank	Written/Viva voce		
PI 2.9	Define and classify different types of immunity. Describe the development of immunity and its regulation	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 2.10	Estimate Hb, RBC, TLC, RBC indices, DLC, Blood groups, BT/CT	K	KH	Y	Lecture, DOAP sessions	Practical/OSPE/ Viv a voce		

NCAHP Since-2021

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
Topic: Cardiovascular Physiology (CVS) Number of competencies: 13								
PI 3.1	Classify muscle tissue according to structure & action	K	KH	Y	Lecture	Written/ Viva voce	Medicine, OTM C	
PI 3.2	Enumerate parts of skeletal muscle and differentiate between tendons and aponeuroses with examples	K	KH	Y	Lecture	Written/ Viva voce		
PI 3.3	Describe the functional anatomy of heart including chambers, sounds; and Pacemaker tissue and conducting system.	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 3.4	Describe the properties of cardiac muscle including its morphology, electrical, mechanical and metabolic functions	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 3.5	Discuss the events occurring during the cardiac cycle	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 3.6	Describe generation, conduction of cardiac impulse	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
PI 3.7	Describe and discuss haemodynamics of circulatory system	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 3.8	Describe and discuss local and systemic cardiovascular regulatory mechanisms	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 3.9	Describe the factors affecting heart rate, regulation of cardiac output& blood pressure	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 3.10	Describe & discuss regional circulation including microcirculation, lymphatic circulation, coronary, cerebral, capillary, skin foetal pulmonary and splanchnic circulation,	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 3.11	Describe the patho-physiology of shock, syncope and heart failure	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
PI 3.12	Record blood pressure & pulse at rest and in different grades of exercise and postures in a volunteer or simulated environment	S	SH	Y	DOAP sessions	Practical/OSPE/ Viva voce		
PI 3.13	Describe interpretation of normal ECG in a volunteer or simulated environment	K	KH	Y	Lecture, DOAP sessions	Practical/OSPE/ Viva voce		
Topic: Respiratory Physiology Number of competencies (7)								
PI 4.1	Describe the functional anatomy of respiratory tract	K	KH	Y	Lecture, Small group discussion	Written/Viva voce	OTDP II, OTMC, Medicine	
PI 4.2	Describe the mechanics of normal respiration, pressure changes during ventilation, lung volume and capacities, alveolar, Surface tension, compliance, airway resistance, ventilation, V/P ratio, diffusion capacity of lungs	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		

स्वास्थ्यम् सर्वार्थसाधनम्
NCAHP
Since-2021

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
PI 4.3	Describe and discuss the transport of respiratory gases: Oxygen and Carbon dioxide	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 4.4	Describe and discuss the physiology of high altitude and deep sea diving	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 4.5	Describe and discuss the pathophysiology of dyspnoea, hypoxia, cyanosis asphyxia; drowning, periodic breathing	K	KH	Y	Lecture, Small group discussion	Written/Vivavoce		
PI 4.6	Describe and discuss lung function tests & their clinical significance	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 4.7	Demonstrate the correct technique to perform & interpret Spirometry	S	SH	Y	DOAP sessions	Skill assessment/ Viva voce		
Topic: Renal Physiology Number of competencies: (6)								
PI 5.1	Describe structure and function of kidney	K	KH	Y	Lecture, Small group discussion	Written/Viva voce	Medicine, OTMC	

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
PI 5.2	Describe the structure and functions of juxta glomerular apparatus and role of renin-angiotensin system	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 5.3	Describe the mechanism of urine formation involving processes of filtration, tubular reabsorption & secretion; concentration and diluting mechanism	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 5.4	Describe & discuss the significance & implication of Renal clearance	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 5.5	Describe the renal regulation of fluid and electrolytes & acid-base balance	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 5.6	Describe the innervations of urinary bladder, physiology of micturition and its abnormalities	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
Topic: Endocrine Physiology		**Number of competencies: (6)**						
PI 6.1	Describe the physiology of bone and calcium metabolism	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 6.2	Describe the synthesis, secretion, transport, physiological actions, regulation and effect of altered (hypo and hyper) secretion of pituitary gland, thyroid gland, parathyroid gland, adrenal gland, pancreas and hypothalamus	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 6.3	Describe the physiology of Thymus & Pineal Gland	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 6.4	Describe function tests: Thyroid gland; Adrenal cortex, Adrenal medulla and pancreas	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
PI 6.5	Describe the metabolic and endocrine consequences of obesity & metabolic syndrome, Stress response. Outline the psychiatry component pertaining to metabolic syndrome.	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 6.6	Describe & differentiate the mechanism of action of steroid, protein and amine hormones	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
Topic: Muscle Physiology		**No of Competencies: 15**						
PI 7.1	Describe the structure and functions of a neuron and neuroglia; Discuss Nerve Growth Factor & Other growth factors/cytokines	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 7.2	Describe the types, functions & properties of nerve fibers	K	KH	Y	Lecture, Small group discussion	Written/Viva voce	OTDP I, OTSC, OTMC, OTOC, OTNC	FOT I
PI 7.3	Describe the degeneration and regeneration in peripheral nerves	K	KH	Y	Lecture, Small group discussion	Written/Viva voce	OTDP I, OTSC, OTMC, OTOC, OTNC	FOT I

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
PI 7.4	Describe the structure of neuro-muscular junction and transmission of impulses	K	KH	Y	Lecture, Small group discussion	Written/Viva voce	OTDP I, OTSC, OTMC, OTOC, OTNC	FOT I
PI 7..5	Discuss the action of neuro-muscular blocking agents	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 7.6	Describe the Pathophysiology of Myasthenia gravis	K	KH	Y	Lecture, Small group discussion	Written/Viva voce	Medicine, OTNC	
PI 7.7	Describe the different types of muscle fibres and their structure	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 7.8	Describe action potential and its properties in different muscle types (skeletal & smooth)	K	KH	Y	Lecture, Small Group discussion	Written/Viva voce		
PI 7.9	Describe the molecular basis of muscle contraction in skeletal andin smooth muscles	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 7.10	Describe the mode of muscle contraction (isometric and isotonic)	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		FOT I, OTDP I
PI 7.11	Explain energy source and muscle metabolism	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
PI 7.12	Explain the gradation of muscular activity	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 7.13	Describe muscular dystrophy: myopathies	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 7.14	Perform Ergography	S	SH	Y	DOAP sessions	Practical/OSPE/ Viva voce		
PI 7.15	Demonstrate effect of mild, moderate and severe exercise and record changes in cardiorespiratory parameters	S	SH	Y	DOAP sessions	Practical/OSPE/ Viva voce	Work physiology, OTMC	FOT I
Topic: Physiology of digestive system			**No of Competencies: (8)**					
PI 8.1	Describe the structure and functions of digestive system	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 8.2	Describe the composition, mechanism of secretion, functions, and regulation of saliva, gastric, pancreatic, intestinal juices and bile secretion	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
PI 8.3	Describe GIT movements, regulation and functions. Describe defecation reflex. Explain role of dietary fibre.	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 8.4	Describe the physiology of digestion and absorption of nutrients	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 8.5	Describe the source of GIT hormones, their regulation and functions	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 8.6	Describe the Gut-Brain Axis	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 8.7	Describe & discuss the structure and functions of liver and gallbladder	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 8.8	Describe & discuss gastric function tests, pancreatic exocrine function tests & liver function tests	K	KH	Y	Lecture, Small group discussion, Demonstration Esophageal Manometry & endoscopy	Written/Viva voce		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
Topic: Reproductive Physiology		**No of competencies: 5**						
PI 9.1	Describe and discuss sex determination; sex differentiation and their abnormities and outline psychiatry and practical implication of sex determination.	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		Orthopaedics
PI 9.2	Describe and discuss puberty: onset, progression, stages; early and delayed puberty and outline adolescent clinical and psychological association.	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 9.3	Describe male reproductive system: functions of testis and control of spermatogenesis & factors modifying it and outline its association with psychiatric illness	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		

NCAHP Since-2021

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
PI 9.4	Describe female reproductive system: (a) functions of ovary and its control; (b) menstrual cycle - hormonal, uterine and ovarian changes	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 9.5	Describe and discuss the physiological effects of sex hormones	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
Topic: Neuro physiology			**No of competencies: 17**					
PI 10.1	Describe and discuss the organization of nervous system							
PI 10.2	Describe and discuss the functions and properties of synapse, reflex, receptors							
PI 10.3	Describe and discuss somatic sensations & sensory tracts							

NCAHP Since-2021

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
PI 10.4	Describe and discuss motor tracts, mechanism of maintenance of tone, control of body movements, posture and equilibrium & vestibular apparatus							
PI 10.5	Describe and discuss structure and functions of reticular activating system, autonomic nervous system (ANS)							
PI 10.6	Describe and discuss Spinal cord, its functions, lesion & sensory disturbances							
PI 10.7	Describe and discuss functions of cerebral cortex, basal ganglia, thalamus, hypothalamus, cerebellum and limbic system and their abnormalities							
PI 10.8	Describe and discuss behavioural and EEG characteristics during sleep and mechanism responsible for its production							

स्वास्थ्यम् सर्वार्थसाधनम्
NCAHP
Since-2021

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
PI 10.9	Describe and discuss the physiological basis of memory, learning and speech							
PI 10.10	Describe and discuss chemical transmission in the nervous system. (Outline the psychiatry element).							
PI 10.11	Demonstrate the correct clinical examination of the nervous system: Higher functions, sensory system, motor system, reflexes, cranial nerves in a normal volunteer or simulated environment							
PI 10.12	Identify normal EEG forms							
PI 10.13	Describe and discuss perception of smell and taste sensation							
PI 10.14	Describe and discuss patho-physiology of altered smell and taste sensation							

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
PI 10.15	Describe and discuss functional anatomy of ear and auditory pathways & physiology of hearing							
PI 10.16	Describe and discuss functional anatomy of eye, physiology of image formation, physiology of vision including colour vision, refractive errors, colour blindness, physiology of pupil and light reflex							
PI 10.17	Describe and discuss the physiological basis of lesion in visual pathway							
Topic: Cardiorespiratory Physiology		**No of Competencies: 9**						
PI 11.1	Describe and discuss mechanism of temperature regulation	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 11.2	Describe and discuss adaptation to altered temperature (heat and cold)	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
PI 11.3	Describe and discuss cardio-respiratory and metabolic adjustments during exercise; physical training effects	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 11.4	Discuss & compare Cardio respiratory changes in exercise (isometric and isotonic) with that in the resting state and under different environmental conditions (heat and cold)	K	KH	Y	Lecture, Small group discussion	Written/Viva voce		
PI 11.5	Describe physiology of Infancy	K	KH	N	Lecture, Small group discussion	Written/Viva voce		
PI 11.6	Interpret growth charts	K	KH	N	Small group teaching	Practical/OSPE/ Vivavoce		
PI 11.7	Interpret anthropometric assessment of infants	K	KH	N	Small group teaching	Practical/OSPE/ Vivavoce		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
PI 11.8	Discuss the physiological effects of meditation	K	KH	N	Lecture, Small group discussion	Written/Viva voce		
PI 11.9	Describe and discuss physiology of aging; free radicals and antioxidants	K	KH	N	Lecture, Small group discussion	Written/Viva voce

BIOCHEMISTRY

COURSE DESCRIPTION:

Biochemistry, the study of biological phenomena at cellular and molecular level, is studied to gain knowledge about the principles that govern complex biological systems. The primary objective of this course is to give students a solid foundation in biochemical processes, to develop analytical, technical and critical thinking skills and to make them scientifically literate.

COURSE OBJECTIVES

At the end of first year BOTH students will be able to

A. **KNOWLEDGE:**

1. Explain the scientific basis for an understanding of the mechanisms of metabolic and functional disturbances
2. Gain knowledge and understand the principles that govern the structures of macromolecules and their participation in molecular recognition
3. Understand molecular and functional organization of cell and its subcellular components
4. Provide concept of enzymes
5. Describe the chemistry, metabolism of Carbohydrates, lipids and proteins and its related disorders
6. Understand the Integration and homeostasis of various metabolism
7. Understand the metabolism of Purines, Pyrimidines, Minerals and its related disorders
8. Understand the process of Acid- base and Water- Electrolyte balance and imbalance
9. Recognize the Biochemical role of vitamins and manifestations of its deficiencies

Competency Table: Biochemistry

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
	BIOCHEMISTRY							
Topic: : Fundamental Unit of Life: The Cell and Chemistry of Biomolecules (Carbohydrates, Lipids, Proteins, Nucleic Acids) Number of competencies: (6)								
BC 1.1	Describe Plasma membrane; structure and function	K	SH	Y	Lecture	Written/ Viva voce	Pathology, Microbiology	
BC 1.2	Understand Function of intracellular organelle in brief (no structural details)	K	KH	Y	Lecture	Written/Viva voce		
BC 1.3	Define & explain the Classification (with proper examples) and their functions	K	KH	Y	Lecture	Written/ Viva voce		
BC 1.4	Define& explain the Various ways of Classification (with proper examples) proteins, amino acids, peptides & their biochemical importance, Denaturation, coagulation, isoelectric pH and its significance	K	KH	Y	Lecture	Written/ Viva voce		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
BC 1.5	Definition, Class Define& explain the ification (with proper examples) and functions of Lipids and fatty acids.	K	KH	Y	Lecture	Written/ Viva voce		
BC 1.6	Describe Structure & functions of DNA, RNA, Nucleotides & their biological importance	K	KH	Y	Lecture	Written/ Viva voce		
Topic: Enzymes Number of competencies: (4)								
BC 2.1	Describe Classification of enzymes, Factors affecting enzyme activity.	k	K	Y	Lecture	Written		
BC 2.2	Enumerate Enzyme inhibitors (kinetic is not required)	K	K	Y	Lecture	Written		
BC 2.3	Describe Diagnostic clinical importance of enzymes & Isoenzymes	K	K, KH	Y	Lecture, DOAP	Written		
BC 2.4	Diagnostic uses of enzymes	K	K, KH		Lecture	Written		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
Topic: Biological Oxidation Mechanism of Hormone Action and Metabolism of Carbohydrate, Lipid, Protein and Nucleic Acid No of Competencies -19								
BC 3.1	Describe the Electron transport chain	K	KH	Y	Lecture, Practical	Written		FOT II
BC 3.2	Describe Substrate level & oxidative phosphorylation	K	KH	Y	Practical, Lecture	Written/ Viva voce		
BC 3.3	Definition, Describe Classification OF Enzymes	K	KH	N	Lecture	Written		
BC 3.4	Describe Mechanism of hormone action	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP session	Written/ Viva voce/skill assessment		
BC 3.5	Describe Biochemical aspects of digestion and absorption of carbohydrates	K/S	SH	Y	Practical, Lecture, Small group discussion, DOAP	Written/ Viva		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
BC 3.6	Describe Glycolysis (Aerobic and Anaerobic)	K/S	SH	Y	Practical, Lecture, Small group discussion,	Written/ Viva voce/		
BC 3.7	Describe Glycogen metabolism, its regulation and glycogen storage diseases	K	KH	Y	Practical, Lecture	Written/ Viva voce		
BC 3.8	Explain Gluconeogenesis-Cori's cycle, HMP shunt and its significance	K	KH	N	Lecture	Written		
BC 3.9	Explain: Blood glucose regulation, Lactose intolerance and Diabetes mellitus	K	KH	N	Lecture	Written		
BC 3.10	Describe Biochemical aspects of digestion and absorption of proteins	K	KH	Y	Lecture,	Written/ Viva voce/		
BC 3.11	Describe Fate of amino acids in the body (deamination, Transamination, transmethylation), fates of ammonia and urea cycle & disorders	K	KH	N	Lecture	Written		
BC 3.12	Describe Biochemical aspects of digestion and absorption of lipids	K	KH	N	Lecture	Written		

Code No.	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration

FUNDAMENTALS OF OCCUPATIONAL THERAPY - I

Course description:

This course gives an introduction to the foundational concepts of Occupational Therapy. This course introduces students to the professional standards, ethical principles, and documentation in occupational therapy practice. It also gives an overview of the Occupation Therapy process, its frameworks, components – OTPF, Rehabilitation Philosophy, methods of assessment of ROM & muscle strength

Goal:

The primary goal of a first-year occupational therapy program is to lay the foundational knowledge and skills necessary for students to become competent and ethical occupational therapy practitioners. The program encourages students to progress through their education with a solid understanding of the profession and the skills needed to begin their journey as occupational therapy professionals

Objectives:

A. Knowledge

At the end of the first year, the student should be able to

1. Remember and understand conceptual foundations of ethics and documentation
2. Understand the therapeutic relationship among the rehabilitation team members, the patient and the therapist.
3. Understand the assessment methods to improve participation in social and community life
4. Understand use of therapeutic activity and apply knowledge of activity analysis to choose appropriate activity for therapeutic use
5. Understand the principles & application of ROM ,muscle strength assessment ,its importance in Occupational Therapy

B. Skills

At the end of the first year, the student should be able to

1. Analyse various Therapeutic activities & match them with clients demands for participation in daily skills
2. Demonstrate assessment skills for ROM & muscle strength
3. Attitude
4. Demonstrate understanding of respect and empathy in conduct with patients

Scheme of examination for University Practical exam 100 Marks

Activity Analysis (any two from adjunctive, enabling, purposeful & occupation based activities) & Viva Voce	Assessment of Range of Motion Upper extremity & Lower Extremity (on normal subjects) & Viva Voce	Gross Muscle testing (On Normal subjects Upper & Lower extremity) & Viva Voce	Presentation & communication skills	Total
20 marks	40 marks	20 marks	20 marks	100 marks

Competency Table: FUNDAMENTALS OF OCCUPATIONAL THERAPY - I

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Teaching Learning Methods	Assessment Methods	Number required to certify P	Vertical Integration	Horizontal Integration
FUNDAMENTALS OF OCCUPATIONAL THERAPY – I									
Topic: Introduction to Occupation, Occupational Science and Occupational Therapy **Number of Competencies: 8** **Number of procedures for certification: (NIL)**									
FOTI 1.1	Define and describe occupation, theory of occupation and evolutionary traits.	K/C	K	Y	Lecture	Written			
FOTI 1.2	Enumerate and describe dimensions of occupation.	K	K/KH	Y	Lecture	Written			
FOTI 1.3	Enumerate and describe forms of occupation.	K	K/KH	Y	Lecture	Written			
FOTI 1.4	Explain the need to understand occupation.	K	K	N	Lecture	Written			
FOTI 1.5	Understand the philosophy and concept of occupation.	K	K	Y	Lecture	Written			
FOTI 1.6	Explain therapeutic application of occupation.	K/C	K/KH	Y	Lecture	Written			
FOTI 1.7	Explain occupational science and application of its theory to occupational therapy.	K/C	K/KH	Y	Lecture	Written			

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Teaching Learning Methods	Assessment Methods	Number required to certify P	Vertical Integration	Horizontal Integration
FOTI 1.8	Define and explain the scope of occupational therapy.	K/A/C	K	Y	Lecture	Written			
Topic: History & Evolution of Occupational Therapy **Number of Competencies:8** **Number of procedures for certification: (NIL)**									
FOTI 2.1	Describe the Historical Context of Occupational Therapy Across the World	K	K	Y	Lecture	Written/ Viva-Voce			
FOTI 2.2	Explain the influences on Evolution of Occupational Therapy	K	K/KH	Y	Lecture	Written			
FOTI 2.3	Explain Rehabilitation philosophy	K	K	Y	Lecture	Written			
FOTI 2.4	Describe Principles of Physical Medicine and Rehabilitation	K	K/KH	Y	Lecture	Written			
FOTI 2.5	Enlist International /National/State Organizations of Occupational Therapy	K	K	Y	Lecture	Written			
FOTI 2.6	Describe how Professional Organizations Supports Professional Development and Enlist Benefits of Professional Associations	K/A/C	K	Y	Lecture	Written/ Viva-Voce			

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Teaching Learning Methods	Assessment Methods	Number required to certify P	Vertical Integration	Horizontal Integration
FOTI 2.7	Historical Context of Occupational Therapy in India Including State Council and NCAHP (National Commission for Allied & Healthcare professions)	K	K	Y	Lecture	Written			
FOTI 2.8	Describe composition and Functions of NCAHP, SCAHP	K	K	Y	Lecture	Written			
Topic: Human Development and Maturation **Number of competencies: 4** **Number of procedures for certification: (NIL)**									
FOTI 3.1	Define and describe importance of knowledge of human development.	K/C	K	Y	Lecture	Written			
FOTI 3.2	Describe aspects of human development.	K/C	K	Y	Lecture	Written			
FOTI 3.3	Describe factors influencing human growth and development.	K/C	K	Y	Lecture	Written			
FOTI 3.4	Describe general principles of human development and specific principles of maturation.	K/C	K	Y	Lecture	Written			Anatomy

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Teaching Learning Methods	Assessment Methods	Number required to certify P	Vertical Integration	Horizontal Integration
Topic: Principles and Methods of Assessments **Number of Competencies: 18** **Number of procedures for certification: (NIL)**									
FOTI 4.1	Define active, passive, and functional range of motion (ROM), total active and total passive motion.	K/C	K	Y	Lecture	Written			
FOTI 4.2	Describe various methods of range of motion evaluation.	K/C	K	Y	Lecture	Written			
FOTI 4.3	Enlist the purposes of measuring joint range of motion	K/C	K	Y	Lecture	Written			
FOTI 4.4	Enlist precautions for and contraindications to joint Measurement Understand and recognize norms of joint range of motion of various	K/C	K	Y	Lecture	Written			
FOTI 4.5	joints of upper extremity, lower extremity and spine and end feels for each motion and describe how to establish ROM norms for clients with bilateral as well as unilateral involvement.	K/C	K	Y	Lecture	Written			
FOTI 4.6	Describe various types of goniometers and parts of goniometers.	K/C	K	Y	Lecture	Written			

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Teaching Learning Methods	Assessment Methods	Number required to certify P	Vertical Integration	Horizontal Integration
FOTI 4.7	Evaluate range of motion of the upper extremity joints using a goniometer based on joint range of motion principles and procedures on normal individuals and patients.	K/S/A/C	K/KH/SH/P	Y	Lecture, DOAP	Written, Practical			
FOTI 4.8	Evaluate range of motion of the lower extremity joints using a goniometer based on joint range of motion principles and procedures on normal individuals and patients.	K/S/A/C	K/KH/SH/P	Y	Lecture, DOAP	Written, Practical			
FOTI 4.9	Evaluate range of motion of the spinal joints using a goniometer, inclinometer and tape method based on joint range of motion principles and procedures on normal individuals and patients	K/S/A/C	K/KH/SH/P	Y	Lecture, DOAP	Written, Practical			
FOTI 4.10	Understand evaluation of range of motion of the temporomandibular joint using a goniometer, and tape method based on joint range of motion principles and procedures on normal individuals.	K/S/A/C	K/KH/SH/P	Y	Lecture, DOAP	Written, Practical			

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Teaching Learning Methods	Assessment Methods	Number required to certify P	Vertical Integration	Horizontal Integration
FOTI 4.11	Define types of muscle contractions, types of muscle strength and muscle power.	K/C	K	Y	Lecture	Written			
FOTI 4.12	Enlist the steps of the manual muscle test procedure in correct order and describe the limitations of the procedure.	K/C	K	Y	Lecture	Written			
FOTI 4.13	Enumerate and explain the various muscle strength grading systems	K/S/A/C	K	Y	Lecture	Written			
FOTI 4.14	Perform/administer a manual muscle test to evaluate strength of the upper extremity group muscles based on manual muscle test principles and procedures on normal person.	K/S/A/C	K/KH/SH/P	Y	Lecture, DOAP	Written, Practical			
FOTI 4.15	Perform/administer a manual muscle test to evaluate strength of the lower extremity group muscles based on manual muscle test principles and procedures on normal person.	K/S/A/C	K/KH/SH/P	Y	Lecture, DOAP	Written, Practical			

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Teaching Learning Methods	Assessment Methods	Number required to certify P	Vertical Integration	Horizontal Integration
FOTI 4.16	Perform/administer a manual muscle test to evaluate strength of the spine group muscles based on manual muscle test principles and procedures on normal person.	K/S/A/C	K/KH/SH/P	Y	Lecture, DOAP	Written, Practical			
FOTI 4.17	Define and explain muscle endurance and general endurance or aerobic capacity.	K/C	K	Y	Lecture	Written			
FOTI 4.18	Perform/administer a muscle endurance test based on the principles and procedures on normal person.	K/S/A/C	K/KH/SH/P	Y	Lecture, DOAP	Written, Practical			
Topic: Therapeutic Exercises **Number of Competencies: 8** **Number of procedures for certification: (NIL)**									
FOTI 5.1	Explain principles of therapeutic exercises.	K/C	K	Y	Lecture	Written			
FOTI 5.2	Enumerate purposes and indications of therapeutic exercises.	K/C	K	Y	Lecture	Written			
FOTI 5.3	Enumerate precautions and contraindications of therapeutic exercises.	K/C	K	Y	Lecture	Written			
FOTI 5.4	Determine pre-requisites of prescriptions of therapeutic exercises.	K/C	K	Y	Lecture	Written			

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Teaching Learning Methods	Assessment Methods	Number required to certify P	Vertical Integration	Horizontal Integration
FOTI 5.5	Define, classify, differentiate and demonstrate types of therapeutic exercises and give examples of its application to activities.	K/C	K/KH/SH/P	Y	Lecture, DOAP	Written, Practical			
FOTI 5.6	Describe treatment goals and enlist therapeutic activities for patients who have problems with range of motion and flexibility.	K/S/A/C	K/KH/SH/P	Y	Lecture, DOAP	Written, Practical			
FOTI 5.7	Describe treatment goals and enlist therapeutic activities for patients who have problems with muscle strength.	K/S/A/C	K/KH/SH/P	Y	Lecture, DOAP	Written, Practical			
FOTI 5.8	Describe treatment goals and enlist therapeutic activities for patients who have problems with muscle and general endurance.	K/S/A/C	K/KH/SH/P	Y	Lecture, DOAP	Written, Practical			
Topic: Activity Analysis Number of Competencies: 4 **Number of procedures for certification: (NIL)**									
FOTI 6.1	Explain principles of activity analysis with respect to biomechanical, sensory motor & socio-cultural aspects including the criteria for selection of an activity for a client.	K/C/A	K	Y	Lecture	Written			

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Teaching Learning Methods	Assessment Methods	Number required to certify P	Vertical Integration	Horizontal Integration
FOTI 6.2	Determine grading of occupations/activities/tasks to challenge the person's abilities to improve performance.	K/S/A/C	K/KH/SH	Y	Lecture, DOAP	Written, Practical			
FOTI 6.3	Determine adaptation of occupations/activities/tasks to increase their therapeutic value or to bring them within the capability of a person.	K/S/A/C	K/KH/SH	Y	Lecture, DOAP	Written, Practical			
FOTI 6.4	Administer, demonstrate and explain activity analysis of any adjunctive activities, enabling activities (occupation-as-means), purposeful activities (occupation-as- end) and occupation.	K/S/A/C	K/KH/SH	Y	Lecture, DOAP	Written, Practical			
Topic: Media, Methods and Therapeutic and Physical Agent Modalities **Number of Competencies: 4** **Number of procedures for certification: (NIL)**									
FOTI 7.1	Define media, methods and modalities.	K/C	K	Y	Lecture	Written			
FOTI 7.2	Describe the phases of tissue healing.	K/C	K	Y	Lecture	Written			

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Teaching Learning Methods	Assessment Methods	Number required to certify P	Vertical Integration	Horizontal Integration
FOTI 7.3	Describe the appropriate indications, precautions and contraindications for use of superficial thermal agents, deep thermal agents, and electrotherapeutic agents (Physical agent modalities are used only as an adjunct to Occupational Therapy only)	K/C	K	Y	Lecture	Written			
FOTI 7.4	Enlist the role of physical agent modalities in occupational therapy practice. (Physical agent modalities are used only as an adjunct to Occupational Therapy only)	K/C	K	Y	Lecture	Written

ENGLISH & COMMUNICATION SKILLS

Course Description:

This course gives a brief overview of understanding of the importance of grammar for writing & speaking of English language.& communication skills in Occupational Therapy practice, Gives the guidelines for developing communication skills for professional

Goal:

The primary goal of delivering the effective communication & English speaking & writing for the first year Occupational Therapy under graduate aware about the effective communication skills & need for addressing them.

Objectives:

Knowledge

At the end of the first year, the student should be able to

1. Converse & write the texts/ documents in English
2. Remember and understand the importance and process of communication
3. Explain education and career skills, planning, decision making and organization, culture and etiquette.
4. Describe the method of creating a first impression and explain the way of introduction & presentation of self (physical appearance) at the university and during academic meetings and conferences.
5. Enlist online and offline meeting etiquette Scheme of Examination:

Total Theory Marks: 50 (Non university Exam) MCQs, Short answer questions, Brief answer questions

Competency Table: English & Communication Skills

FUNDAMENTALS OF OCCUPATIONAL THERAPY - II

Course description:

This course gives an introduction to the foundational concepts of Occupational Therapy. This course introduces students to the professional standards, ethical principles, and documentation in occupational therapy practice. It also gives an overview of the Occupation Therapy process, its frameworks, components – Activities of daily living, Work, hand functions and hand splinting.

Goal:

The primary goal of a first-year occupational therapy program is to lay the foundational knowledge and skills necessary for students to become competent and ethical occupational therapy practitioners. The program encourages students to progress through their education with a solid understanding of the profession and the skills needed to begin their journey as occupational therapy professionals.

Objectives:

A. **Knowledge**

At the end of the first year, the student should be able to

1. remember and understand conceptual foundations of ethics and documentation
2. understand the therapeutic relationship between the patient and the therapist.
3. understand the role of activities of daily living for maintaining health, well-being, and participation in social and community life

4. understand concept of work and work evaluation and apply knowledge for return to work when dealing with clients in the forthcoming years
5. understand the basic hand functions and assessment tools used
6. identify equipment, material, and tools used in occupational therapy practice
7. understand basics of hand splint making.

B. **Skills**

At the end of the first year, the student should be able to

1. Analyse various jobs with respect to psychological and physical demands
2. Demonstrate making a paper pattern of commonly used hand splints by applying the principles of splint making.

C. **Attitude**

At the end of the first year, the student should be able to

1. Demonstrate understanding of respect and empathy in conduct with patients

FOT-II 2.2	Describe the evolution of the occupational therapy practice framework (OTPF)	K	K	Y	Lecture	Written, viva			

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Teaching - Learning Methods	Assessment Methods	Number required to certify P	Vertical Integration	Horizontal Integration
FOT-II 2.3	Describe Domains (Occupations, Contexts, Performance Patterns, Performance Skills & Client Factors) and Practice (Evaluation, Intervention & Outcomes) of OTPF	K	K/KH	Y	Lecture	Written, viva			
FOT-II 2.4	Give brief overview of ICF	K	K	Y	Lecture	Written, viva			
Topic : Overview of the Occupational Therapy process and outcome Number of competencies: 2 Number of procedures for certification : (NIL)									
FOT-II 3.1	Describe Occupational therapy as a process and enumerate its components	K	K/KH	Y	Lecture	Written, viva			
FOT-II 3.2	Describe the evaluation related to Occupational profile, occupational performance and targeted outcomes	K	K/KH	Y	Lecture	Written, viva			

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Teaching - Learning Methods	Assessment Methods	Number required to certify P	Vertical Integration	Horizontal Integration
Topic : Documentation of Occupational Therapy Services Number of Competencies: 3 Number of procedures for certification : (NIL)									
FOT-II 4.1	Describe the terms Screening, Evaluation and Assessment	K	K	Y	Lecture	Written, viva			
FOT-II 4.2	Differentiate standardised, non standardised, subjective and objective assessments	K	K/ KH	Y	Lecture	Written, viva			
FOT-II 4.3	Understand purpose and types of documentation	K	K	Y	Lecture	Written , viva			
Topic : Activities of Daily Living Number of Competencies: 4 Number of procedures for certification : (NIL)									
FOT-II 5.1	Define and classify activities of daily living (ADL)	K	K	Y	Lecture	Written, viva			
FOT-II 5.2	Discuss ADL evaluation and describe various scales used in evaluation of both basic and instrumental ADL	K	K/KH	Y	Lecture, DOAP, CASE STUDY	Written, viva			

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Teaching - Learning Methods	Assessment Methods	Number required to certify P	Vertical Integration	Horizontal Integration
FOT-II 5.3	Discuss and understand principles and Specific Techniques in ADL Training for: Weakness, Low Endurance, Limited Range of Motion, Inco-ordination, Loss of Use of One Side of the Body, Limited Vision, Decreased Sensation, Access to Home, Community and Workplace	K	K/ KH	Y	Lecture, demonstration	Written, viva			
FOT-II 5.4	Define Adaptation and explain its process	K	K	Y	Lecture,	Written, viva			
Topic : Return to Work		**Number of Competencies: 5**				**Number of procedures for certification : (NIL)**			
FOT-II 6.1	Define and classify work	K	K	Y	Lecture	Written, viva			
FOT-II 6.2	Understand and describe Work Evaluations & its assessment tools –	K	K/KH	Y	Lecture, Tutorial, Small Group discussion Demonstration	Written, viva			

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Teaching - Learning Methods	Assessment Methods	Number required to certify P	Vertical Integration	Horizontal Integration
FOT-II 6.3	Define Prevocational Testing and Training and describe work conditioning and work hardening	K	K/KH	Y	Lecture, small group discussion	Written, viva			
FOT-II 6.4	Enumerate assessment needs and components of job analysis	K	K/KH	Y	Lecture	Written, viva			
FOT-II 6.5	Understand and explain job analysis of Tailoring, carpentry, Driving, data entry on computers	K/S	K/KH/SH	Y	Lecture, Tutorial, Demonstration	Written, viva			
Topic : Hand Functions & its Evaluation Methods **Number of Competencies: 4** **Number of procedures for certification : (NIL)**									
FOT-II 7.1	Define and classify normal hand functions	K	KH	Y	Lecture	Written, viva			
FOT-II 7.2	Describe resting and functional position of the hand	K	KH	Y	Lecture, Demonstrate	Written, viva			
FOT-II 7.3	Describe various assessment methods for hand functions	K/S	K/KH/SH	Y	Lecture, DOAP	Written, viva, DOP			

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Teaching - Learning Methods	Assessment Methods	Number required to certify P	Vertical Integration	Horizontal Integration
FOT-II 7.4	Define oedema and describe its assessment by various methods	K/S	K/KH/SH	Y	Lecture, DOAP	Written, viva, DOP			
Topic: Tools, Equipment and Materials Used in Splint Fabrication **Number of Competencies: 4** **Number of procedures for certification: (NIL)**									
FOT-II 8.1	Identify and explain the types, components, therapeutic values & demonstrate the uses of various tools used in fabrication of splints	K/S	K/KH/SH	Y	Lecture, demonstration	Written, OSPE, spots			
FOT-II 8.2	Identify and explain the uses of various equipment used in fabrication of splints	K/S	K/KH/SH	Y	Lecture, demonstration	Written, OSPE, spots			
FOT-II 8.3	Identify and explain the uses of various materials used in fabrication of splints	K/S	K/KH/SH	Y	Lecture, demonstration	Written, OSPE, spots			
FOT-II 8.4	understand and apply its knowledge in use, storage and maintenance of tools and equipments	K	K/KH	Y	Lecture, demonstration	Written, viva			

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Teaching - Learning Methods	Assessment Methods	Number required to certify P	Vertical Integration	Horizontal Integration
Topic : Introduction to Hand Splinting Number of Competencies:6 Number of procedures for certification : (NIL)									
FOT-II 9.1	Define & classify hand splints	K	KH	Y	Lecture,	Written, viva			
FOT-II 9.2	Explain the various characteristics of splint fabrication materials	K	KH	Y	Lecture,	Written, viva			
FOT-II 9.3	Enumerate the indications and therapeutic uses of hand splints	K	KH	Y	Lecture	Written, viva			
FOT-II 9.4	Describe the various principles of hand splints	K	KH	Y	Lecture,	Written, viva			
FOT-II 9.5	Demonstrate the fitting and the check out of hand splints	K/S	KH/SH	Y	Lecture, demonstration	Written, viva			
FOT-II 9.6	Prepare the paper model of following splints – finger gutter , functional hand splint, short opponens, radial bar cock up, dynamic extension outrigger splint.	K/S	KH/SH	Y	DOAP	DOP, Practical

ENVIRONMENTAL SCIENCES

Course Description:

This course gives a brief overview of understanding of the effects of climate change on the natural systems and processes on earth, need for substantive environmental laws and growing public awareness of a need for action in addressing environmental problems

Goal:

The primary goal of environmental sciences is to make the first year Occupational Therapy under graduate aware about the environmental problems and need for action in addressing them.

Objectives:

A. Knowledge

At the end of the first year, the student should be able to

1. Remember and understand the ecological and biological concepts of environment
2. Explain forms of energy, effects of climate change and conservation methods as relating to green house gas emissions
3. Understand and be aware about the policy and governance and ethics related to environment

NATIONAL COMMISSION FOR ALLIED AND HEALTHCARE PROFESSIONS

Since-2021

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Teaching - Learning Methods	Assessment Methods	Vertical Integration	Horizontal Integration
ENVIRONMENTAL SCIENCES								
Topic : Introduction to Ecology and Biology Number of Competencies: 8								
EVS 1.1	Explain the concepts of ecosystems and ecology	K	K	Y	Lecture	Written		
EVS 1.2	Describe Biotic and abiotic components of ecosystem and the Interactions between populations and communities in an ecosystem	K	KH	N	Lecture	Written		
EVS 1.3	Describe cycling and importance of essential and nonessential chemicals in biosphere	K	KH	Y	Lecture	Written		
EVS 1.4	Describe the two main kingdoms of Biology i.e. plant and animal kingdoms	K	K	Y	Lecture	Written		
EVS 1.5	Discuss the functioning of basic unit of life i.e. cell	K	K	Y	Lecture	Written		
EVS 1.6	Enumerate Principles of Biological diversity	K	K	Y	Lecture	Written		

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Teaching - Learning Methods	Assessment Methods	Vertical Integration	Horizontal Integration
EVS 1.7	Enumerate causes and consequences of biodiversity loss	K	K	Y	Lecture	Written		
EVS 1.8	Explain established and emerging conservation actions and measures.	K	KH	Y	Lecture	Written		
Topic : Energy, Climate change, Economics and Environment Number of Competencies: 8 certification : (NIL)								
EVS 2.1	Enumerate the various forms of energy	K	K	Y	Lecture	Written		
EVS 2.2	Describe the effect of the various forms of energy on the climate of the planet	K	KH	Y	Lecture	Written		
EVS 2.3	Explain economics of energy use	K	K	Y	Lecture	Written		
EVS 2.4	Enumerate the factors that determine the climate of our planet	K	K	Y	Lecture	Written		
EVS 2.5	Explain the natural variability and variations in climate due to anthropogenic causes	K	KH	Y	Lecture	Written		
EVS 2.6	Discuss the policies related to climate change	K	K	Y	Lecture	Written		

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Teaching - Learning Methods	Assessment Methods	Vertical Integration	Horizontal Integration
EVS 2.7	Describe Procedures, tools and technique for Environmental Impact Assessment (EIA)	K	K	Y	Lecture	Written		
EVS 2.8	Explain the Concepts of carbon accounting & carbon footprint and greenhouse gas emission	K	KH	Y	Lecture	Written		
Topic : Policy and Governance		**Number of Competencies: 4**				**Number of procedures for certification : (NIL)**		
EVS 3.1	Explain the concept of Environmental Law and Governance	K	K	Y	Lecture	Written		
EVS 3.2	Describe Formulation of Environmental Policy, and its Implementation and Evaluation	K	KH	Y	Lecture	Written		
EVS 3.3	Explain Environmental Ethics and Justice	K	KH	Y	Lecture	Written		
EVS 3.4	Describe role of research in conservation science	K	KH	N	Lecture	Written

Pathology and Micro biology

COURSE DESCRIPTION:

This course follows the basic subjects of Anatomy, Physiology, and Biochemistry and it forms a vital link between pre-clinical subjects and clinical subjects. Pathology involves the study of cause and mechanism of diseases. The knowledge and understanding of pathology of diseases is essential to institute appropriate treatment or suggest preventive measures to the patent. Particular. effort is made in this course to avoid burdening of the student

GOAL:

Give the concept of cell injury and changes in relation towards the pathological effects of infectious and non-infectious diseases and understand the disease process, the clinical significance (with special emphasis on musculoskeletal, neuro pathological and cardio respiratory system). Utilize concepts on microbiology, diagnosis of infections and immunology. Identify structure and features of disease-causing bacteria and viruses.

COURSE OBJECTIVES:

Knowledge

I. Describe etiology pathogenesis and clinico-pathological co-relation of common infectious and non-infectious disease.
II. Describe the changes in cells after cell injury and its healing process.
III. Describe the normal and altered in different organ system in different disease and their clinical significance.
IV. Understand the common hematological disorders and investigations necessary to diagnose them.
V. Understand in brief about the hematological disease and their resultant effects on the human body.
VI. Describe process of diseases, diagnosis of it and the role of immunity.
VII. Define characteristics of the micro-organisms causing diseases..

Setting Question Paper will be done as per Section A (Pathology) and Section B (Microbiology) , 50 Marks allotted to each section

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Suggested Teaching Learning methods	Suggested Assessment methods	Number required to certify P	Vertical integration	Horizontal Integration
PATHOLOGY									
Topic: Introduction to Pathology		**Number of competencies: (02)**			**Number of procedures that require certification: (NIL)**				
PM 1.1	Describe the role of a pathologist in diagnosis and management of disease	K	K	Y	Departmental orientation	Written/ Viva voce			
PM 1.2	Enumerate common definitions and terms used in Pathology	K	K	Y	Lecture, Small group discussion	Written/ Viva voce

PM 8.6	Define and describe the pathogenesis and pathology of HIV and AIDS	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine	Microbiology
PM 8.7	Define and describe the pathogenesis of other common autoimmune diseases	K	KH	N	Lecture, Small group discussion	Written/ Viva voce		General Medicine	
Topic: Infections and Infestations Number of competencies: (04) Number of procedures that require certification: (NIL)									
PM 9.1	Define and describe the pathogenesis and pathology of malaria	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine	Microbiology

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Suggested Teaching Learning methods	Suggested Assessment methods	Number required to certify P	Vertical integration	Horizontal Integration
PM 9.2	Define and describe the pathogenesis and pathology of cysticercosis	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine	Microbiology
PM 9.3	Define and describe the pathogenesis and pathology of leprosy	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine	Microbiology
PM 9.4	Define and describe the pathogenesis and pathology of common bacterial, viral, protozoal and helminthic diseases	K	KH	N	Lecture, Small group discussion	Written/ Viva voce		General Medicine	Microbiology
Topic: Genetic and paediatric diseases		**Number of competencies: (03)**				**Number of procedures that require certification: (NIL)**			
PM 10.1	Describe the pathogenesis and features of common cytogenetic abnormalities and mutation in childhood.	K	KH	N	Lecture, Small group discussion	Written/ Viva voce		Pediatrics	

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Suggested Teaching Learning methods	Suggested Assessment methods	Number required to certify P	Vertical integration	Horizontal Integration
PM 10.2	Describe the pathogenesis and pathology of tumour and tumour-like conditions in infancy and childhood	K	KH	N	Lecture, Small group discussion	Written/ Viva voce		Pediatrics	
PM 10.3	Describe the pathogenesis of common storage disorders in infancy and childhood	K	KH	N	Lecture, Small group discussion	Written/ Viva voce		Pediatrics	
Topic: Environmental and nutritional diseases Number of competencies: (03) Number of procedures that require certification: (NIL)									
PM 11.1	Enumerate and describe the pathogenesis of disorders causedby air pollution, tobacco and alcohol	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce			Community Medicine
PM 11.2	Describe the pathogenesis of disorders caused by proteincalorie malnutrition and starvation	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		Biochemistry, Pediatrics	

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Suggested Teaching Learning methods	Suggested Assessment methods	Number required to certify P	Vertical integration	Horizontal Integration
PM 11.3	Describe the pathogenesis of obesity and its consequences	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine	
Topic: Introduction to haematology		**Number of competencies: (05)**				**Number of procedures that require certification: (NIL)**			
PM 12.1	Describe haematopoiesis and extramedullary haematopoiesis	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine	
PM 12.2	Describe the role of anticoagulants in haematology	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine	
PM 12.3	Define and classify anaemia	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine	
PM 12.4	Enumerate and describe the investigation of anaemia	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine	

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Suggested Teaching Learning methods	Suggested Assessment methods	Number required to certify P	Vertical integration	Horizontal Integration
PM 12.5	Perform, Identify and describe the peripheral blood picture in anaemia	S	SH	Y	DOAP session	Skill assessment		General Medicine	
Topic: Microcytic anaemia		**Number of competencies: (02)**				**Number of procedures that require certification: (NIL)**			
PM 13.1	Describe iron metabolism	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		Biochemistry	
PM 13.2	Describe the etiology, investigations and differential diagnosis of microcytic hypochromic anemia	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine	
Topic: Macrocytic anemia		**Number of competencies:(04)**				**Number of procedures that require certification: (NIL)**			
PM 14.1	Describe the metabolism of Vitamin B12 and the etiology and pathogenesis of B12 deficiency	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		Biochemistry, General Medicine	

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Suggested Teaching Learning methods	Suggested Assessment methods	Number required to certify P	Vertical integration	Horizontal Integration
PM 14.2	Describe laboratory investigations of macrocytic anemia	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine	
PM 14.3	Identify and describe the peripheral blood picture of macrocytic anemia.	S	SH	Y	DOAP session	Skill assessment			
PM 14.4	Enumerate the differences and describe the etiology and distinguishing features of megaloblastic and non-megaloblastic macrocytic anemia	K	KH	N	Lecture, Small group discussion	Written/ Viva voce		General Medicine	
Topic: Haemolytic anemia		**Number of competencies: (05)**				**Number of procedures that require certification: (NIL)**			
PM 15.1	Define and classify haemolytic anemia	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		Biochemistry, General Medicine	
PM 15.2	Describe the pathogenesis and clinical features and hematologic indices of haemolytic anemia.	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		Biochemistry, General Medicine	

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Suggested Teaching Learning methods	Suggested Assessment methods	Number required to certify P	Vertical integration	Horizontal Integration
PM 15.3	Describe the pathogenesis, features, hematologic indices and peripheral blood picture of sickle cell anemia and thalassemia	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		Biochemistry, General Medicine	
PM 15.4	Describe the etiology pathogenesis, hematologic indices and peripheral blood picture of Acquired haemolytic anemia	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		Biochemistry, General Medicine	
PM 15.5	Describe the peripheral blood picture in different haemolytic anemias	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine	
Topic: Aplastic anemia	**Number of competencies: (01)**				**Number of procedures that require certification: (NIL)**				
PM 16.1	Enumerate the etiology, pathogenesis and findings in aplastic anemia	K	K	N	Lecture, Small group discussion	Written/ Viva voce		General Medicine	

NCAHP Since-2021

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Suggested Teaching Learning methods	Suggested Assessment methods	Number required to certify P	Vertical integration	Horizontal Integration
Topic: Leukocyte disorders Number of competencies: (02)					**Number of procedures that require certification: (NIL)**				
PM 17.1	Enumerate and describe the causes of leucocytosis leukopenia lymphocytosis and leukemoid reactions	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce			
PM 17.2	Describe the etiology, genetics, pathogenesis classification, features, hematologic features of acute and chronic leukaemia	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce			
Topic: Lymph node and spleen		**Number of competencies: (04)**			**Number of procedures that require certification: (NIL)**				
PM 18.1	Enumerate the causes and describe the differentiating features of lymphadenopathy	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Surgery	
PM 18.2	Describe the pathogenesis and pathology of tuberculous lymphadenitis	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Surgery	

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Suggested Teaching Learning methods	Suggested Assessment methods	Number required to certify P	Vertical integration	Horizontal Integration
PM 18.3	Describe and discuss the pathogenesis, pathology and the differentiating features of Hodgkin's and non-Hodgkin's lymphoma	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Surgery	
PM 18.4	Enumerate and differentiate the causes of splenomegaly	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Surgery, General Medicine	
Topic: Haemorrhagic disorders		**Number of competencies: (04)**				**Number of procedures that require certification: (NIL)**			
PM 19.1	Describe normal haemostasis	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce			
PM 19.2	Classify and describe the etiology, pathogenesis and pathology of vascular and platelet disorders including ITP and haemophilia's	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		Pediatrics	

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Suggested Teaching Learning methods	Suggested Assessment methods	Number required to certify P	Vertical integration	Horizontal Integration
PM 19.3	Define and describe disseminated intravascular coagulation, its laboratory findings and diagnosis of disseminated intravascular coagulation	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine	
PM 19.4	Define and describe disseminated intravascular coagulation, its laboratory findings and diagnosis of Vitamin K deficiency	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine	
Topic: Blood banking and transfusion **Number of competencies: (05)** **Number of procedures that require certification: (NIL)**									
PM 20.1	Classify and describe blood group systems (ABO and RH)	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce			
PM 20.2	Enumerate blood components and describe their clinical uses	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Surgery, General Medicine	

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Suggested Teaching Learning methods	Suggested Assessment methods	Number required to certify P	Vertical integration	Horizontal Integration
PM 20.3	Enumerate and describe infections transmitted by blood transfusion	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce			Microbiology
PM 20.4	Describe transfusion reactions and enumerate the steps in the investigation of a transfusion reaction	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine	
PM 20.5	Enumerate the indications and describe the principles and procedure of autologous transfusion	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce			
Topic: Clinical Pathology Number of competencies: (01) Number of procedures that require certification: (NIL)									
PM 21.1	Describe abnormal findings in body fluids in various disease states	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce			

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Suggested Teaching Learning methods	Suggested Assessment methods	Number required to certify P	Vertical integration	Horizontal Integration
Topic: Gastrointestinal Tract		**Number of competencies: (06)**			**Number of procedures that require certification: (NIL)**				
PM 22.1	Describe the etiology, pathogenesis, pathology and clinical features of oral cancers	K	KH	N	Lecture, Small group discussion	Written/ Viva voce		Dentistry	
PM 22.2	Describe the etiology, pathogenesis, pathology, microbiology, clinical and microscopic features of peptic ulcer disease	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine	
PM 22.3	Describe and etiology and pathogenesis and pathologic features of carcinoma of the stomach	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Surgery	
PM 22.4	Describe and etiology and pathogenesis and pathologic features of Tuberculosis of the intestine	K	KH	N	Lecture, Small group discussion	Written/ Viva voce		General Surgery	

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Suggested Teaching Learning methods	Suggested Assessment methods	Number required to certify P	Vertical integration	Horizontal Integration
PM 22.5	Describe and etiology and pathogenesis and pathologic and distinguishing features of Inflammatory bowel disease	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Surgery	
PM 22.6	Describe and etiology and pathogenesis and pathologic and distinguishing features of carcinoma of the colon	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Surgery	
Topic: Hepatobiliary system		**Number of competencies: (05)**				**Number of procedures that require certification: (NIL)**			
PM 23.1	Describe bilirubin metabolism, enumerate the etiology and pathogenesis of jaundice, distinguish between direct and indirect hyperbilirubinemia	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		Biochemistry, General Medicine	

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Suggested Teaching Learning methods	Suggested Assessment methods	Number required to certify P	Vertical integration	Horizontal Integration
PM 23.2	Describe the pathophysiology and pathologic changes seen in hepatic failure and their clinical manifestations, complications and consequences	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine, General Surgery	
PM 23.3	Describe the etiology and pathogenesis of viral and toxic hepatitis: distinguish the causes of hepatitis based on the clinical and laboratory features. Describe the pathology, complications and consequences of hepatitis	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine	
PM 23.4	Describe the pathophysiology, pathology and progression of alcoholic liver disease including cirrhosis	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine, General Surgery	

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Suggested Teaching Learning methods	Suggested Assessment methods	Number required to certify P	Vertical integration	Horizontal Integration
PM 23.5	Describe the etiology, pathogenesis and complications of portal hypertension	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine, General Surgery	
Topic: Respiratory system Number of competencies: (07) Number of procedures that require certification: (NIL)									
PM 24.1	Define and describe the etiology, types, pathogenesis, stages, morphology and complications of pneumonia	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine	Microbiology
PM 24.2	Describe the etiology, gross and microscopic appearance and complications of lung abscess	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine	Microbiology
PM 24.3	Define and describe the etiology, types, pathogenesis, stages, morphology and complications and evaluation of Obstructive airway disease (OAD) and bronchiectasis	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		Physiology, General Medicine	Microbiology

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Suggested Teaching Learning methods	Suggested Assessment methods	Number required to certify P	Vertical integration	Horizontal Integration
PM 24.4	Define and describe the etiology, types, pathogenesis, stages, morphology microscopic appearance and complications of tuberculosis	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine	Microbiology
PM 24.5	Define and describe the etiology, types, exposure, environmental influence, pathogenesis, stages, morphology, microscopic appearance and complications of Occupational lung disease	K	KH	Y	Lecture, Small group discussion	Written / Viva voce		General Medicine, Community Medicine	
PM 24.6	Define and describe the etiology, types, exposure, genetics environmental influence, pathogenesis, stages, morphology, microscopic appearance, metastases and complications of tumors of the lung and pleura	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine	

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Suggested Teaching Learning methods	Suggested Assessment methods	Number required to certify P	Vertical integration	Horizontal Integration
PM 24.7	Define and describe the etiology, types, exposure, genetics environmental influence, pathogenesis, morphology, microscopic appearance and complications of mesothelioma	K	KH	N	Lecture, Small group discussion	Written / Viva voce		General Medicine, Community Medicine	
Topic: Cardiovascular system		**Number of competencies: (09)**				**Number of procedures that require certification: (NIL)**			
PM 25.1	Distinguish arteriosclerosis from atherosclerosis. Describe the pathogenesis and pathology of various causes and types of arteriosclerosis	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine	
PM 25.2	Describe the etiology, dynamics, pathology types and complications of aneurysms including aortic aneurysms	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine	

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Suggested Teaching Learning methods	Suggested Assessment methods	Number required to certify P	Vertical integration	Horizontal Integration
PM 25.3	Describe the etiology, types, stages pathophysiology, pathology and complications of heart failure	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine, Physiology	
PM 25.4	Describe the etiology, pathophysiology, pathology, gross and microscopic features, criteria and complications of rheumatic fever	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine	Microbiology
PM 25.5	Describe the epidemiology, risk factors, etiology, pathophysiology, pathology, presentations, gross and microscopic features, diagnostic tests and complications of ischemic heart disease	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine

PM 27.9	Describe the etiology, hormonal dependence and morphology of endometrial hyperplasia	K	KH	N	Lecture, Small group discussion	Written/ Viva voce		Obstetrics & Gynaecology	
Topic: Breast Number of competencies: (03) Number of procedures that require certification: (NIL)									
PM 28.1	Classify and describe the types, etiology, pathogenesis, pathology and hormonal dependency of benign breast disease	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		Human Anatomy, General Surgery	
PM 28.2	Classify and describe the epidemiology, pathogenesis, classification, morphology, prognostic factors, hormonal dependency, staging and spread of carcinoma of the breast	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Surgery	

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Suggested Teaching Learning methods	Suggested Assessment methods	Number required to certify P	Vertical integration	Horizontal Integration
PM 28.3	Enumerate and describe the etiology, hormonal dependency and pathogenesis of gynecomastia	K	KH	N	Lecture, Small group discussion	Written/ Viva voce		Pediatrics, General Medicine	
Topic: Endocrine system Number of competencies: (09) Number of procedures that require certification: (NIL)									
PM 29.1	Enumerate, classify and describe the etiology, pathogenesis, pathology and iodine dependency of thyroid swellings	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		Human Anatomy, Physiology, General Medicine,	
PM 29.2	Describe the etiology, cause, iodine dependency, pathogenesis, manifestations, laboratory and imaging features and course of thyrotoxicosis	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		Physiology, General Medicine	
PM 29.3	Describe the etiology, pathogenesis, manifestations, laboratory and imaging features and course of thyrotoxicosis/ hypothyroidism	K	KH	Y	Lecture, Small group	Written/ Viva voce		Physiology, General Medicine	

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Suggested Teaching Learning methods	Suggested Assessment methods	Number required to certify P	Vertical integration	Horizontal Integration
PM 29.4	Classify and describe the epidemiology, etiology, pathogenesis, pathology, clinical laboratory features, complications and progression of diabetes mellitus	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		Physiology, General Medicine	
PM 29.5	Describe the etiology, genetics, pathogenesis, manifestations, laboratory and morphologic features of hyperparathyroidism	K	KH	N	Lecture, Small group discussion	Written/ Viva voce		Physiology, General Medicine	
PM 29.6	Describe the etiology, pathogenesis, manifestations, laboratory, morphologic features, complications and metastases of pancreatic cancer	K	KH	N	Lecture, Small group discussion	Written/ Viva voce		General Surgery	

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Suggested Teaching Learning methods	Suggested Assessment methods	Number required to certify P	Vertical integration	Horizontal Integration
PM 29.7	Describe the etiology, pathogenesis, manifestations, laboratory, morphologic features, complications of adrenal insufficiency	K	KH	N	Lecture, Small group discussion	Written/ Viva voce		Physiology, General Medicine	
PM 29.8	Describe the etiology, pathogenesis, manifestations, laboratory, morphologic features, complications of Cushing's syndrome	K	KH	N	Lecture, Small group discussion	Written/ Viva voce		Physiology, General Medicine	
PM 29.9	Describe the etiology, pathogenesis, manifestations, laboratory and morphologic features of adrenal neoplasms	K	KH	N	Lecture, Small group discussion	Written/ Viva voce		Human Anatomy, Physiology, General Medicine, General Surgery	

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Suggested Teaching Learning methods	Suggested Assessment methods	Number required to certify P	Vertical integration	Horizontal Integration
Topic: Bone and soft tissue		**Number of competencies: (05)**			**Number of procedures that require certification: (NIL)**				
PM 30.1	Classify and describe the etiology, pathogenesis, manifestations, radiologic and morphologic features and complications of osteomyelitis	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		Human Anatomy, Orthopaedics	Microbiology
PM 30.2	Classify and describe the etiology, pathogenesis, manifestations, radiologic and morphologic features and complications and metastases of bone tumors	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		Orthopaedics	
PM 30.3	Classify and describe the etiology, pathogenesis, manifestations, radiologic and morphologic features and complications and metastases of soft tissue tumors	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		Orthopaedics	

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Suggested Teaching Learning methods	Suggested Assessment methods	Number required to certify P	Vertical integration	Horizontal Integration
PM 30.4	Classify and describe the etiology, pathogenesis, manifestations, radiologic and morphologic features and complications of Paget's disease of the bone	K	KH	N	Lecture, Small group discussion	Written/ Viva voce		Orthopaedics	
PM 30.5	Classify and describe the etiology, immunology, pathogenesis, manifestations, radiologic and laboratory features, diagnostic criteria and complications of rheumatoid arthritis	K	KH	N	Lecture, Small group discussion	Written/ Viva voce		General Medicine	
Topic: Skin Number of competencies: (03) Number of procedures that require certification: (NIL)									
PM 31.1	Describe the risk factors pathogenesis, pathology and natural history of squamous cell carcinoma of the skin	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		Dermatology, Venereology & Leprosy	

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Suggested Teaching Learning methods	Suggested Assessment methods	Number required to certify P	Vertical integration	Horizontal Integration
PM 31.2	Describe the risk factors pathogenesis, pathology and natural history of basal cell carcinoma of the skin	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		Dermatology, Venereology & Leprosy	
PM 31.3	Describe the distinguishing features between a nevus and melanoma. Describe the etiology, pathogenesis, risk factors morphology clinical features and metastases of melanoma	K	KH	N	Lecture, Small group discussion	Written/ Viva voce		Dermatology, Venereology & Leprosy	
Topic: Central Nervous System		**Number of competencies: (02)**					**Number of procedures that require certification: (NIL)**		
PM 32.1	Describe the etiology, types and pathogenesis, differentiating factors, CSF findings in meningitis	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine	Microbiology

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Suggested Teaching Learning methods	Suggested Assessment methods	Number required to certify P	Vertical integration	Horizontal Integration
PM 32.2	Classify and describe the etiology, genetics, pathogenesis, pathology, presentation sequelae and complications of CNS tumors	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		Pediatrics	
Topic: Eye Number of competencies: (01) Number of procedures that require certification: (NIL)									
PM 33.1	Describe the etiology, genetics, pathogenesis, pathology, presentation, sequelae and complications of retinoblastoma	K	KH	N	Lecture, Small group discussion	Written/ Viva voce		Ophthalmology

	MICROBIOLOGY								
Topic: General Microbiology and Immunity Number of competencies: (10) **Number of procedures that require certification: (NIL)**									
PM 34.1	Describe the different causative agents of Infectious diseases, the methods used in their detection, and discuss the role of microbes in health and disease	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce			
PM 34.2	Describe the epidemiological basis of common infectious diseases	K	KH	Y	Lecture	Written/ Viva voce			Community Medicine
PM 34.3	Classify and describe the different methods of sterilization and disinfection. Discuss the application of the different methods in the laboratory, in clinical and surgical practice	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Surgery	

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Suggested Teaching Learning methods	Suggested Assessment methods	Number required to certify P	Vertical integration	Horizontal Integration
PM 34.4	Choose the most appropriate method of sterilization and disinfection to be used in specific situations in the laboratory, in clinical and surgical practice	K	KH	Y	Small group discussion, Case discussion	Written/Viva voce/OSPE		General Surgery	
PM 34.5	Describe the mechanisms of drug resistance, and the methods of antimicrobial susceptibility testing and monitoring of antimicrobial therapy	K	K	Y	Lecture, Small group discussion	Written/ Viva voce			Pharmacology
PM 34.6	Describe the immunological mechanisms in health	K	KH	Y	Lecture	Written/ Viva voce			Pathology
PM 34.7	Describe the mechanisms of immunity and response of the host immune system to infections	K	KH	Y	Lecture	Written/ Viva voce		Pediatrics	Pathology

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Suggested Teaching Learning methods	Suggested Assessment methods	Number required to certify P	Vertical integration	Horizontal Integration
PM 34.8	Discuss the immunological basis of vaccines and describe the Universal Immunisation schedule	K	KH	Y	Lecture	Written/ Viva voce		Paediatrics	
PM 34.9	Describe the immunological mechanisms in immunological disorder (hypersensitivity, autoimmune disorders and immunodeficiency states) and discuss the laboratory methods used in detection.	K	KH	Y	Lecture	Written/ Viva voce		Paediatrics	
PM 34.10	Describe the immunological mechanisms of transplantation and tumor immunity	K	KH	Y	Lecture	Written/ Viva voce			

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Suggested Teaching Learning methods	Suggested Assessment methods	Number required to certify P	Vertical integration	Horizontal Integration
Topic: CVS and Blood	**Number of competencies: (06)**				**Number of procedures that require certification: (NIL)**				
PM 35.1	Describe the etiologic agents in rheumatic fever and their diagnosis	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine	Pathology
PM 35.2	Describe the classification etio- pathogenesis, clinical features and discuss the diagnostic modalities of Infective endocarditis	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine	Pathology
PM 35.3	List the common microbial agents causing anemia. Describe the morphology, mode of infection and discuss the pathogenesis, clinical course, diagnosis and prevention and treatment of the common microbial agents causing Anaemia	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine	Pathology

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Suggested Teaching Learning methods	Suggested Assessment methods	Number required to certify P	Vertical integration	Horizontal Integration
PM 35.4	Describe the etio-pathogenesis and discuss the clinical evolution and the laboratory diagnosis of kalaazar, malaria, filariasis and other common parasites prevalent in India	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine	Pathology
PM 35.5	Identify the causative agent of malaria and filariasis	K	SH	Y	DOAP session	Skill assessment		General Medicine	
PM 35.6	Describe the epidemiology, the etio-pathogenesis, evolution complications, opportunistic infections, diagnosis, prevention and the principles of management of HIV	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine	Pathology

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Suggested Teaching Learning methods	Suggested Assessment methods	Number required to certify P	Vertical integration	Horizontal Integration
Topic: Gastrointestinal and hepatobiliary system Number of competencies: (06) **Number of procedures that require certification: (NIL)**									
PM 36.1	Enumerate the microbial agents causing diarrhea and dysentery. Describe the epidemiology, morphology, pathogenesis, clinical features and diagnostic modalities of these agents	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine, Paediatrics	Pathology
PM 36.2	Describe the enteric fever pathogens and discuss the evolution of the clinical course and the laboratory diagnosis of the diseases caused by them	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine	Pharmacology, Pathology
PM 36.3	Enumerate the causative agents of food poisoning and discuss the pathogenesis, clinical course and laboratory diagnosis	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine	Pharmacology

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Suggested Teaching Learning methods	Suggested Assessment methods	Number required to certify P	Vertical integration	Horizontal Integration
PM 36.4	Describe the etio-pathogenesis of Acid peptic disease (APD) and the clinical course. Discuss the diagnosis and management of the causative agent of APD	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine	Pharmacology, Pathology
PM 36.5	Describe the epidemiology, the etio-pathogenesis and discuss the viral markers in the evolution of Viral hepatitis. Discuss the modalities in the diagnosis and prevention of viral hepatitis	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine	Pathology
PM 36.6	Choose the appropriate laboratory test in the diagnosis of viral hepatitis with emphasis on viral markers	K	KH	Y	Small group discussion, Case discussion	Written/ Viva voce/ OSPE		General Medicine	Pathology

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Suggested Teaching Learning methods	Suggested Assessment methods	Number required to certify P	Vertical integration	Horizontal Integration
Topic: Musculoskeletal system skin and soft tissue infections Number of competencies: (03) Number of procedures that require certification: (NIL)									
PM 37.1	Enumerate the microbial agents causing anaerobic infections. Describe the etiopathogenesis, clinical course and discuss the laboratory diagnosis of anaerobic infections	K	KH	Y	Lecture	Written/ Viva voce		General Medicine	
PM 37.2	Describe the etiopathogenesis, clinical course and discuss the laboratory diagnosis of bone & joint infections	K	KH	Y	Lecture	Written/ Viva voce		Orthopaedics	
PM 37.3	Describe the etio-pathogenesis of infections of skin and soft tissue and discuss the clinical course and the laboratory diagnosis	K	KH	Y	Lecture	Written/ Viva voce		Dermatology, Venereology & Leprosy, General Surgery	

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Suggested Teaching Learning methods	Suggested Assessment methods	Number required to certify P	Vertical integration	Horizontal Integration
Topic: Central Nervous System Infections Number of competencies: (02) Number of procedures that require certification: (NIL)									
PM 38.1	Describe the etiopathogenesis, clinical course and discuss the laboratory diagnosis of meningitis	K	KH	Y	Lecture	Written/ Viva voce		General Medicine, Pediatrics	Pathology
PM 38.2	Describe the etiopathogenesis, clinical course and discuss the laboratory diagnosis of encephalitis	K	KH	Y	Lecture	Written/ Viva voce		General Medicine, Pediatrics	Pathology
Topic: Genitourinary & Sexually transmitted infections Number of competencies: (03) Number of procedures that require certification: (NIL)									
PM 40.1	Describe the etio-pathogenesis and discuss the laboratory diagnosis of infections of genitourinary system	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Surgery	

Code No.	COMPETENCY The student should be able to	Domain K/S/A/C	Level K/KH/SH/P	Core Y/N	Suggested Teaching Learning methods	Suggested Assessment methods	Number required to certify P	Vertical integration	Horizontal Integration
PM 40.2	Describe the etio-pathogenesis and discuss the laboratory diagnosis of sexually transmitted infections. Recommend preventive measures	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		Dermatology, Venereology & Leprosy, Obstetrics & Gynaecology	
PM 40.3	Describe the etio-pathogenesis, clinical features, the appropriate method for specimen collection, and discuss the laboratory diagnosis of Urinary tract infections	K	KH	Y	Lecture, Small group discussion	Written/ Viva voce		General Medicine

PHARMACOLOGY

Course Description: This course introduces the student to basic pharmacology of common drugs used, their importance in the overall treatment including Occupational Therapy. The student after completing the course will be able to understand the general principles of drug action and the handling of drugs by the body. The student will be aware of the contribution of both drug and Occupational Therapy factors in the outcome of treatment. Details of chemistry of molecules should be avoided.

Goals:

Second year Occupational Therapy student to acquire knowledge on action of pharmacokinetics and pharmacodynamics. The students to acquire knowledge on blood, behavioral and cardiovascular pharmacology.:

Course Objectives KNOWLEDGE

Student will be able to

I. Describe the concepts of pharmacology (including pharmacokinetics and pharmacodynamics) of commonly used drugs. (K)
II. Discuss the effects of commonly used drugs on body function. Know different types of cells and describe their functions
III. Discuss the therapeutic and adverse effects, contraindications, and precautions for commonly used drugs. (KH)
IV. Discuss the pharmacological effects of drugs used in the management pain, inflammatory, cardio-vascular, respiratory, neurological and oncological disorders.
V. Explain the effect of commonly prescribed on exercise and movement. (KH)
VI. Identify the red and yellow flags for Occupational Therapy prescription based on the pharmacological effect of commonly prescribed drugs. (KH)

COMPETENCY TABLE: PHARMACOLOGY

PSYCHOLOGY

Course Description: This course will develop the basic knowledge of elements of psychology along with the normal development of a human being through life span and the psychological, behavioral condition in school children. The course will develop the basic knowledge about psychological issues related to various health conditions, work and sports. This course will also develop the basic knowledge of various types of abnormal behaviour. This course also develops the utilization and importance of Psychology with respect to Occupational Therapy treatment.

Goal: The broad goal to teach the second year BOT students the psychological development of human being through life span. They understand the elementary principles of behaviour for applying in the therapeutic environment. They will have proficiency based on written evaluation.

They understand abnormal behaviours signs & symptoms, probable psychosocial problems & psychological management without the pharmacological intervention. They understand the application of experimental psychology & principles of psychosocial management in the industrial setups' psychology

OBJECTIVES:

A. KNOWLEDGE:

At the end of second BOT the student will be able to:

i. Describe the Fields of Psychology, Schools of thoughts related to Psychology
ii. Explain the terms attention, perception, motivation.
iii. Describe the concept emotion, cognition, thinking.
iv. Describe the principles of learning.

v. Describe various aspect of psychosocial learning & psychological maturation during human development, growth, & alterations during aging process

vi. Describe the different aspects of school Psychology- the psychological, behavioral issues related to school children and their therapeutic intervention

vii. Describe the abnormal behaviours & clinical symptoms

viii. Explain the psychosocial management of abnormal behaviours.

ix. Describe the Intellectual Disabilities & Developmental disorders of childhood & adolescence

x. Describe the psychosocial intervention for Childhood & adolescence disorder

xi. Describe various aspect of psychosocial learning & psychological maturation during human development, growth, & alterations during aging process

xii. Describe the different neuropsychological experiments on sensory system, learning & retention, memory, perception, emotion, motor behaviours & reaction time, Motivation & rewards, attention

xiii. Describe the psychosocial aspects of industrial Psychology

SKILLS:

At the end of the course, the student shall be able to:

Understand the skills to assess sensory system, learning & retention, memory, perception, emotion

NCAHP Since-2021

Competency Table: PSYCHOLOGY

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/Ps	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
			PSYCHOLOGY					
Topic– General Psychology No of competencies -7								
PSY 1.1	Describe the Fields of Psychology, Schools of thoughts related to Psychology.	K	K	Y	Lecture	written		
PSY I 2	Define Attention & explain the classification of attention.	K	K, KH	Y	Lecture	Written		
PSY 1.3	Define & explain the Perception	K	KH	Y	Lecture	Written		OTDP II
PSY 1.4	Define Stress. Explain stress cycle, and coping strategies from Stress	K	KH	Y	Lecture,	Written		
PSY 1.5	Explain difference & similarities in term Feeling Emotions.	K	K, KH	Y	Lecture	written		

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/Ps	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration

BIOMECHANICS & KINESIOLOGY

COURSE DESCRIPTION: Course explores Biomechanical & Kinesiological aspects of various Joints of upper extremity in the Human body and its importance in OT Practice. This course supplements the knowledge of anatomy and enables the student to have a better understanding of the principles of biomechanics. It builds concepts of training strategies that can be used to train the various aspects of mobility. It emphasizes on fabrication & scientific basis for the need of splints, orthoses & adaptive devices in Occupational Therapy.

GOAL: The broad goal to teach the second year BOT students the theoretical basis for joint mobility including the knowledge of Biomechanics & kinesiology, and Knowledge of splints, orthoses & adaptive devices in Occupational therapy.

OBJECTIVES:

B. KNOWLEDGE:

At the end of the course, the student shall be able to:

i. Explain Biomechanics & kinesiology related to Human body
ii. Explain the concept of application of knowledge of Biomechanics & kinesiology in Occupational Therapy
iii. Describe the concepts of Orthoses, Splinting & adaptive devices & application to Occupational Therapy
iv. Develop, designing and fabricating Orthosis based on Biomechanical Principles
v. Describe the concept of application of knowledge of Biomechanics & kinesiology in Occupational Therapy
vi. Describe the Importance of mobility in Participation in life skills
vii. Describe Transfer techniques for wheelchair mobility, Gait analysis & pathological gaits

C. SKILLS:

At the end of the course, the student shall be able to:

i. Develop Skills to assess the effect of Patho-mechanics on the joints & application of general Biomechanics to analyse movements

ii. Demonstrate the effective transfer techniques on normal subjects Demonstrate the skills of designing & fabricating splints, Orthoses & adaptive devices

iii. The teaching and training at developing the attitude in students to apply the knowledge & skills he/she acquires for benefit and welfare of the patients.

iv. Students should develop behavioral skills and humanitarian approach while communicating with patients about the need for orthoses, adaptive devices as individuals, relatives, society at large & the co- professionals

ATTITUDE:

1 The teaching and training at developing the attitude in students to apply the knowledge & skills he/she acquires for benefit and welfare of the patients.

2 It is necessary to develop in students a sense of responsibility towards assessment of mobility skills

3 Understanding of safe transfer techniques & their importance to the dependent patients

4 Students should develop behavioural skills and humanitarian approach while communicating with patients, as individuals, relatives, society at large & the co- professionals

Scheme of examination for University Practical exam ;100 Marks 100

Splint making & Viva Voce	Transfer Techniques on normal subjects & Viva Voce	Pathological Gait analysis on patients & Viva Voce	Adaptive device making & Viva voce	Presentation & Communication skills	Total
20marks	20 marks	20 marks	20 marks	20 marks	100 marks

BMK 1.4	Describe the concept of Gravity &its application to internally &externally applied forces	K	K, KH, S		Lecture, Small group discussion	Written		
BMK 1.5	Classify &describe different force systems	K/C	K, KH		Lecture, Seminars	Written		

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/P	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
Topic – Kinetics considering Rotatory & Translatory Forces & motion					**No of competencies -5**			
BMK 2.1	Understand &explain the Torque or Moment of Force	K	KH	Y	Lecture	Written		
BMK 2.2	Describe the concept of muscle forces	K	K	Y	Lecture	Written		
BMK 2.3	Classify Levers &explain the application of Levers in the body	K	K, KH	Y	Lecture, Small group discussion	Written		
BMK 2.4	Describe composition &Resolution of Forces	K	K,		Lecture,	Written		
BMK 2.5	Explain application of composition &Resolution of Forces in the Human body	K	K, KH		Lecture, Seminars, Small group discussion	Written, OSPE		
Topic - Joint Structure & Function					**No of competencies -4**			
BMK 3.1	Describe the components in human Joints	K	K	Y	Lecture	written	Anatomy	

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/P	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
BMK 3.2	Understand the different designs of the joints	K	KH	Y	Lecture, Seminar	written		
BMK 3.3	Describe the kinematic chains, Joint motion & applied Biomechanics.	K/S	K, KH	Y	Lecture, Small Group discussion	Written, Skill assessment (OSPE)		
BMK 3.4	Describe Classification of muscles, factors affecting muscle function & applied Biomechanics of muscles	K	KH	Y	Lecture, Small Group discussion	Written		
Topic: Upper Extremity Joint Complexes No of competencies -6								
BMK 4.1	Describe the components of Shoulder complexes.	K	KH	Y	Lecture	Written	Anatomy	
BMK 4.2	Describe the integrated functions of shoulder complex with reference to specific actions of the muscles acting on the shoulder joint.	K	KH	Y	Lecture	Written		
BMK 4.3	Describe the components & the functions of different muscles around the elbow joint.	K	KH	Y	Lecture	Written		

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/P	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
BMK 4.4	Describe the mobility & stability components & their action at Proximal & distal radioulnar Joint.	K	KH	Y	Lecture	Written		
BMK 4.5	Describe the components & the biomechanical applications at the wrist joint.	K	K, KH	Y	Lecture	Written		
BMK 4.6	Describe the Hand complex, importance of functional positioning & functions of hand.	K	K, KH	Y	Lecture, Small Group discussion	Written		
Topic 5: Orthotics No of competencies -7								
BMK 5.1	Describe goals of splinting& classify hand splint.	K	KH	Y	Lecture, small group discussion	Written	Anatomy. OT in MSK, OT in Medical conditions, OT in surgical conditions, OT in neurological Conditions.	OTDP I & II
BMK 5.2	Describe the application of Hand splints in different cases.	K	K.KH	Y	Lecture/	Written		

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/P	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
BMK 5.3	Identify splint types and materials used	K/S/C	KH, SH (P under supervision)	Y	Lecture, DOAP, Skill training under supervision	Written, Skill assessment, Practical, OSPE		
BMK 5.4	Demonstrate the appropriate method of fabrication of Hand Splints (Resting, Dynamic-flexor /extensor, Thumb Spica & C- bar, finger splints	K	K, KH, SH (P Under supervision)	Y	Lecture/small group discussion /DOAP session, Skill training	Written Skill assessment, practical, OSPE		
BMK 5.5	Describe goals of Lower extremity orthoses& classify orthoses							
BMK 5.6	Identify material used & demonstrate the fabrication of the appropriate method of fabrication of Lower extremity orthosis (Static & Dynamic)	K	K, KH SH (P Under supervision)	Y	Lecture/small group discussion /Skill training	Written Skill assessment, practical, OSPE		

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/P	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
Topic 6: Adaptive devices No of competencies :2								
BMK 6.1	Understand & explain the need of Adaptive devices	K	KH	Y	Lecture, Small group discussion		OT in MSK, OT in Medical conditions, OT in surgical conditions, OT in neurological Conditions.	OTDP I & II
BMK 6.2	Identify the material used, indications & fabricate adaptive device to improve the participation of patients (Universal cuff, Writing Device, Reacher/ dressing stick, long handle Scrubber)	K	K, KH SH (P Under supervision)	Y	Lecture/small group discussion /Skill training			
Topic: Lower Extremity Joint Complexes No of competencies -8								
BMK 7.1	Describe the Structure of Hip Joint complexes	K	K	Y	Lecture	Written	Anatomy	
BMK 7.2	Describe the integrated functions of Hip complex with reference to specific actions of the muscles, forces during stance & the stability mechanism	K	KH	Y	Lecture	Written, Small group discussion		

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/P	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
BMK 7.3	Describe the components of Tibiofemoral joint & Patellofemoral joint	K	KH	Y	Lecture	Written		
BMK 7.4	Understand functions of different alignments of bones, Q angle, functions of muscles, Ligaments and other supporting structures. Anterior - posterior and Medial - Lateral stability, mobility mechanism	K	KH	Y	Lecture	Written, seminar		
BMK 7.5	Describe the Structure &components of Ankle Joint complexes	K	K	Y	Lecture	Written		
BMK 7.6	Describe the integrated functions of Ankle joint with reference to specific actions of the muscles, forces during phases of gait cycle	K	KH	Y	Lecture	Written, Small group discussion		
BMK 7.7	Describe the components of Foot complex	K	K	Y	Lecture	Written		

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/P	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
BMK 7.8	Understand the concepts & functions of arches of Foot	K	KH	Y	Lecture	Written, Small group discussion		
Topic: Temperomandibular Joint No of competency 1								
BMK 8.1	Describe General structure and function of temporo- mandibular joint& applied Biomechanics in temporomandibular joint	K	KH	Y	Lecture	Writtenn	Anatomy	
Topic: Axial Skeletal Joint Complexes No of competencies 1								
BMK 9.1	Describe regional structure & functions of different regions of vertebral column	K	KH	Y	Lecture	Writtenn	Anatomy	
Topic: Posture No of Competencies-3								
BMK 10.1	Understand the difference between Static & dynamic posture	K	KH	Y	Lecture, Small group discussion, case study	Written,	Anatomy, OT in MSK, OT in surg cond, OT in neurological Cond	

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/P	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
BMK 10.2	Demonstrates the ideal posture & understands the factors affecting the posture	K	KH	Y	Lecture, Small group discussion	Written,		
BMK 10.3	Understands the Kinetics & Kinematics of Posture	K	KH	Y	Lecture, Seminar	Written,		
Topic Mobility -Transfer Techniques: **No of Competencies: 4**								
BMK 11.1	Understand Precursor to transfer & mobility	K	KH	Y	Lecture, group discussion, case study	Written, Skill assessment	Physiology, OT in MSK, OT in Med cond,OT in surg cond,OT in neurological Cond	
BMK 11.2	Demonstrate the Bed mobility for preparation of transfer	K, A, C	KH, SH, P	Y	Lecture, DOAP	Written, Skill assessment, OSPE, practical		
BMK 11.3	Describes the guidelines for Using proper body mechanics during transfer with principles of body positioning	K	KH	Y	Lecture, group discussion, case study	Written, Skill assessment		

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/P	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
BMK 11.4	Demonstrate • Stand pivot transfer • Bend pivot transfer • Dependent transfer • Sliding board transfer	K, A, C	KH, SH, P under supervision	Y	Lecture, DOAP	Written, Skill assessment, OSPE, practical		
Topic Mobility -Gait No of Competencies:8								
BMK 12.1	Describe the gait Cycle	K	KH	Y	Lecture, Seminar	written	Physiology, OT in MSK, OT in Medical condition, OT in surgical condition, OT in neurological Condition.	
BMK 12.2	Understand the kinematics & Kinetics of Gait cycle	K	KH	Y	Lecture, group discussion, DOAP	Written,		
BMK 12.3	Demonstrate the Assessments of different parameters of Gait	K, A, C	KH, SH, P under supervision	Y	Lecture, DOAP	Written, Skill assessment, OSPE, practical		

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/P	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
BMK 12.4	Identify abnormal gait & describe the patho-kinematics of abnormal Gait	K, A, C	KH, SH, P under supervision	Y	Lecture, DOAP	Written, Skill assessment, OSPE, practical		
BMK 12.5	Describes preparatory exercises for crutch walking	K	KH	Y	Lecture, group discussion, DOAP	Written,		
BMK 12.6	Understands the different crutch gaits	K	KH	Y	Lecture, group discussion, DOAP	Written,		
BMK 12.7	Understands the the prescription of cane, measurement & the cane gait	K	KH	Y	Lecture, group discussion, DOAP	Written,		
BMK 12.8	Demonstrates the different crutch & cane gaits	K, A, C	KH, SH, P under supervision	Y	Lecture, DOAP	Written, Skill assessment, OSPE, Practical

Topic: Vicarious Movements:		**No of Competencies: 2**						
BMK 13.1	Define & classify of vicarious movements	K	K	Y	Lecture, Seminar	written	Physiology, OT in MSK, OT iMed cond, OT in surg cond, OT in neurological Cond	
BMK 13.2	Description of vicarious movements	K	KH	Y	Lecture, Seminar	written		

Recommended Books:

1. Joint Structure and Function –1. A Comprehensive Analysis by C.C. Norkin, P.K. Levangie,
2. Physiology of Joint & Joint motion by Kapandji
3. A Therapeutic exercise by J. Basmajian
4. Biomechanics of human motion by Williams Lissner
5. Measurement of joint motion: a guide to goniometry by C.C. Norkin & D.J. White
6. Occupational Therapy & Physical Dysfunction by A. Turner

OCCUPATIONAL THERAPY DIAGNOSTICS AND PROCESS -I

COURSE DESCRIPTION: At this course, the students will have an understanding of human development, theoretical basis of occupational therapy profession, and various treatment approaches used in occupational therapy.

It focuses on concept of spatiotemporal adaptations & the developmental trajectory. It includes understanding of clinical assessment of individual muscle testing, Muscle tone, developmental reflexes. It emphasizes on therapeutic applications in Occupational Therapy based on human development. It includes standardized methods of assessment of Muscle power & its interpretations

GOAL: The broad goal to teach the second year BOT students OT skills of assessment methods and intervention approaches in Occupational therapy. The goal is to have the knowledge, skills for assessment of performance components and the theoretical basis for Occupational Therapy intervention.

OBJECTIVES:

KNOWLEDGE:

At the end of the course, the student shall be able to:

1 Understand the growth and development along with its theoretical basis in a typically developing human being
2 Explain the concept of spatiotemporal adaptation in Occupational Therapy.
3 Explain the concept of development of muscle tone & abnormality in tone
4 Describe the Characteristics of coordinated movements.
5 Describe various neurophysiological techniques of intervention
6 Describe the & developmental reflexes &assessment
7 Describe evaluation of Physical Dysfunction for Muscle strength, Coordination

SKILLS:

At the end of the course, the student shall be able to:

1 Develop Skills to assess coordination & Developmental reflexes

2 Demonstrate the neurophysiological techniques on dummy

3 Demonstrate the Use of the standardized tools of Individual Muscle testing& assessment of muscle tone

ATTITUDE:

1 The teaching and training at developing the attitude in students to apply the knowledge & skills he/she acquires for benefit and welfare of the patients.

2 It is necessary to develop in students a sense of responsibility towards assessment of Physical Dysfunctions

3 Understanding of handling & facilitatory techniques used during application of Neurophysiological techniques

4 Students should develop behavioural skills and humanitarian approach while communicating with patients, as individuals, relatives, society at large & the co- professionals

Scheme of examination for University Practical exam

Muscle Tone & assessment VivaVoce	Individual Muscles testing (Upper Ext. ,lower ext. & spinal muscles) & Viva Voce	Developmental reflex evaluation (On Dummy) & Viva Voce	Coordination Assessment (on dummy) & Viva Voce	Presentation & Communication skills	Total
30 marks	30 marks	10 marks	(10 marks)	20 marks	100 marks

OCCUPATIONAL THERAPY DIAGNOSTICS AND PROCESS -I								
Topic 1: Human Development **No of Competencies - 4**								
OTDP-I 1.1	Enumerate the stages of motor development as per the age.	K, C	K, KH	Y	Lecture, DOAP	Written	FOT I Physiology, OT in Paediatric conditions	
OTDP-I 1.2	Enumerate the stages of Gross motor development.	K, C	K, KH	Y	Lecture, DOAP	Written		
OTDP-I 1.3	Enumerate the stages of Fine motor development.	K, C	K, KH	Y	Lecture, DOAP	Written		
OTDP-I 1.4	Remember and analyse the critical age and developmental activities.	K, C, A	K, KH, S	Y	Lecture, Practical	Written		

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
Topic 2: Human Development Process- Theoretical Foundations No of Competencies -9								
OTDP-I 2.1	List out the theories related to Socio emotional development.	K, C	K, KH	Y	Lecture,	Written, Viva	Psychology, OT in psychiatry, OT in paediatric condition	
OTDP-I 2.2	Explain the Erik Erikson's stages of psychosocial development	K, C	K, KH	Y	Lecture,	Written,		
OTDP-I 2.3	Describe Ecologic Theory, Motivational Theory, Social, Emotional Theory	K, C	K, KH	Y	Lecture,	Written,		
OTDP-I 2.4	Describe Psychoanalytic theory of Freud,	K, C	K, KH	Y	Lecture,	Written,		Psychology
OTDP-I 2.5	Explain the Freud Psychosexual stages	K, C	K, KH	Y	Lecture,	Written,		Psychology
OTDP-I 2.6	List out the theories related to cognitive development.	K, C	K, KH	Y	Lecture,	Written,		

Since-2021

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
OTDP-I 2.7	Describe Theory of Learning, Behavioral Theory, Social learning theory and Maturational Theory of Arnold Gesell	K, C	K, KH	Y	Lecture,	Written,		Psychology
OTDP-I 2.8	Describe Cognitive Theory of Jean Piaget	K, C	K, KH	Y	Lecture,	Written,		Psychology
OTDP-I 2.9	Explain the Piaget stages of Cognitive development.	K, C	K, KH	Y	Lecture,	Written,		Psychology
Topic 3: Muscle Tone Competency no of Competencies -5								
OTDP-I 3.1	Define muscle tone.	K C	K, KH	Y	Lecture,	Written	Physiology 'OT in Neurological condition, OT in paediatric condition	
OTDP-1 3.2	Describe the Difference between Normal Muscle tone and Abnormal Muscle tone	K S	K, KH	Y	Lecture, DOAP	Written		

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
OTDP-I 3.3	Describe different types of abnormal muscle tone.	K, S	K, KH	Y	Lecture, DOAP	Written, Practical		
OTDP-I 3.4	Evaluate Muscle tone. Understand Modified Ashworth Scale and Pearsons rating of mild, moderate severe spasticity.	K, S	K, KH, SH	Y	Lecture, DOAP	Written, Practical		
OTDP-I 3.5	Practically demonstrate evaluation of muscle tone on a model.	K, S	K, KH, SH	Y	Lecture, DOAP, Skill demonstration	Skill assessment Practical		
Topic 4: Co -ordination competency no of Competencies -7								
OTDP-I 4.1	Define coordination.	K, C	K, KH	Y	Lecture DOAP	Written, Practical	Physiology	
OTDP-I 4.2	Describe the Characteristics of coordinated movements.	K, S	K, KH	Y	DOAP	Written, Practical		
OTDP-I 4.3	Explain in coordination found as Cerebellar signs.	K, S	K, KH, S, SH	Y	DOAP	Written, Practical		
OTDP-I 4.4	Describe in coordination found as Extra pyramidal signs.	K, S	K, KH, S, SH	Y	DOAP	Written, Practical		
OTDP-I 4.5	Evaluate coordination.	K, S	K, KH, S, SH	Y	DOAP	Written, Practical		

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
OTDP-I 4.6	Understand using standardized and non- standardized test for evaluating coordination.	K, S	K, KH, S, SH	Y	DOAP	written		
OTDP-I 4.7	Demonstrate method of using Standardized assessments for cerebellar signs, Extrapyramidal signs	K, S	K, KH, S, SH	Y	DOAP	Practical		
Topic 5: Spatiotemporal Adaptations no of Competencies – 6								
OTDP-I 5.1	Define and explain spatiotemporal adaptation as a grounded theory	K, S	K, KH, SH	Y	Lecture, Demonstration	Practical		
OTDP-I 5.2	Define terminology specific to the theory of Spatiotemporal adaptation.	K C	K, KH	Y	Lecture	Written		
OTDP-I 5.3	Explain four conceptual categories of the theory	K C	K, KH	Y	Lecture, DOAP	Written,		
OTDP-I 5.4	Describe the properties of the conceptual category.	K, C	K, KH	Y	Lecture, DOAP	Written		
OTDP-I 5.5	Identify and discuss principles of spiralling continuum as used with spatiotemporal adaptation theory.	K S	K, KH	Y	Lecture, DOAP	Written		

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
OTDP-I 5.6	Explain movement and environment as a system of relationships culminating in acquisition of performance skills	K, S	K, KH	Y	Lecture, DOAP	Written,		
Topic 6: Reaction and Reflex maturation no of Competencies -6								
OTDP-I 6.1	Define developmental Reflexes and Reactions	K	K	Y	Lecture	Written	Physiology, OT i paediatric conditions	
OTDP-1 6.2	Describe the importance of Reflexes on the motor development and Brain maturation., the position os stimulus & responses	K, C, S	K, KH	Y	Lecture, Small group discussion DOAP	Written		
OTDP-I 6.3	Explain the different Reflexes based on the levels of nervous system	K, C, S	K, KH	Y	Lecture DOAP	Written		
OTDP-I 6.4	Demonstrate the procedure of testing developmental reflexes of different level.	K, C, S	K, KH, SH, P under supervision	Y	Lecture DOAP, Case study	Written, Skill assessment, practical, OSPE		

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
OTDP-I 6.5	Enumerate the significance of persisting developmental reflex beyond time on Motor Development.	K, C, S	K, KH	Y	Lecture DOAP	Written		
OTDP-I 6.6	Document the age of Integration of developmental reflexes of different level.	K, C, S	K, KH	Y	Lecture DOAP	Written		
Topic 7: Neurological Approaches used in OT intervention no of competencies -13								
OTDP-I 7.1	Describe Rood's four components of motor control, and identify the application of it in OT practice.	K, C, S	K, KH, S, SH	Y	Lecture DOAP	Written		
OTDP-I 7.2	Elicit an Overview of the Evolution of NDT approach with its use in occupational therapy practices with various techniques.	K, C, S	K, KH, S, SH	Y	Lecture DOAP	Written		
OTDP-I 7.3	Describe brunnstorm Approach with demonstration of its application in Occupational therapy intervention with various techniques.	K, C, S	K, KH, S, SH	Y	Lecture DOAP	Written		

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
OTDP-I 7.4	Describe the theoretical base of the sensory integration approach with demonstration of its application in Occupational Therapy practice with various techniques.	K, C, S	K, KH, S, SH	Y	Lecture DOAP	Written		
OTDP-I 7.5	Define client-centered practice & its importance in Occupational Therapy practices.	K, C, S	K, KH,	Y	Lecture DOAP	Written		
OTDP-I 7.6	Describe the background and theory of the motor relearning program with demonstration of its application in Occupational Therapy practice with various techniques.	K, C, S	K, KH, S, SH	Y	Lecture DOAP	Written		
OTDP-I 7.7	Elicit & demonstrate the Overview of history and development of PNF with demonstration of its application in Occupational Therapy with various techniques.	K, C, S	K, KH, S, SH	Y	Lecture DOAP	Written Practical		

NCAHP Since-2021

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
OTDP-I 7.8	Describe the theoretical assumptions and models underlying the task- oriented approach with its application in occupational Therapy with various techniques.	K, C, S	K, KH, S, SH	Y	Lecture DOAP	Written Practical		
OTDP-I 7.9	Describe the background and theory behind Affolter's approach with its application in Occupational Therapy with various techniques.	K, C,	K, KH,	Y	Lecture DOAP	Written		
OTDP-I 7.10	Describe the background and theory behind Quadriphonic approach Elaborate the key assumptions and principles of Quadraphonic approach.	K	KH	Y	Lecture	Written		
OTDP-I 7.11	Describe the background and theory behind Cognitive retraining model & its In cognitive retraining Model.	K	KH	Y	Lecture	Written		
OTDP-I 7.12	Describe the background and theory behind Neurofunctional Model.	K	KH	Y	Lecture	Written		

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
OTDP-I 7.13	Describe the background and theory behind Cognitive orientation of daily Occupational performance Model List the steps in using Cognitive orientation of daily Occupational performance Model	K	KH	Y	Lecture	Written		
Topic 8: CLINICAL REASONING No of competencies -6								
OTDP-I 8.1	Describe the characteristics of clinical reasoning in occupational therapy	K, C,	K, KH,	Y	Lecture DOAP	Written		
OTDP-I 8.2	Describe decision tree process aid in clinical reasoning	K, C,	K, KH,	Y	Lecture DOAP	Written		
OTDP-I 8.3	Describe the clinical strategies, those are employed in occupational therapy.	K, C,	K, KH,	Y	Lecture DOAP	Written		
OTDP-I 8.4	Define Three-Track Mind concept in clinical reasoning	K, C,	K, KH,	Y	Lecture DOAP	Written		
OTDP-I 8.5	Describe the facets of clinical reasoning	K, C,	K, KH,	Y	Lecture DOAP	Written		
OTDP-I 8.6	Mentioned the models used in clinical reasoning in occupational therapy?	K, C,	K, KH,	Y	Lecture DOAP	Written		

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
Topic :9 Evaluation of Individual Muscle strength			**No of Competencies -5**					
OTDP-I 9.1	Describe the screening tests for muscle strength assessment	K	K, KH,	Y	Lecture, DOAP	Written	FOT I	
OTDP-I 9.2	List the diagnosis for which the MMT is appropriate & List contraindicated with its rationale	K	K, KH,	Y	Lecture	Written		
OTDP-I 9.3	Describe the need for individual muscle testing, with the principles of Individual Muscle testing	K,	K, KH,	Y	Lecture DOAP	Written Practical		
OTDP-I 9.4	Demonstrate & perform under supervision different tests for individual muscle testing with proper positioning, stabilisation, the movements, directions, resistance (if required), avoidance of substitution	K, C, S, A	K, KH, S, SH	Y	Lecture DOAP, Case Study	Written Practical, Skill assessment, OSCE		
OTDP-I 9.5	Interpret the results of muscle strength assessment (Weakness, shortening, substitution etc)	K, S	K, KH,	Y	Lecture DOAP	Written Practical

Occupational Therapy Diagnostic and Process-II

COURSE DESCRIPTION

Course explores major theories and frameworks underlying contemporary OT Practice, presents theoretical construct of Purposeful Occupational Activity and Occupational Science. It focuses on methods, Medias and modalities used in the intervention process. It builds concepts of intervention strategies that can be used to improve on performance components, performance areas to enable fitness and participation in contextual roles. It includes understanding of clinical assessment of sensations , perception , cognition. It emphasizes on therapeutic applications in Occupational Therapy based on human development and adaptation, treatment approaches incorporating neurophysiologic principles. It includes standenderized methods of assessment of Hand functions

GOAL: The broad goal to teach the second year BOT students OT skills of assessment methods and intervention approaches, modalities in Occupational therapy. The goal is to have the knowledge, skills for assessment of performance components and the theoretical basis for Occupational Therapy intervention.

OBJECTIVES:

D. KNOWLEDGE:

At the end of the course, the student shall be able to:

xiv. Explain Models & frames of references in Occupational Therapy.

xv. Explain the concept of Occupational Adaptation

xvi. Describe the concepts of Functional Cast Bracing

xvii. Describe the play as Occupational Therapy modality

xviii. Describe Physical Dysfunction Evaluation sensation, perception, Cognition & developmental reflexes

E. SKILLS:

At the end of the course, the student shall be able to:

v. Develop Skills to assess Sensations, perception, Cognition

vi. Demonstrate designing of the Functional Cast bracing

vii. Demonstrate the Use of the standardized tools of Hand function assessment

F. ATTITUDE:

a. The teaching and training at developing the attitude in students to apply the knowledge & skills he/she acquires for benefit and welfare of the patients.

b. It is necessary to develop in students a sense of responsibility towards assessment of Physical Dysfunctions

c. Understanding of handling & facilitatory techniques used during application of Neurophysiological techniques

d. Students should develop behavioural skills and humanitarian approach while communicating with patients, as individuals, relatives, society at large & the co- professionals Understand and use of clinical reasoning while planning for intervention.

Scheme of examination for University Practical exam 100 Marks

Hand Function Tests & viva Voce Any one	Cognition assessment & perceptual assessment (any4) spots	Sensory Evaluation & Viva Voce	Presentation & Communication skills	Total
30 marks	20 Marks	30marks	20 marks	100 marks

OTDP II 1.4	Understand & demonstrate the use of Models used in Occupational therapy	K	KH, SH		Lecture, small group discussion Simulated cases demonstration	Written, Skill assessment		
Topic – basis of Theory & philosophy of Occupational Therapy 2-Frames of references						**No of competencies -5**		
OTDP II 2.1	Describe the importance of personal factors affecting performance, assessment using ICF	K	K	Y	Lecture,	Written		
OTDP II 2.2	Understand the correlation between ICF & OTPF with reference to personal factors	K	K, KH	Y	Lecture, small group discussion	Written		
OTDP II 2.3	Understand the Theoretical concept /Frames of references of occupational therapy	K	K	Y	Lecture	Written		
OTDP II 2.4	Describe the concept of various Frames of references in occupational therapy	K	K	Y	Lecture	Written		

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
OTDP II 2.5	Describe the postulates regarding change and intervention related to different frames of references	K	K, KH	Y	Lecture, DAOP	Written		
Topic - Occupational Adaptation No of competencies -5								
OTDP II 3.1	Describe the Theoretical base of occupational Adaptation	K	K	Y	Lecture	written		
OTDP II 3.2	Explain the concept of Occupational Adaptation	K	K	Y	Lecture	written		
OTDP II 3.3	Describe & identify the need for use of Occupational Adaptation with reference to function -Dysfunction continuum	K/S	K, KH, SH	Y	Lecture,	Written, Skill assessment (OSPE)		
OTDP II 3.4	Enlist the Change anticipated after adaptation	K	KH	Y	Lecture	Written		
OTDP II 3.5	Demonstrates the Implementation of Occupational adaptation	K/S/C	KH, SH	Y	Lecture, Case study	Written, OSCE		

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
Topic: Functional cast Bracing No of competencies -5								
OTDP II 4.1	Define Functional cast Bracing & Describe the difference between functional cast Bracing and traditional immobilization after reduction of fractures	K	KH	Y	Lecture	Written	FOT II	Biomechanics & Kinesiology
OTDP II 4.2	Describe the scientific basis & Principles of Functional Cast Bracing	K	KH	Y	Lecture	Written		
OTDP II 4.3	Enumerate indications & contraindications in functional cast bracing	K	KH	Y	Lecture	Written		
OTDP II 4.4	Enumerate the objectives & advantages of Functional cast bracing	K	KH	Y	Lecture	Written		
OTDP II 4.5	Identify materials used & present the designing skills for functional cast braces	K/S/A	K, KH, SH (P under supervision)	Y	Lecture, DOAP session	Written/skills assessment		

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
Topic: Introduction to Play & Leisure		**No of competencies -6**						
OTDP II 5.1	Define Play and describe different Play behaviors& functions of Play	K	K	Y	Lecture	Written		Psychology II
OTDP II 5.2	Enumerate Functions of Play	K	KH	Y	Lecture	Written		
OTDP II 5.3	Describe content & structure of Play	K	KH	Y	Lecture	Written		
OTDP II 5.4	Explain Theories of Play	K	KH	Y	Lecture	Written		
OTDP II 5.5	use of Play as a therapeutic modality in Occupational Therapy	K/C	KH	Y	Lecture, DOAP	Written		
OTDP II 5.6	Explain importance of Leisure in adult life & classify leisure	K	KH	Y	Lecture	Written		
Topic 6: Physical Dysfunction Evaluation – Sensations		**No of competencies -5**						
OTDP II 6.1	Understand Somatotropin arrangements & Neuroplasticity	K	KH	Y	Lecture	Written	Anatomy, Physiology	

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
OTDP II 6.2	Describe the Somatosensory system & classification of sensations	K	K.KH	Y	Lecture/	Written		
OTDP II 6.3	Describe & demonstrate the Somatosensory system Evaluation with the principles (Superficial & Deep sensation)	K/S/C	KH, SH (P under supervision)	Y	Lecture, DOAP, Skill training under supervision	Written, Skill assessment, Practicals, OSPE		
OTDP II 6.4	Identify the specific standardized sensory assessments &their uses	K	K, KH	Y	Lecture/small group discussion /DOAP session	Written		
OTDP II 6.5	Identify the sensory deficits & give overview of basic principles in sensory re-education	K	K, KH	Y	Lecture/DOAP session	Written		

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
Topic: Perception No of competencies -3								
OTDP II 7.1	Define Perception &Understand the various perceptual deficits	K	KH	Y	Lecture	Written		Psychology I
OTDP II 7.2	Demonstrate the perceptual assessment methods	K/S/C	KH, SH (P)		Lecture, DOAP, Skill training under supervision	Written, Skill assessment, OSPE		
OTDP II 7.3	Enlist the general approaches used in Occupational Therapy intervention for perceptual dysfunction	K	K, KH		Lecture/ DOAP session	Written		
Topic: Cognition No of competencies-3								
OTDP II 8.1	Define Cognition &classify the lower & higher-level cognitive functions.	K	KH	Y	Lecture	Written		Psychology I
OTDP II 8.2	Demonstrate Evaluation of cognitive Skills-	K/S	KH, SH (P)		Lecture, DOAP, Skill training under supervision	Written, Skill assessment, Practical		

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
OTDP II 8.3	Enlist general approaches used in Occupational Therapy intervention for cognitive dysfunction	K	K, KH		Lecture/ DOAP session	Written		
Topic: Hand Function TestsNo of competencies 3								
OTDP II 9.1	Understand need for standardised assessments for hand function evaluation,	K	K, KH	Y	Lecture	Written	FOT II	Biomechanics & Kinesiology
OTDP II 9.2	Enumerate & Identify various Evaluation tests with respect to Occupational demands	K	K, KH		Lecture	Written

Computer Science

COURSE DESCRIPTION: Course explores Basic Computer and Smartphone Skills, digital skills in the learner. It includes, basic knowledge regarding computers, the parts of computers & their uses, building the typing skills, MS office skills & job readiness skills in the learner

COURSE Goal: The at the end of Second BOT, the students will gain knowledge and skill in the computer operation required in modern daily life & apply the knowledge & skills in Occupational Therapy

COURSE Objectives: At end of second BOT the student shall be able to

Knowledge

1. Describe the basic parts of computers & their uses, Ability to familiarize with basics of computers
2. Describe about operation of computers & smart phones.
3. Understand the smart use of computer skills in occupational therapy profession and in daily activities

Skills: -

1. Demonstrate the ability to do smart typing and ability to navigate the file system
2. the digital operational skills required in operation of computers & smart phones
3. Able to create and edit documents, spread sheets for basic data entry, and presentations
4. use Indian languages in documents, & have effective digital communication
5. able to receive, download & answer the emails, safely create -upload videos, navigate website

Competency Table : Computer Science

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods
			COMPUTER SCIENCE			
Topic –Basics of Information Technology		**No of competencies -4**				
CS 1.1	Describe characteristics of a computer, components of a computer system – CPU, memory, storage devices and I/O devices	K	K	Y	Lecture	written
CS 1.2	Describe the Types of software: system software (operating system, device drivers), application software including mobile applications	K	K		Lecture	Written
CS 1.3	Describe the Type of networks and understand the difference between public & private networking	K	K,		Lecture, DOAP	Written
CS 1.4	Describe the various Multimedia sources images, audio, video, animation	K	K,		Lecture, DOAP	Written

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods
Topic – Cyber Safety -Frames of references		**No of competencies -2**				
CS 2.1	Understand the procedure of Safely browsing the web and using social networks Enumerate intellectual property rights, plagiarism and digital property rights	K	K	Y	Lecture	Written
CS 2.2	Explain the existence of Malware: Viruses, adware	K	K		Lecture	Written
Topic Essential Office tools		**No of competencies 1**				
CS 3.1	Enlist, Describe& demonstrate various office tools.	K	K, SH (P)	Y	Lecture, DOAP, Skill training	Written, Skill assessment
Topic: Networking No of competencies -3						
CS 4.1	Explains about Internet: And demonstrate the creation of email account, website	K	KH, SH	Y	Lecture, DOAP	Written
CS 4.2	Demonstrate the use of Web services	K	KH, SH		Lecture, DOAP session, practical	Written, skill assessment
CS 4.3	Describe & demonstrate the use of mobile technologies.	K	KH, SH		Lecture, DOAP session, practical	Written, skill assessment

First aid and emergency care

COURSE DESCRIPTION: This course introduces the students in to the basic methods of first aid for different client at emergency.

GOAL: The purpose of learning this course is to acquire knowledge and skills to render first aid and management of injuries and wound Enhance knowledge and practice on first aid measures of systemic disorders. Provide first aid care in poisons, bites and stings, foreign bodies. Acquire knowledge in cardiac emergency and consciousness and provide CPR. Acquire knowledge and skills to provide first aid for burns and emergency care.

OBJECTIVES :

A. KNOWLEDGE:

i. Define basic principles of first aid and.
ii. Explain various systemic disorders
iii. Describe the poisoning and foreign objects
iv. Describe basic life support.

B. SKILLS:

i. Demonstrate the management of injuries and wound
ii. Demonstrate the first-aid measures of various systemic disorders
iii. Demonstrate the first aid for burns and emergency care.
iv. Demonstrate first aid for poisoning and foreign objects
v. Apply the procedures of basic life support

C. ATTITUDE:

i. The teaching and training in clinical medicine must aim at developing the attitude in students to apply the knowledge & skills he/she acquires for benefit and welfare of the patients.

ii. It is necessary to develop in students a sense of responsibility towards holistic patient care & prognostic outcomes.

iii. Students should develop behavioural skills and humanitarian approach while communicating with patients, as individuals, relatives, society at large & the co- professionals.

Competency Table: First aid and emergency care

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods
First aid and emergency care						
Topic: Management of Injuries and Wounds		**Competencies- 9**				
FAE 1.1	Definition of first aid. Importance of first aid, Golden rules of first aid, Scope and concept of emergency. Brief introduction about different casualties	K	K	N	Lecture	Written
FAE 1.2	Discuss about Traffic incidents, fires, electrical injuries, Assessing and examining casualty, symptoms and signs, treatment and aftercare	K	K	N	Lecture	Written
FAE 1.3	Techniques and equipment – Removing clothing and headgear, monitoring vitals, first aid materials, dressings- sterile, nonsterile and adhesive, Principles of bandaging – roller, elbow and knee, hand and foot, tubular and triangular bandages, reef knots and scalp bandages	K, S	K, KH	N	Demonstration	Practical

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods
FAE 1.4	Explain about Wounds and bleedings – bleeding and types of wounds, severe bleeding, impalement, amputation, crush injury, cuts and blaze, foreign object and cut, bruising, infected wound, scalp and head wounds and bleeding to varicose vein	K	K	N	Lecture	Written
FAE 1.5	Describe the Eye wounds, bleeding from ear, nose bleed, bleeding from the mouth, knocked out tooth, wound to the palm, wound at a joint crease, abdominal wound and vaginal bleeding	K	K	N	Lecture	Written
FAE 1.6	Techniques and equipment – arm sling, elevation sling, improvised, casualty handling, assisting a walking casualty, controlling a fall, moving from a chair to floor, moving a collapsed casualty, Methods of transportation: Single helper, Hand seat, Stretcher, Wheeled transport (ambulance), Precautions taken: Blanket lift, Air and Sea travel. Management of wound and bleeding	K, S	K, KH	N	Demonstration	Practical
FAE 1.7	Explain about Bones, joint and muscle injuries; Fractures, dislocated joint, strains and sprains, shoulder, upper arm, elbow, forearm and wrist, hand and finger injuries	K	K	N	Lecture	Written

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods
FAE 1.8	Discuss the injury to rib cage, Spinal injury, back and fractured pelvis, hip and thigh, knee, lower leg, ankle and foot and toe injuries.	K	K	N	Lecture	Written
FAE 1.9	Management of bone, joint and muscle injuries	K, S	K, KH	N	Demonstration	Practical
Topic: Systemic Disorders		**Competency level-8**				
FAE 2.1	Explain about Hypoxia, Airway obstruction, hanging and strangulation, drowning and inhalation of fumes	K	K	N	Lecture	Written
FAE 2.2	Elaborate on Penetrating chest wound, hyperventilation, Asthma and croup	K	K	N	Lecture	Written
FAE 2.3	First aid care for respiratory problems	K, S	K, KH	N	Demonstration	Practical
FAE 2.4	Discuss about Shock, internal bleeding, anaphylactic shock, angina pectoris and acute heart failure	K	K	N	Lecture	Written
FAE 2.5	Explain about Heart attack and fainting	K	K	N	Lecture	Written
FAE 2.6	Discuss about Impaired consciousness, head injury, concussion, cerebral compression, skull fracture and stroke	K	K	N	Lecture	Written

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods
FAE 2.7	Explain about the Seizures in adults, absence seizures, seizures in children, meningitis, headache and migraine	K	K	N	Lecture	Written
FAE 2.8	First aid care of nervous system problem	K, S	K, KH	N	Demonstration	Practical
Topic: Poisoning and Foreign Objects Competency level-9						
FAE 3.1	Explain the Swallowed poisons, chemicals on skin, inhaled gases and poisons in the eye	K	K	N	Lecture	Written
FAE 3.2	Explain about Drug, alcohol and food poisoning, poisonous plants and fungi	K	K	N	Lecture	Written
FAE 3.3	First aid in poisons	K, S	K, KH	N	Demonstration	Practical
FAE 3.4	Describe about insect poison, bites and stings, tick bite	K	K	N	Lecture	Written
FAE 3.5	Discuss about Dog bites, snake bite and others	K	K	N	Lecture	Written
FAE 3.6	First aid care of animal and insect bite	K, S	K, KH	N	Demonstration	Practical
FAE 3.7	Discuss about Splinter, foreign object in the eye and ear	K	K	N	Lecture	Written

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods
FAE 3.8	Discuss about the foreign object in the nose, inhaled and swallowed foreign object	K	K	N	Lecture	Written
FAE 3.9	First aid care of the foreign objects	K, S	K, KH	N	Demonstration	Practical
Topic: Basic Life Support Competency level-9						
FAE 4.1	Explain Breathing and circulation and lifesaving priorities	K	K	N	Lecture	Written
FAE 4.2	Discuss the Adult resuscitation procedure	K	K	N	Lecture	Written
FAE 4.3	Cardio Pulmonary resuscitation of adults	K,S	K,KH	N	Demonstration	Practical
FAE 4.4	Discuss about the unconscious child and child resuscitation chart	K	K	N	Lecture	Written
FAE 4.5	Discuss about the unconscious infant and infant resuscitation chart	K	K	N	Lecture	Written
FAE 4.6	CPR for child and infant	K,S	K,KH	N	Demonstration	Practical
FAE 4.7	Explain the Choking adult and its safety procedure	K	K	N	Lecture	Written

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods
FAE 4.8	Explain the Choking child and infant and its safety management	K	K	N	Lecture	Written
FAE 4.9	First aid for choking of adult and infant	K, S	K, KH	N	Demonstration	Practical
Topic: Burns and Emergency First Aid Competency level-9						
FAE 5.1	Explain the Severe and minor burns and scalds, electrical and chemical burns	K	K	N	Lecture	Written
FAE 5.2	Discuss about burns to the eye, sun burn and heat stroke	K	K	N	Lecture	Written
FAE 5.3	First aid care for burns	K, S	K, KH	N	Demonstration	Practical
FAE 5.4	Describe about Shock, anaphylactic shock and severe bleeding	K	K	N	Lecture	Written
FAE 5.5	Describe about Head injury and spinal injury	K	K	N	Lecture	Written
FAE 5.6	First aid care for shock and traumatic injuries including safe transportation	K, S	K, KH	N	Demonstration	Practical
FAE 5.7	Explain about Seizures, burns and swallowed poisons	K	K	N	Lecture	Written

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels K/KH/SH/PS	Core Y/N	Teaching Learning methods	Assessment methods
FAE 5.8	Discuss about the Broken bones and hemorrhages	K	K	N	Lecture	Written
FAE 5.9	First aid care for seizure, burns, swallowed poisons, different dressings and bandages.	K, S	K, KH	N	Demonstration	Practical

MEDICINE & CARDIOVASCULAR MEDICINE

COURSE DESCRIPTION: This course intends to familiarize students with medical terminology & abbreviations for efficient & effective chart reviewing & documentation. It also explores selected systemic diseases, focusing on epidemiology, pathology, histology, aetiology as well as primary & secondary clinical characteristics, complications and their management. Discusses & integrates subsequent medical management of General Conditions, Rheumatology, Gerontology, and Cardio-vascular & Respiratory systems, genetic disorders, hematologic and infective disorders with reference to red flag indicators, indications, contraindications & precautions to formulate appropriate intervention

GOAL: The broad goal of the teaching of undergraduate students in Medicine & Cardiovascular medicine is to have the knowledge, skills and behavioural attributes to function effectively as a clinician.

OBJECTIVES:

KNOWLEDGE:

At the end of the course, the student shall be able to:

1 Diagnostic process of common clinical disorders with special reference to infectious diseases, nutritional disorders, tropical, cardiovascular and environmental diseases;

2 Outline various modes of management including drug therapeutics especially dosage, side effects, toxicity, interactions, indications and contra-indications;

3 Process to propose diagnostic and investigative procedures and ability to interpret them;

4 Process to provide first level management of acute emergencies promptly and efficiently and decide the timing and level of referral, if required;

5 Recognize geriatric disorders and their management.

SKILLS:

At the end of the course, the student shall be able to:

1 develop clinical skills (history taking, clinical examination and other instruments of examination to diagnose various common medical disorders and emergencies;

2 refer a patient to secondary and/or tertiary level of health care after having instituted primary care;

3 perform simple routine investigations like hemogram, stool, urine, sputum and biological fluid examinations;

4 assist the common bedside evaluations and investigative procedures related to medicine and cardiovascular conditions.

5 A course of systematic instruction in the principles and practice of medicine, including medical disease of infancy;

   a. Lecture - demonstrations, seminars and conferences in clinical medicine during the 3 years shall run concurrently with other clinical subjects;

   b. Instructions in comprehensive medical care;

   c. Instructions in applied anatomy and physiology and pathology throughout the period of clinical studies;

   d. Instructions in dietetics, nutrition and principles of nursing Medical and in simple ward procedure e.g. should be imparted during clinical concurrently.

ATTITUDE:

1 The teaching and training in clinical medicine must aim at developing the attitude in students to apply the knowledge & skills he/she acquires for benefit and welfare of the patients.

2 It is necessary to develop in students a sense of responsibility towards holistic patient care & prognostic outcomes.

Students should develop behavioural skills and humanitarian approach while communicating with patients, as individuals, relatives, society at large & the co- professionals

OCCUPATIONAL THERAPY IN MEDICAL CONDITIONS COURSE DESCRIPTION

This course intends to familiarize students with medical terminology & abbreviations for efficient & effective chart reviewing & documentation. It also gives overview of epidemiology, pathology, histology, aetiology as well as primary & secondary clinical characteristics, complications and their management. Discusses & integrates subsequent occupational therapy management of General Conditions, Rheumatology, Gerontology, Cardio-vascular & Respiratory systems, genetic disorders, hematologic conditions, infective disorders, obesity with reference to red flag indicators, indications, contraindications & precautions to formulate appropriate therapeutic intervention.

GOAL: The broad goal to teach the undergraduate students OT Application in Medical Conditions is to have the knowledge, skills and behavioural attributes to function effectively as a occupational therapist and subsequently improve functional independence and Quality of Life of the patient.

OBJECTIVES: KNOWLEDGE:

At the end of the course, the student shall be able to:

1. Identify the clinical presentation of common medical conditions with special reference to, cardiovascular and pulmonary conditions, HIV, Rheumatoid Arthritis, dermatological conditions like Leprosy, haemophilia.
2. Outline and apply various modalities and methods of management including various approaches, exercise protocol, splinting process.
3. Recognize geriatric disorders and obesity and its OT management
4. Plan and provide occupational therapy treatment under supervision for occupational performance areas of independent living/daily living skills, pre-vocational/work adjustment skills, play/leisure skills, social skills

SKILLS:

At the end of the course, the student shall be able to:

1. Develop clinical skills (history taking, clinical examination and other instruments of examination) to know the clinical manifestations and its impact on function.
2. Perform simple assessments using standardized methods, test batteries and instruments to assess performance components
3. Assist the common bedside evaluations and assessment procedures related to medical and cardiovascular conditions.

ATTITUDE:

1. The teaching and training in OT application in medical condition" must aim at developing the attitude in students to apply the knowledge & skills he/she acquires for benefit and welfare of the patients.
2. To develop, restore, or improve required skills, habits, and roles for independent, meaningful, and productive living.
3. To participate in patient and family education programs and provide them with the necessary information and resources for independent living
4. It is necessary to develop in students a sense of responsibility towards holistic patient care & prognostic outcomes of therapy
5. Students should develop behavioural skills and humanitarian approach while communicating with patients, as individuals, relatives, society at large & the co- professionals.

Scheme of examination for University Practical exam

Long Case	Short case	Viva voce	Communication skills	Total
60 marks	25marks	10 marks	5 marks	100 marks

Competency Table: Occupational Therapy in Medical Conditions

Code No.	Competency: Student should be able to	Domains K/S/A/C	Levels K/KH/SH/P	Core Y/N	Teaching Leaning Method	Assessment method	Vertical Integration	Horizontal Integration
Occupational Therapy in Medical Condition								
Topic: Cardiovascular conditions management No of Competencies: 09								
OTM 1.1	Describe Medical and Surgical Management of various cardiovascular conditions:	K	KH	N	Lectures	Written		Medicine
OTM 1.2	Understand and correlate clinical presentations, physical findings, patho-physiology and investigations	K	KH/SH	Y	Bedside Clinic, Skill presentation, Case study	Practical, Skill Assessment		Medicine
OTM 1.3	Reading and interpreting basic cardiopulmonary findings	S	SH	Y	Bedside Clinic, Skill presentation, Case study	Skill Assessment		
OTM 1.4	Enumerate effects of drugs on exercise performance	K	K	Y	Lectures Group Discussion	Written, Viva	Pharmacology	-

Code No.	Competency: Student should be able to	Domains K/S/A/C	Levels K/KH/SH/P	Core Y/N	Teaching Leaning Method	Assessment method	Vertical Integration	Horizontal Integration
OTM 1.5	Enumerate Indications and Contraindications for work and activity	K	K	Y	Lectures	Written, VIVA, OSPE		
OTM 1.6	Define and understand MET & its application to exercise prescription, work and sports medicine.	K/S	KH	Y	Lectures, Group Discussions	Written, VIVA, OSCE	Work Physiology	Medicine
OTM 1.7	Describe the occupational Therapy protocol for cardiovascular conditions and emphasize on life style modification	K/S	KH/SH	Y	Lectures, Case study DOAP	Written Practical, Skill Assessment	Work Physiology	
OTM 1.8	Discuss work hardening and work assessment in cardio- pulmonary conditions	K/S	KH	Y	Lectures	Written, Viva	OT Diagnostic II	
OTM 1.9	Discuss modification of work and activity programmes with respect to residual cardiac functions and return to work	K/S	KH/SH	Y	Group Discussions Demonstrate,	Skill Assessment		

Code No.	Competency: Student should be able to	Domains K/S/A/C	Levels K/KH/SH/P	Core Y/N	Teaching Leaning Method	Assessment method	Vertical Integration	Horizontal Integration
Topic Autoimmune disorders-Rheumatoid arthritis & SLE				**No of Competencies: 4**				
OTM 2.1	Enumerate & Define the autoimmune conditions,	K	K	Y	Lectures	Written Viva		Medicine
OTM 2.3	Explain patho mechanics of deformities in RA	K	KH	Y	Lectures	Written Viva		
OTM 2.4	Discuss & demonstrate Occupational therapy management in Acute, sub-acute and chronic stage of diseases	K/S	KH/SH/P	Y	Lectures****	Written Viva		Medicine
Topic: Geriatrics		**No of Competencies: 5**						
OTM 3.1	Define the term gerontology & geriatrics	K	K	Y	Lectures	Written Viva		
OTM 3.2	Explain health & health context in again	K	KH	Y	Lectures	Written Viva		
OTM 3.3	Describe theories of aging	K	KH	Y	Lectures	Written Viva		

Code No.	Competency: Student should be able to	Domains K/S/A/C	Levels K/KH/SH/P	Core Y/N	Teaching Leaning Method	Assessment method	Vertical Integration	Horizontal Integration
OTM 3.4	Identify specialized tools of OT assessment & treatment in geriatrics	K/S	KH/SH	Y	Lectures, Group Discussions	Written Viva.		
OTM 3.5	Discuss role of OT in fall prevention	K	KH	Y	Lectures	Written Viva		
Topic: Dermatology No of Competencies: 4								
OTM 4.1	Describe the condition leprosy and mode of transmission of this disease.	K	K	Y	Lectures	Written Viva		Medicine
OTM 4.2	Describe the clinical features & OT management in Leprosy	K	KH	Y	Lectures Seminar	Written Viva		Medicine
OTM 4.3	Explain Psychosocial implications in Leprosy.	K/A/C	KH/S/P	Y	Lectures	Written, Case study		
OTM 4.4	Explain CREST syndrome, SLE, affectations of the integumentary system	K	KH	Y	Lectures	Written Viva		Medicine

NCAHP Since-2021

Code No.	Competency: Student should be able to	Domains K/S/A/C	Levels K/KH/SH/P	Core Y/N	Teaching Leaning Method	Assessment method	Vertical Integration	Horizontal Integration
Topic: Immune disorders-HIV No of Competencies: 5								
OTM 5.1	Explain epidemiological history of HIV	K	K	NH	Lectures	Written Viva		Medicine
OTM 5.2	Identify symptoms with spectrum of HIV disease & its impact on occupational behaviour	K	K/S	Y	Lectures Seminar	Written Viva		
OTM 5.3	Describe appropriate OT goals, treatment plan & strategies for people with HIV infection & AIDS	K	KH	Y	Lectures	Written Viva		
OTM 5.4	Describe the physical, psychological & environmental needs of people with HIV infection & AIDS	K	KH	Y	Lectures	Written Viva		
OTM 5.5	Discuss palliative Care for HIV	K/A/C	KH/SH	Y	Lectures, Seminar	Written		

Code No.	Competency: Student should be able to	Domains K/S/A/C	Levels K/KH/SH/P	Core Y/N	Teaching Leaning Method	Assessment method	Vertical Integration	Horizontal Integration
Topic: Pulmonary conditions		**No of Competencies: 4**						
OTM 6.1	Define various pulmonary conditions	K	K	Y	Lectures	Written Viva		Medicine
OTM 6.2	Identify symptom in pulmonary conditions with respect to functional performance	K	KH	Y	Lectures	Written Viva		
OTM 6.3	Explain classification of patients on symptomatic basis. Disability rating (ICF)	K/S	KH	Y	Lectures Group Discussions	Written Case S		
OTM 6.4	Discuss & demonstrate occupational therapy management in pulmonary conditions	K/S	KH/SH	Y	Lectures Practical Bed side Clinic, DOAP	Written Viva, Skill Assessment

NEUROLOGY AND PEADIATRICS

COURSE DESCRIPTION: This course introduces the student to the neurological & peadiatric conditions which commonly cause disability. Particular effort is made in this course to avoid burdening the student with any details pertaining to diagnosis which will not contribute to their understanding of the limitations imposed by neurological pathology on the functioning of the individual.

COURSE OBJECTIVES: This course intends to familiarize students with medical terminology & abbreviations for efficient & effective chart reviewing & documentation. It also explores selective systemic diseases, focusing on epidemiology, aetiology, pathology, histology as well as primary & secondary clinical characteristics & their management. It discusses & integrates subsequent medical management of Neurological & Paediatric conditions to formulate appropriate intervention; indications, precautions & contraindications with respect to clinical presentation

GOAL: The broad goal of the teaching of undergraduate students in Neurology and Peadiatrics is to have the knowledge, skills and behavioural attributes to function effectively as a clinician.

OBJECTIVES:

G. KNOWLEDGE:

At the end of the course, the student shall be able to:

1. Understand basics of Diagnostic process of common Neurology and Peadiatrics disorders related to the profession.
2. Outline various modes of management including medical management, drug therapeutics, side effects, toxicity, interactions, indications and contra-indications, basics of surgical management, and other interventions.
3. Basic understanding about the Process to propose diagnostic and investigative procedures.

4. Process to understand the basics about first level management of acute emergencies promptly and efficiently and decide the timing and level of referral, if required;
5. Recognize paediatric disorders and their management.

H. SKILLS:

At the end of the course, the student shall be able to:

1. Develop clinical skills (history taking, clinical examination and other instruments of examination of various common Neurology and Peadiatrics disorders and emergencies;
2. Refer a patient to secondary and/or tertiary level of health care after screening if needed;
3. Perform simple routine evaluations related to OT
4. Assist the common clinical assessment procedures related to Neurology and Peadiatrics conditions.

A course of systematic instruction in the principles and practice of Neurology and Peadiatrics;

1. Lecture - demonstrations, seminars and conferences in clinical subjects during the 3 years shall run concurrently with other clinical subjects.;
2. Basic Instructions in comprehensive Neurology and Peadiatrics care;
3. Basic Instructions in applied anatomy and physiology and pathology (related to OT) throughout the period of clinical studies;
4. Basics Instructions in dietetics, nutrition and principles of nursing for Neurology and Peadiatrics

NATIONAL COMMISSION FOR ALLIED AND HEALTHCARE PROFESSIONS
NCAHP
Since-2021

I. ATTITUDE:

1. The teaching and training in clinical subjects like paediatrics and neurology must aim at developing the attitude in students to apply the knowledge & skills he/she acquires for benefit and welfare of the patients.
2. It is necessary to develop in students a sense of responsibility towards holistic patient care & prognostic outcomes related to OT.
3. Students should develop behavioural skills and humanitarian approach while communicating with patients, as individuals, relatives, society at large & the co- professionals.

NP 9.2	Describe the Diagnosis and management of degenerative diseases	K	KH		Small group Discussion, Lecture	Written		OT in Neurology	
Topic Infections of the nervous system No of Competencies: 1									
NP 10.1	Describe cause, clinical features, diagnosis and treatment of Encephalitis, Neurosyphilis, Herpes, Meningitis, Tetanus and involvement of Nervous system in H.I.V.	K	K	Y	Small group Discussion, Lecture	Written		OT in Neurology	General medicine
Topic Disorders of Spinal cord No of Competencies: 1									
NP 11.1	Describe cause, clinical features, diagnosis and treatment of Syringomyelia, Tabes Dorsalis, Caudaequina syndrome.	k	K	Y	Small group Discussion, Lecture	Written		OT in Neurology	General medicine

Code No.	Competency: Student should be able to	Domains K/S/A/C	Levels K/KH/SH/P	Core Y/N	Suggested Learning methods	Suggested Assessment methods	Number required to certify P	Vertical Integration	Horizontal Integration
Topic: Headache **No of Competencies: 2**									
NP 12.1	Enumerate Types of headache and describe its management,	K	K	N	Small group Discussion, Lecture	Written			General medicine
NP 12.2	Explain causes clinical features and management of Migraine	K	K	N	Small group Discussion, Lecture	Written			
Topic: Epilepsy **No of Competencies: 3**									
NP 13.1	Define and Classify epilepsy	K	K	Y	Small group Discussion, Lecture	Written			General Medicine
NP 13.2	Enumerate the complications of epilepsy	K	K	Y	Small group Discussion, Lecture	Written			General medicine

Code No.	Competency: Student should be able to	Domains K/S/A/C	Levels K/KH/SH/P	Core Y/N	Suggested Learning methods	Suggested Assessment methods	Number required to certify P	Vertical Integration	Horizontal Integration
NP 13.3	Describe management of epilepsy	K	K	N	Small group Discussion, Lecture	Written			General medicine
PEADIATRICS									
Topic Growth and development No of Competencies: 8									
NP 14.1	Overview for Normal intra-uterine development of foetus with special reference to Central Nervous System, Neuromuscular System, Cardiovascular Respiratory System Normal development & growth	k	K	N	Small group Discussion, Lecture	Written		OT in paediatric	General medicine
NP 14.2	Describe normal/abnormal growth and development of a child	K	K		Small group Discussion, Lecture	Written/ Viva voce		OT in paediatric	

Code No.	Competency: Student should be able to	Domains K/S/A/C	Levels K/KH/SH/P	Core Y/N	Suggested Learning methods	Suggested Assessment methods	Number required to certify P	Vertical Integration	Horizontal Integration
NP 14.3	Understand Immunization and breast-feeding	K	K		Lecture	Written			General medicine
NP 14.4	Enumerate the pre- natal, peri natal and post-natal causes	K	K/KH		Small group Discussion, Lecture,	Written,		OT in paediatric	General medicine
NP 14.5	Classification of Cerebral Palsy. Describe the Clinical features of different types	K	K/KH		Small group Discussion, Lecture,			OT in paediatric	General medicine
NP 14.6	Describe Medical Management including early intervention in cerebral palsy	K	K/KH		Small group Discussion, Lecture	Written		OT in paediatric	General medicine
NP 14.7	Enumerate the causes, clinical features, Classification and Management of Epilepsy	K	K/KH		Small group Discussion, Lecture	Written		OT in paediatric	General medicine, Pharmacology

Code No.	Competency: Student should be able to	Domains K/S/A/C	Levels K/KH/SH/P	Core Y/N	Suggested Learning methods	Suggested Assessment methods	Number required to certify P	Vertical Integration	Horizontal Integration
NP 14.8	Describe the causes clinical features, Classification and management of Mental Retardation.	K	K/KH		Small group Discussion, Lecture	Written		OT in paediatric	
Topic Developmental disorders associated with spinal cord No of Competencies: 1									
NP 15.1	Enumerate various neural tube defects- and describe clinical features their management	K	K/KH		Small group Discussion, Lecture,	Written			General medicine
Topic: Common infection No of Competencies: 2									
NP 16.1	Enumerate & describe Infections of Central Nervous System & Peripheral Nervous System	K	K, KH		Small group Discussion, Lecture	Written		OT in Pediatrics, OT Neurology	General medicine, neurology

WORK PHYSIOLOGY & ERGONOMICS

COUSE RDESCRIPTION: The student will demonstrate knowledge and ability of work physiology and its application and scope in Occupational Therapy. The course makes the student cognizant about evaluation and assessment of physical capacity and fitness, aerobic and anaerobic performance. The course offers know how of appropriate use of training equipment and protocols, test performance for work fitness, indications, contraindications for registering in exercise training and discharge programs. The student will demonstrate knowledge and ability of ergonomics and its application and scope in Occupational Therapy and Industry. The course offers opportunity to learn basics of ergonomics in industry, the prevention of cumulative trauma disorders and joint pathologies and other conditions as applicable. It covers aspects of mental ergonomics, management of anxiety and stress in industry and work place

OBJECTIVES

KNOWLEDGE

At the end of the course, the student shall be able to:

1) Identify and understand the physiology of the aerobic and anaerobic exercises, aerobic & anaerobic process & various test used.
2) Understand the concept of energy expenditure at work, rest and leisure
3) Recognize the role of various factors on physical performance
4) Provide training based on aerobic and anaerobic capacity.
5) Recognize physical health, capacity and longevity in aged.
6) Understand anthropometry, Environmental physiology, Occupational psychology and its role in ergonomics.

7) Understand use of ergonomic principles at office and industry
8) Define what work-related musculoskeletal disorders (WRMSDs) are and the importance of reducing these.
9) optimize the integration of man and machine so as to improve the production of work and accuracy

SKILL

Apply principles of Ergonomics and work physiology in OT. Demonstrate and assess work place layout

Scheme of Marks for University Practical exam in applied ergonomics 50 Marks

Work site analysis, work method, and Tools & Equipments used

WP 2.5	Explain the Protocols & Methods for: Parameters of evaluation. Measurement of oxygen uptake.	K/S	KH/SH	Y	Lectures Seminars	Written		

Code No.	Competency: Student should be able to	Domains K/S/A/C	Levels K/KH/SH/P	Core Y/N	Teaching Leaning Method	Assessment method	Vertical Integration	Horizontal Integration
WP 2.6	Explain principles and methods of Physical Training.	K/S	KH/SH	Y	Lectures Seminars	Written Skill Assessment		
Topic: Physiological considerations and requirements of Physical Performance Capacity						**No of Competencies: 2**		
WP	Understand the role of nutrition on	K	KH	Y	Lectures	Written		
3.1	Physical Performance				Seminars			
WP 3.2	Explain mechanism of Temperature Regulation and its effects Physical Performance	K	KH	Y	Lectures Seminars	Written	Physiology	
Topic: Factors affecting Physical Performance			**No of Competencies: 2**					
WP 4.1	Describe the effects of various factors on physical performance	K	KH	Y	Lectures Seminars	Written		
WP 4.2	Describe effects of Acclimatization, effects of altitude, season, smoking, temperature, de conditioning on physical performance	K	KH	Y	Lectures Seminars	Written		

NCAHP Since-2021

Code No.	Competency: Student should be able to	Domains K/S/A/C	Levels K/KH/SH/P	Core Y/N	Teaching Leaning Method	Assessment method	Vertical Integration	Horizontal Integration
Topic: Applied Work Physiology		**No of Competencies: 4**						
WP 5.1	Describe training principles and physiologic consequence on aerobic and anaerobic system	K	KH	Y	Lectures,	Written		
WP 5.2	List the factors that affect the aerobic training response	K	K	Y	Lectures	Written/ Viva		
WP 5.3	understand the concept of energy expenditure at work, rest and leisure	K	KH/SH	Y	Lectures, Group Discussions	Written, Viva		Ergonomics
WP 5.4	Apply the WP principles to Cardio-Pulmonary Rehabilitation	S	SH/P	Y	DOAP	Skill assessment, Viva, OSPE		Medicine
Topic Physical Activity – Health and Aging		**No of Competencies: 3**						
WP 6. 1	Explain Physical Activity Epidemiology	K	K	N	Lectures	Written		OT Application in Medical Conditions
WP 6. 2	Describe Aging Process and Physiologic function	K	K	Y	Lectures Seminars	Written		OT Application
WP 6. 3	Discuss Physical Activity Health and Longevity	K	KH	Y	Lectures	Written		
Ergonomics								

Code No.	Competency: Student should be able to	Domains K/S/A/C	Levels K/KH/SH/P	Core Y/N	Teaching Leaning Method	Assessment method	Vertical Integration	Horizontal Integration
Topic: Introduction to Ergonomics No of Competencies: 2								
ERG 1.1	Define Ergonomics & give an overview of Historical Background	K	K	Y	Lectures	Written, viva		
ERG 1.2	Enumerate & explain the areas and branches of Ergonomics.	K	K	Y	Lectures	Written, viva		
Topic: Client Centre Framework for therapist in Ergonomics No of Competencies: 4								
ERG 2.1	Discuss theoretical Framework	K	KH	Y	Lectures	Written, viva		
ERG 2.2	Discuss ergonomic approaches	K	KH	Y	Lectures	Written, viva		
ERG 2.3	Explain the role of client centered Practice and ethics	K	K	Y	Lectures, Small Group Discussions	Written, viva		
ERG 2.4	Describe application of various models to Ergonomic practice	K	KH	Y	Lectures, Small Group Discussions	Written, viva	OTDP I	
Topic: Branches of Ergonomics No of Competencies: 15								
Branches of Ergonomics Anthropometry-

					Discussions			
ERG 3.8	Outline the effects of environmental factors such as temperature, humidity noise, vibration, visual environmental pollution on human body.	K	K	Y	Lectures, Small Group Discussions	Written, viva		
ERG 3.9	Explain the safety factors, accidents and their prevention	K	K	Y	Lectures, Small Group Discussions	Written, viva		
Skill psychology -								
ERG 3.10	Explain skill learning with emphasis on Phases of skill learning Characteristics of well learnt task.	K	K	Y	Lectures, Small Group Discussions	Written, viva		
ERG 3.11	Describe Input verses out and functioning of man- machine system	K	K	Y	Lectures, Small Group Discussions	Written, viva		
ERG 3.12	Describe Information processing theory and the process.	K	KH	Y	Lectures, Small Group Discussions	Written, viva	psychology	
ERG 3.13	Enumerate the Factors affecting man machine system i) Design Factor	K	K	Y	Lectures, Small Group Discussions	Written, viva		

Code No.	Competency: Student should be able to	Domains K/S/A/C	Levels K/KH/SH/P	Core Y/N	Teaching Leaning Method	Assessment method	Vertical Integration	Horizontal Integration
	ii) Environmental Factors iii) Organizational factors							
Work Physiology-								
ERG 3.14	Overview of work Physiology principles	K	K	N	Lectures	Written	Physiology	
ERG 3.15	Application of principles of work physiology in Occupational Therapy.	K	K	Y	Lectures, Small Group Discussions	Written, viva	Workphysiology	
Topic: Ergonomic considerations at Work		**No of Competencies: 4**						
ERG 4.1	Explain layout of equipment design of seating.	K	K	Y	Lectures,	Written, viva		
ERG 4.2	Explain the design of work space	K	K	Y	Lectures, Demonstration	Written, viva		
ERG 4.3	Explain role of human compatibility and use of displays and controls in industrial set up	K	K	Y	Lectures, Small Group Discussions	Written, viva		
ERG 4.4	Analyze work place	K/S	K	Y	Lectures, Small Group Discussions	Written, viva		
Topic:	**Psychosocial Factors No of Competencies: 2**							
ERG 5.1	Define psychosocial factors	K	K	Y	Lectures,	Written		

Code No.	Competency: Student should be able to	Domains K/S/A/C	Levels K/KH/SH/P	Core Y/N	Teaching Leaning Method	Assessment method	Vertical Integration	Horizontal Integration
ERG 5.2	Theories explaining relationship between psychosocial factors and work-related musculoskeletal disorders	K	KH	Y	Lectures,	Written		
Topic Cognitive Workload & Organization of Mental Space No of Competencies: 2								
ERG 6. 1	Explain the concept of cognitive workload, its advantages and organization of mental space.	K	KH	Y	Lectures,	Written		
ERG 6. 2	Understand the effects of cognitive overload	K	K	Y	Lectures, Small Group Discussions	Written		
Topic: Time and Motion Study in Ergonomics No of Competencies: 3								
ERG 7.1	Define and underline the assumptions of Time and Motion study.	K	KH	Y	Lectures,	Written		
ERG 7.2	Explain the cycle of managerial control and its application	K	KH	Y	Lectures,	Written		
ERG 7.3	Explain Scientific method of time and motion study	K	KH	Y	Lectures,	Written		
Topic: Application of Ergonomics in School Industry, Hospital and Office No of Competencies: 2								
ERG 8. 1	Discuss the Scope of ergonomics in modern society.	K	KH	Y	Lectures,	Written		

Code No.	Competency: Student should be able to	Domains K/S/A/C	Levels K/KH/SH/P	Core Y/N	Teaching Leaning Method	Assessment method	Vertical Integration	Horizontal Integration
ERG 8.2	Apply the Ergonomic principles in Occupational Therapy Practice related to: i) Lifting analysis ii) Seating analysis Computer and assistive technology	K/S	KH/SH	Y	Lectures, Demonstration,	Written, Skill assessment		
ERG 8.3	Use biomechanical principles when analyzing a lift.	K, S	KH/SH		Lecture cum Demonstration; Videos; Case Studies; Small Group Discussion; DOAP: (Demonstration - Observation - Assistance – Performance)	Case Analysis; Practical Exam; Direct Observation of Procedural Skills (DOPS)		
ERG 8.4	Critically analyze three lifting techniques.	K, S	KH/SH					
ERG 8.5	Develop an abatement protocol to prevent commonly encountered lift-related injuries.	K, S	KH/SH					

Code No.	Competency: Student should be able to	Domains K/S/A/C	Levels K/KH/SH/P	Core Y/N	Teaching Leaning Method	Assessment method	Vertical Integration	Horizontal Integration
ERG 8.6	Appreciate between the body's need for dynamic movement and the need for support while seated.	K, S	KH					
ERG 8.7	Apply basic ergonomic and biomechanical principles and job or task analysis to make appropriate chair recommendations.	K, S	KH/SH		Lecture cum Demonstration; Videos; Case Studies; Small Group Discussion; DOAP: (Demonstration - Observation - Assistance - Performance)	Practical Exam; Direct Observation of Procedural Skills (DOPS)		
ERG 8.8	Identify different risk factors in using a video display terminal (VDT).	K, S	KH/SH		Lecture cum Demonstration; Videos; Case Studies; Small Group Discussion; DOAP: (Demonstration - Observation - Assistance - Performance)	Practical Exam; Direct Observation of Procedural Skills (DOPS)		

Code No.	Competency: Student should be able to	Domains K/S/A/C	Levels K/KH/SH/P	Core Y/N	Teaching Leaning Method	Assessment method	Vertical Integration	Horizontal Integration
ERG 8.9	Apply ergonomic principles and recommendations to enhance workstation design for reducing the risks associated with prolonged use.	K, S	KH/SH		Lecture cum Demonstration; Videos; Case Studies; Small Group Discussion; DOAP: (Demonstration - Observation - Assistance - Performance)	Practical Exam; Direct Observation of Procedural Skills (DOPS)		
Topic: Ergonomics in Play, leisure and educational setting competencies:2								
ERG 9.1	Develop basic ergonomics tools for analysis of learning environments and carrying schoolbags.	K, S	KH/SH	Y	Lecture cum Demonstration; Videos; Case Studies; Small Group Discussion; DOAP: (Demonstration - Observation - Assistance - Performance)	Practical Exam; Direct Observation of Procedural Skills (DOPS)

SURGERY & ORTHOPAEDICS

COURSE DESCRIPTION: This course intends to familiarize students with principles of orthopaedic surgery along with terminology and abbreviations used in Orthopaedics for efficient and effective clinical understanding and documentation. It also explores various orthopaedic conditions focusing on epidemiology, pathology, primary and secondary clinical characteristics, conservative and surgical management.

This course intends to familiarize students with principles of General surgery, specialty surgeries like cardiovascular, thoracic, neurosurgery and plastic surgery. It familiarizes the students with appropriate terminology and abbreviations for efficient and effective chart reviewing and documentation. It explores various conditions needing attention to pathology, and their surgical and medical management. The course highlights awareness of various general and specialty surgeries for effective and safe decision making in therapeutic

OBJECTIVES:

KNOWLEDGE:

1. At the end of the course, the student shall be able to:
2. Understand the process of fracture healing along with the complications of fractures and management of fracture, dislocation, congenital and acquired deformities of UE, LE, spine.
3. Classify clinical symptoms of degenerative and inflammatory conditions of joints, and metabolic disorders with special emphasis management of it.
4. Understand the aetiology of work-related musculoskeletal injuries and tumour of musculoskeletal system
5. Understand concepts of biomechanics in overuse injuries in sports.

6. Understand aetiology, pathophysiology, principles of diagnosis and management of common surgical problems including emergencies in adult and children.
7. Understand aetiology, pathophysiology, principles of diagnosis and management of cardiac and neuro surgery conditions
8. Define indications and methods for fluid and electrolytes replacement therapy including blood transfusion.
9. Describe common malignancies in the country and their management including prevention.
10. Describe the basic pathophysiology of common Ear, Nose & Throat (ENT) diseases
11. Identify common gynecological diseases and management.

SKILL Develop clinical skills (history taking, clinical examination and other instruments of examination of various common surgical disorders and emergencies

1. Refer a patient to secondary and/or tertiary level of health care after screening if needed;
2. Perform simple routine evaluations related to OT
3. Assist the common clinical assessment procedures related to surgical conditions.

ATTITUDE:

1. The teaching orthopaedics must aim at developing the attitude in students to apply the knowledge he/she acquires for benefit and welfare of the patients.
2. It is necessary to develop in students a sense of responsibility towards holistic patient care
3. Students should develop behavioural skills and humanitarian approach while communicating with patients, as individuals, relatives, society at large & the co- professionals.

4. The teaching and training in clinical subjects like paediatrics and neurology must aim at developing the attitude in students to apply the knowledge & skills he/she acquires for benefit and welfare of the patients.
5. It is necessary to develop in students a sense of responsibility towards holistic patient care & prognostic outcomes related to OT.
6. Students should develop behavioural skills and humanitarian approach while communicating with patients, as individuals, relatives, society at large & the co- professionals.

SURGERY & ORTHOPAEDICS								
SURGERY								
Topic	**General Surgery**	**No of Competencies: 11**						
SO 1.1	Describe classification of wound, stages of healing and their treatment.	K	KH	Y	Lecture, Bedside clinic, Small group discussion	Written		
SO 1.2	Describe importance of water-electrolyte balance in shock and hemorrhage and describe classification of shock in brief	K	KH	Y	Lecture, Bedside clinic, Small group discussion	Written		
SO 1.3	Describe acute and chronic infections of wound, ulcers, cysts and abscesses, their clinical features and complications with brief knowledge of their management.	K	KH	Y	Lecture, Bedside clinic, Small group discussion	Written		

Code No.	Competency: Student should be able to	Domains K/S/A/C	Levels K/KH/SH/P	Core Y/N	Teaching Leaning Method	Assessment method	Vertical Integration	Horizontal Integration
SO 1.4	Describe in brief various surgeries of head and neck, their indications and complications	K	KH	Y	Lecture, Bedside clinic, Small group discussion	Written		
SO 1.5	Explain indications for various surgeries of alimentary system and their postoperative management.	K	KH	Y	Lecture, Small group discussion Bedside clinics	Written		
SO 1.6	Explain causes of burns, various classification, their medical and surgical management with role of burns rehabilitation team	K	KH	Y	Lecture, Small group discussion, Bedside clinics	Written		OT in surgical conditions
SO 1.7	Describe indications and causes of amputation, criteria for selection of site of amputation and pre and postoperative management	K	KH	Y	Lecture, Small group discussion Bedside clinics	Written	Orthopaedics	OT in surgical conditions
SO 1.8	Explain in brief classification of tumours, clinical features and their pre and post-operative management.	K	KH	Y	Lecture, Small group discussion	Written		

Code No.	Competency: Student should be able to	Domains K/S/A/C	Levels K/KH/SH/P	Core Y/N	Teaching Leaning Method	Assessment method	Vertical Integration	Horizontal Integration
SO 1.9	Etiology and management of surgical incontinence and prolapse rectum	K	KH	Y	Lecture, Small group discussion	Written		
SO 1.10	Hernia-definition, causes, types and management	K	KH	N	Lecture, Small group discussion	Written		
SO 1.11	Describe postoperative complications of abdominal surgery	K	KH	Y	Lecture, Small group discussion	Written		
Topic: Plastic Surgery		**No of Competencies: 5**						
SO 2.1	Describe various Hand injuries, their surgical and post- operative management with complications (including tendon injuries and nerve injuries, tendon transfers)	K	KH	Y	Lecture, Small group discussion Bedside clinics	Written	Plastic surgery	OT in surgical conditions
SO 2.2	Explain various skin grafts and flaps, their classification, criteria for selection and postoperative management	K	KH	Y	Lecture, Small group discussion Bedside clinics	Written	Plastic surgery	OTin surgical conditions

Code No.	Competency: Student should be able to	Domains K/S/A/C	Levels K/KH/SH/P	Core Y/N	Teaching Leaning Method	Assessment method	Vertical Integration	Horizontal Integration
SO 2.3	Explain in brief various indications for cosmetic surgery, keloid and hypertrophic scar, their preoperative surgical and postoperative management.	K	KH	Y	Lecture, Small group discussion Bedside clinics	Written	Plastic surgery	OT in surgical conditions
SO 2.4	Describe in brief new techniques in microvascular surgeries, their advantages and management.	K	KH	Y	Lecture, Small group discussion Bedside clinics	Written	Plastic surgery	OT in surgical conditions
SO 2.5	Explain pressure sores management	K/S	KH	Y	Lecture, Small group discussion Bedside clinics	Written	Plastic surgery	OT in surgical conditions
Topic:	**Neurosurgery**		**No of Competencies: 7**					
SO 3.1	Describe common congenital and childhood disorders such as hydrocephalus, spina bifida, their clinical features, complications and their surgical management with postoperative care.	K	KH	Y	Lecture, Small group discussion Bedside clinics	Written	Clinical Paediatrics medicine and paediatric surgery	

Code No.	Competency: Student should be able to	Domains K/S/A/C	Levels K/KH/SH/P	Core Y/N	Teaching Leaning Method	Assessment method	Vertical Integration	Horizontal Integration
SO 3.2	Describe first aid management of spinal cord injury and its importance and implications	K	KH	Y	Lecture, Small group discussion	Written	Orthopaedics	
SO 3.3	Classify and describe signs and symptoms of spinal and intra-cranial tumors	K	KH	Y	Lecture, Small group discussion Bedside clinics	Written	Orthopaedics	
SO 3.4	Explain Head injury, causes and mechanism of injury, subdural, epidural and intracranial bleeding, pharmacology of drugs used, management in acute stage, types of neurological disorders following Head injury	K	KH	Y	Lecture, Small group discussion Bedside clinics	Written	Pharmacology	
SO 3.5	Describe Neurogenic bladder and its classification and management	K	KH	Y	Lecture, Small group discussion Bedside clinics	Written		
SO 3.6	Explain clinical features and management of Meningocele, Meningomyelocele, Spinal tumors	K	KH	Y	Lecture, Small group discussion	Written	Clinical Paediatric surgery	

Code No.	Competency: Student should be able to	Domains K/S/A/C	Levels K/KH/SH/P	Core Y/N	Teaching Leaning Method	Assessment method	Vertical Integration	Horizontal Integration
SO 3.7	Describe Surgical management of brain disease and CVA	K	KH	Y	Lecture, Small group discussion,	Written		OT in neurological conditions
Topic:	**Cardiovascular and Thoracic Surgery**			**No of Competencies: 2**				
SO 4.1	Describe brief pathology, clinical features, indications, various operative procedures of surgery of cardiac and respiratory conditions	K	KH	Y	Lecture, Bedside clinic, Small group discussion	Written	Cardiovascular surgery	
SO 4.2	Explain pre- and post-surgical management such as Congenital cardiac problems, Coronary artery disease, Peripheral vascular disease	K	KH	Y	Lecture, Small group discussion	Written	Paediatrics	
Topic: ENT			**No of Competencies: 7**					
SO 5.1	Describe problems of ear, nose throat and their management in brief U.R.T infections	K	KH	Y	Lecture, Small group discussion, Bedside clinics	Written	Clinical ENT	

Code No.	Competency: Student should be able to	Domains K/S/A/C	Levels K/KH/SH/P	Core Y/N	Teaching Leaning Method	Assessment method	Vertical Integration	Horizontal Integration
SO 5.2	Enumerate the indications for and Tracheostomy procedure	K	KH	N	Lecture, Small group discussion,	Written/ Viva voce		
SO 5.3	Describe the etiopathogenesis, clinical features and principles of management of Vertigo	K	KH	Y	Lecture, Small group discussion, Bedside clinics	Written		
SO 5.4	Describe the etiopathogenesis, clinical features and principles of management of Dysphagia,	K	KH	Y	Lecture, Small group discussion, Bedside clinics	Written		
SO 5.5	Describe the etiopathogenesis, clinical features and principles of management of Otitis media, vestibular disorders.	K	KH	Y	Lecture, Small group discussion, Bedside clinics	Written		
SO 5.6	Describe the etiopathogenesis, clinical features and principles of management of Otosclerosis,	K	KH	N	Lecture, Small group discussion, Bedside clinics	Written		

Code No.	Competency: Student should be able to	Domains K/S/A/C	Levels K/KH/SH/P	Core Y/N	Teaching Leaning Method	Assessment method	Vertical Integration	Horizontal Integration
SO 5.7	Describe the etiopathogenesis, clinical features and principles of management of Functional Achonia and Deafness	K	KH	Y	Lecture, Small group discussion, Bedside clinics	Written		
Topic: Ophthalmology	**No of Competencies: 7**							
SO 6.1	Describe and discuss common ophthalmological condition in brief and their management (diseases of conjunctiva, cataract)	K	KH	Y	Lecture, Small group discussion, Bedside clinics	Written	Clinical ophthalmology	
SO 6.2	Describe the etiopathogenesis, clinical features and principles of management of Optic nerve tumor	K	KH	Y	Lecture, Small group discussion, Bedside clinics	Written		
SO 6.3	Describe the etiopathogenesis, clinical features and principles of management of Keratoplasty	K	KH	N	Lecture, Lecture, Small group discussion	Written		

Code No.	Competency: Student should be able to	Domains K/S/A/C	Levels K/KH/SH/P	Core Y/N	Teaching Leaning Method	Assessment method	Vertical Integration	Horizontal Integration
SO 6.4	Explain the Principles of eye donation. Enumerate Indications, describe surgical principles, management of eye donation	K	KH	N	Lecture, Small group discussion,	Written		
SO 6.5	Describe the etiopathogenesis, clinical features and principles of management of Diabetic retinopathy	K	KH	Y	Lecture, Small group discussion,	Written		
SO 6.6	Describe the etiopathogenesis, clinical features and principles of management of Glaucoma, Corneal ulcer, iritis,retinitis, detachment of retina, ptosis & Defects of extraoccular muscles	K	KH	N	Lecture, Small group discussion, DOAP, Bedside clinics	Written/ Viva voce		
SO 6.7	Explain and demonstrate the Visual acuity, visual field and refraction testing	K/S	KH/SH	Y	Lecture, Small group discussion, Demonstration	Written/ Viva voce/ Skill assessment		

Code No.	Competency: Student should be able to	Domains K/S/A/C	Levels K/KH/SH/P	Core Y/N	Teaching Leaning Method	Assessment method	Vertical Integration	Horizontal Integration
Topic: Obstetrical and Gynaecology		**No of Competencies: 9**						
SO 7.1	Describe common obstetrical and gyneacological conditions and their management in brief.	K	KH	Y	Lecture, Small group discussion	Written	Clinical Gynaecology and obstetrics	
SO 7.2	Describe the Physiology of menstruation and its disorders	K	KH	N	Lecture, Small group discussion	Written	Physiology	
SO 7.3	Enumerate and describe Hormonal disorders in females,	K	KH	N	Lecture, Small group discussion	Written	Endocrinology	
SO 7.4	Describe Cancer of reproductive organs and management	K	KH	Y	Lecture, Small group discussion	Written	Oncology	
SO 7.5	Describe brief pathology, clinical features, indications, and principles of management of various Infections and STDs in females	K	KH	N	Lecture, Small group discussion	Written	Community medicine	General medicine

Code No.	Competency: Student should be able to	Domains K/S/A/C	Levels K/KH/SH/P	Core Y/N	Teaching Leaning Method	Assessment method	Vertical Integration	Horizontal Integration
SO 7.6	Describe the maternal physiology in pregnancy, Musculoskeletal disorders during pregnancy	K	KH	Y	Lecture, Small group discussion	Written		
SO 7.7	Explain common obstetrical and gynaecological surgeries including postoperative care, prenatal complications investigations and management	K	KH	Y	Lecture, Small group discussion	Written		
SO 7.8	Explain lactation management. Describe Methods of birth control- merits/demerits.	K	KH	Y	Lecture, Small group discussion	Written		
SO 7.9	Describe complications of multiple childbirths	K	KH	N	Lecture, Small group discussion	Written	Pediatrics	
Topic: Surgical Oncology No of Competencies: 4								
SO 8.1	Describe Palliative and reconstructive surgeries in head and neck cancer,	K/A/S	K/KH	Y	Lecture, Group discussion	Written/ Viva voce		

Code No.	Competency: Student should be able to	Domains K/S/A/C	Levels K/KH/SH/P	Core Y/N	Teaching Leaning Method	Assessment method	Vertical Integration	Horizontal Integration
SO 8.2	Enumerate Surgical indications for procedures like FND, and describe excision and flap reconstruction- postoperative management and complications	K	KH	Y	Lecture, Small group discussion, DOAP, Bedside clinics	Written/ Viva voce		
SO 8.3	Enumerate indications for Radical mastectomy and describe procedure, postoperative management and complications	K	KH	Y	Lecture, Small group discussion	Written		OT in surgery
SO 8.4	Describe surgical management of Cancer of GI tract	K	KH	Y	Lecture, Small group discussion	Written		

Code No.	Competency: Student should be able to	Domains K/S/A/C	Levels K/KH/SH/P	Core Y/N	Teaching Leaning Method	Assessment method	Vertical Integration	Horizontal Integration
			ORTHOPAEDICS					
Topic	**Fractures or injury to the bone**		**No of Competencies: 06**					
SO 9.1	Define and classify fractures	K	k	Y	Lecture	Written		
SO 9.2	Enumerate the causes, clinical features &healing of fractures & its complications.	k	K/KH	Y	Lecture	Written		
SO 9.3	Describe general principles of management of Fractures of the Upper Extremity,	k	KH	Y	Lecture	Written	OT in Orthopaedic conditions	
SO 9.4	Describe general principles of management of Fractures of the Lower Extremity and pelvis,	K	KH	Y	Lecture	Written	OT in Orthopaedic conditions	
SO 9.5	Describe general principles of management of fractures of vertebral column	K	KH	Y	Lecture	Written	OT in Orthopaedic conditions

PSYCHIATRY

COURSE DESCRIPTION: At the end of the course student will attained knowledge regarding the scientific principles underlying modern psychiatry theory and practice, skills in order to apply this knowledge to clinical situations and attitudes necessary to identify and respond appropriately to psychological distress and disorder, not only in psychiatric settings but also throughout all areas of medicine.

COURSE OBJECTIVES:

A. KNOWLEDGE

1. List the general causes and preventive measure in psychiatric disorders
2. Classify various psychiatric conditions and understand the general treatment protocols
3. Gain the knowledge regarding the clinical features, causes, ant management of various psychiatric conditions
4. Appreciate legal aspects of psychiatric illness and psychiatric management.

B. SKILL

1. Conduct a full psychiatric history and carry out a mental state examination, including cognitive assessment.
2. Explain how different biological, psychological and social factors may combine to precipitate psychiatric disorder.
3. Explain to patients and their relatives the nature of their condition, its management
4. Use an interviewing style that is empathic and adaptable to specific situations.

C. ATTITUDE

1. Respond empathically to mental illness and psychological distress in all medical and broader settings.
2. Understand that psychiatric illness creates problems with stigma, how this affects patients and their families.
3. Treat patients and their care givers with professionalism and confidentiality.

OCCUPATIONAL THERAPY IN SURGICAL CONDITIONS

COURSE DESCRIPTION: This course intends to familiarize students with principles of rehabilitation in clients with burns, amputation, cancer, traumatic hand injuries and peripheral vascular disease. Familiarizes the students with terminology and abbreviations for efficient and effective chart review and documentation. It explores various conditions needing attention, focusing on pathology, as well as primary and secondary clinical character.

GOAL: The broad goal to teach the undergraduate students OT Application in Surgical Conditions is to have the knowledge, skills and behavioural attributes to function effectively as a occupational therapist and use purposeful activities to promote health and well-being and subsequently improve functional independence and Quality of Life of the patient.

OBJECTIVES

A. KNOWLEDGE

1. Demonstrate knowledge and understanding of common surgical problems in amputation, burns, PVD, hand injuries and cancer.
2. Acquire knowledge of functional limitations in blind deaf and dump.
3. Understand various surgical treatments and become familiar with various surgical procedures
4. To become familiar with various occupational therapy protocols for surgical conditions and know their expected outcomes
5. To provide treatment of occupational performance in the areas of independent living/daily living skills, pre-vocational/work adjustment skills, play/leisure skills, and social skills.

B. SKILL

1. Evaluate and assess patients with surgical Conditions
2. Understand and possibly perform various basic procedures, such as edema assessment, need for splinting and compression garment.
3. Develop specific motor skills utilized in surgical conditions for applying various protocols and planning need for orthosis, compression garments and prosthesis
4. Evaluate environmental barriers to facilitate environmental support.

C. ATTITUDE

1. Acquire a caring and sympathetic attitude appropriate for dealing with patients with surgical conditions
2. Realize the scope of responsibility you assume as an occupational therapist and to that of the family
3. Demonstrate an openness to receive constructive criticism
4. To develop, restore, or improve required skills, habits, and roles for independent, meaningful, and productive living
5. Students should develop behavioural skills and humanitarian approach while communicating with patients, as individuals, relatives, society at large & the co- professionals

RESEARCH METHODOLOGY & BIOSTATISTICS

Course Description:

Research Methodology and Biostatistics: The student should acquire knowledge of principles in scientific methods of enquiry and basic statistical methods of enquiry and basic statistical concepts, be initiated to skills of information searching, identification, retrieval and evaluation, principles of measurement and experimental design. The students should be able to use the above knowledge to carry out a study.

Course Objectives:

This course will provide more knowledge on action of Research Methods & Biostatistical concepts, to understand the role of the theory in research, Stages of research process, steps to follow during research process, to aware the appropriate ways to search and review the literature, types of data collections, variability, sampling techniques etc.,

1. Select a relevant research topic based on contemporary literature and apply Biostatistics concepts.
2. Compare basic quantitative (observational and experimental) study designs, understand their advantages, disadvantages and select the best for a specific research question.
3. Compute, apply and interpret results based on findings.
4. Test the hypothesis and apply research questions to interpret the results
5. Identify different clinical study designs
6. Understand the importance of computers in Community

Course Learning Outcomes

At the end of this course, students will be able to: Describe the research methods, types of research process, study designs. Discuss the Level of evidences, ethical guidelines and methods of writing references. They can able to appreciate the sources and types of data collections, Measures of central tendency, Variability, Probability, Sampling, significances. They can be able to brief out the demography and vital statistics etc.,

At completion of this course, it is expected that the students will be able to

1. Choose the appropriate research design and develop appropriate research hypothesis for a project
2. Develop an appropriate framework for research studies
3. Know the various statistical methods to solve different types of problems
4. Appreciate the importance of Computer in hospital

Competency Table: RESEARCH METHODOLOGY & BIOSTATISTIC

Code No.	Competency: Student should be able to	Domains K/S/A/C	Levels K/KH/SH/P	Core Y/N	Teaching Leaning Method	Assessment Method	Vertical Integration	Horizontal Integration
RESEARCH METHODOLOGY & BIOSTATISTIC								
Topic: Stages of research process No of Competencies: 1								
RMB 1.1	Formulate a research question for a study	K	KH	Y	Lecture, Group Discussions	Written		
Topic: Types of Research No of Competencies: 2								
RMB 2.1	Describe the types of research Qualitative & Quantitative	K	KH	Y	Lecture	Written		
RMB 2.2	Describe and discuss the principles and the methods of collection, classification, analysis, interpretation and presentation of statistical data	K	KH	Y	Lecture	Written		

Code No.	Competency: Student should be able to	Domains K/S/A/C	Levels K/KH/SH/P	Core Y/N	Teaching Leaning Method	Assessment Method	Vertical Integration	Horizontal Integration
Topic: Algorithm of Study Designs and Level of Evidence		**No of Competencies: 2**						
RMB 3.1	Enumerate, Describe and demonstrate the application of elementary statistical methods including test of significance in various study designs	K /A/S	KH/SH	Y	Lecture, Seminar	Written		
RMB 3.2	Identify and explain the Five levels of evidence. (Systematic review or Meta-analysis, Randomized control trials Quasi- Experimental, Non-Experimental)	K	KH	Y	Lecture	Written		
Topic: Review of Literature		**No of Competencies: 1**						
RMB 4.1	Enumerate Various sources of references and Acknowledgement of sources	K	K	Y	Lecture, Small group Discussions	Written		
Topic: Reliability & Validity		**No of Competencies: 2**						
RMB 5.1	Describe reliability and Validity	K	K/KH	Y	Lecture	Written		

Code No.	Competency: Student should be able to	Domains K/S/A/C	Levels K/KH/SH/P	Core Y/N	Teaching Leaning Method	Assessment Method	Vertical Integration	Horizontal Integration
RMB 5.2	Enumerate the types and explain the difference between reliability and Validity	K	K/KH	Y	Lecture	Written		
Topic: Ethical Guidelines No of Competencies: 2								
RMB 6.1	Discuss the historical background in evolution of ethical guidelines.	K	K/KH	Y	Lecture	Written		
RMB 6.2	Describe the Ethical Guidelines for Biomedical Research in Human Participants	K	K	Y	Lecture	Written		
Topic: Protocol Writing No of Competencies: 1								
RMB 7.1	Understand Protocol Writing for Submission to Institutional Review Board/Institutional Ethics Committee (IRB/IEC).	K/S/A/C	K/KH/SH	Y	Lecture, Group discussion, Seminar	Written, Skill Assessment

Topic Methods of Writing References. No of Competencies: 1								
RMB 8.1	Enumerate & understand different methods in research	K/S	K/KH /SH	Y	Lecture, DOAP	Written, Skill Assessment		
BIOSTATISTICS								
Topic Introduction to Statistics &Common Statistical Terminologies No of Competencies: 2								
RMB 9.1	Define and describe common terminologies (Population, Sample, Constant, Variable)	K	KH	Y	Lecture	Written		
RMB 9.2	Understand its scope and limitation	K	KH	Y	Lecture	Written		

Code No.	Competency: Student should be able to	Domains K/S/A/C	Levels K/KH/SH/P	Core Y/N	Teaching Leaning Method	Assessment Method	Vertical Integration	Horizontal Integration
Topic Sources & Types of Data, Data Collection & Presentation			**No of Competencies: 2**					
RMB 10.1	Enumerate & explain the types and sources of data (Primary & Secondary Source Ordinal, Nominal, Ratio Interval Quantitative & Qualitative)	K	K/KH	Y	Lecture, Small Group discussion	Written		
RMB 10.2	Describe the Scales of measurement of data, Surveys, Records, Tabulation & Graphs	K	K/KH	Y	Lectures, Small Group discussion	Written		
Topic Measures of Central tendency & Location.			**No of Competencies: 2**					
RMB 11.1	Enumerate and demonstrate Common sampling techniques, simple statistical methods, frequency distribution,	K/S	K/KH/SH	Y	Lecture, small Group discussion	Written		
RMB 11.2	Understand the Measures of central tendency and dispersion	K	K/KH	Y	Lecture, small Group discussion	Written		

Code No.	Competency: Student should be able to	Domains K/S/A/C	Levels K/KH/SH/P	Core Y/N	Teaching Leaning Method	Assessment Method	Vertical Integration	Horizontal Integration
Topic Variability & its Measures Errors in measurement and their control No of Competencies: 1								
RMB 12.1	Understand the terms Range, Quartile deviation, Mean deviation, Standard deviation, Coefficient of variation, SEM, SEP.	K	K/KH	Y	Lecture, Small Group discussion	Written		
Topic Probability No of Competencies: 2								
RMB 13.1	Define & understand Addition theorem of probability, Multiplication theorem of probability.	K	K	Y	Lecture	Written		
RMB 13.2	Understand Probability and Non-Probability distribution	K	K	Y	Lecture	Written

OCCUPATIONAL THERAPY IN MUSCULOSKELETAL CONDITIONS

Course Description: This course involves a better understanding of the Occupational Therapy role in various Orthopedic conditions. It includes Occupational Therapy evaluations, identifying occupation-based problem statements and using appropriateModels/ Frames of references/ Approaches for Occupational Therapy intervention. This course also covers the application and fabrication of various orthoses in Orthopedic conditions.

Goal: The broad goal of the subject Occupational Therapy in Orthopedic conditions, is to enable the undergraduate student, to be an active participant in learning the knowledge, skills, behavioural, and attitudinal attributes, for assessing and providing occupational therapy intervention in various Orthopedic conditions.

Course Objectives:

A. Knowledge:

At the end of the course, the student shall be able to:

1. Understand Occupational Therapy evaluation and problem identification in Orthopedic conditions
2. Understand the use of appropriate Models/ Frames of references/ approaches in Occupational Therapy intervention in Orthopedic conditions
3. Understand the application and fabrication of orthoses-related Orthopedic conditions
4. Understand the Occupational Therapy assessment and intervention for injuries, fractures and arthritic conditions of upper extremity, lower extremity and spine

5. Understand the Occupational Therapy assessment and intervention for metabolic bone disorders and repetitive stress syndrome
6. Understand the Occupational Therapy assessment and intervention for congenital Orthopedic deformities
7. Understand the Occupational Therapy assessment and intervention for neuromuscular deformities in Cerebral Palsy and PoliomyelitisUnderstand the role of Occupational Therapy in Sports Medicine

B. Skills:

1. Select and perform the various evaluations and assessments used in Occupational Therapy in Orthopedic conditions
2. Document occupational therapy assessment and intervention based on the Occupational therapy practice framework.
3. Develop clinical skills to apply therapeutic use of self, activity prescription and grading, and environmental modifications.

C. Attitude:

1. Develop an empathetic and humanitarian approach.
2. Value confidentiality and priorities of the service seeker.
3. Respect towards the service seeker.

OCCUPATIONAL THERAPY SERVICES & MANAGEMENT

Course Description: This course involves a better understanding of the overall administration of the Occupational Therapy department/ Institute in Government & Private setup, Budgeting, Ethical practice of Occupational Therapy. The course involves a better understanding of Bioethics, ethical considerations, service management, implication of different environments on OT practices industrial Rehabilitation.

Goal: The broad goal to teach the undergraduate students about OT Services & management is to have the knowledge, to function effectively as an occupational therapist, set up the department and manage the services in different settings.

Course Objectives:

Knowledge : at end of the course :

1. Understand the term Bioethics and Occupational Therapy code of ethics
2. Describe various service managements under occupational therapy
3. Describe the Human and non human environment and OT process
4. Describe importance of practice in different setups & consideration of human sexuality in relation to disability and its management in occupational Therapy
5. Describe the strategies & approaches used in stress management during Occupational Therapy intervention

6. Described its importance of evidence based practice in occupational therapy.
7. Describe the strategies in Industrial rehabilitation into Occupational therapy practice including Ergonomic assessment of office, hospital & school furniture manufactured in the industries & Ergonomic assessment of industrial workers , computer operators & other employees
8. Describe the entrepreneurship methods in the OT practice

COMMUNITY MEDICINE, PUBLIC HEALTH & SOCIOLOGY

COURSE DESCRIPTION: This course aims to provide students with a comprehensive understanding of community medicine and sociology in the context of occupational therapy. It covers key concepts in epidemiology, health programs in India, preventive medicine across different life stages, nutrition and health, and the role of social sciences in healthcare. The course also explores social problems faced by people with disability, the role of medical social workers, environmental health, disaster management, occupational health, international health, and the healthcare services provided by AYUSH. Students will learn to apply these concepts in occupational therapy to enhance community integration and holistic care for individuals with disabilities.

GOAL: The primary goal of teaching Community Medicine and Sociology to undergraduate students is to equip them with the knowledge to function effectively as occupational therapists. The focus is on improving the health and quality of life of individuals and communities through prevention, early intervention, and rehabilitation.

OBJECTIVES

A. KNOWLEDGE

By the end of the course, the student shall be able to:

1. Define community medicine and understand the role of the occupational therapist in the team.
2. Define and explain epidemiology, including the epidemiology of various infections.
3. Enumerate and describe health programs for community integration and international agencies providing support.
4. Understand the role of preventive medicine in obstetrics, gynaecology, paediatrics, and geriatrics.

5. Describe nutritional components, profiles of principal foods, and the food guide pyramid.
6. Identify nutritional problems in public health and malnutrition factors in selected diseases.
7. Explain the concept of nutritional surveillance.
8. Describe the context of medicine and its relation to social sciences.
9. Describe social and behavioural sciences, including terms such as sociology, community, socialization, and social problems.
10. Identify social problems faced by disabled individuals and the role of various agencies in assisting them.
11. Identify the role of medical social workers.
12. Understand the importance of a safe environment and its impact on health.
13. Define and identify methods of sanitation and biowaste management.
14. Identify and describe principles, aspects, and implications of disaster management.
15. Define occupational health, types of occupational hazards, and occupational diseases.
16. Describe international health plans and the roles of international health agencies.
17. Identify different healthcare facilities provided by AYUSH

NCAHP Since-2021

COMPETENCIES TABLE : Community medicine, Public health and Sociology

OCCUPATIONAL THERAPY IN NEUROLOGICAL CONDITIONS

COURSE DESCRIPTION

This course intends to familiarize students with terminology & abbreviations for efficient & effective chart reviewing & documentation for occupational therapy in Neurological conditions. It also gives overview of etiology as well as primary & secondary clinical characteristics, complications and their management. Discusses & integrates subsequent occupational therapy management of Acute and chronic Neurological disorders including genetic disorders, infective conditions of the brain and spine with reference to red flag indicators, indications, contraindications & precautions to formulate appropriate therapeutic intervention.

GOAL: The goal to teach the undergraduate students OT in Neurological Conditions is to have the knowledge, skills and behavioral attributes to function effectively as an occupational therapist and subsequently improve functional independence and Quality of Life of the patient.

OBJECTIVES:

A. KNOWLEDGE: At the end of the course, the student shall be able to:

1. Identify the clinical presentation of common neurological conditions with special reference to conditions like Stroke, Parkinsonism, Multiple Sclerosis and other conditions like metabolic and muscular disorders.
2. Outline and apply various modalities and methods of management including various approaches, exercise protocol, splinting process.
3. Recognize Occupational dysfunctions in relation to person, task and environment due to neurological involvement
4. Plan and provide occupational therapy treatment under supervision for occupational performance areas of independent living/daily living skills, leisure skills, social skills, pre-vocational/work adjustment skills.

B. SKILLS: At the end of the course, the student shall be

1. Develop clinical skills (history taking, clinical examination and other instruments of examination) to know the clinical manifestations and its impact on function.Perform simple assessments using standardized methods, test batteries and instruments to assess performance components.
2. Assist the common bedside evaluations and assessment procedures related to neurological conditions and be able to document their findings and intervention.

C. ATTITUDE:

1. The teaching and training in "OT in Neurological condition" must aim at developing the attitude in students to apply the knowledge & skills he/she acquires for benefit and welfare of the patients.
2. It is necessary to develop in students a sense of responsibility towards holistic patient care & prognostic outcomes of therapy
3. Students should develop behavioral skills and humanitarian approach while communicating with patients, as individuals, relatives, society at large & the co- professionals.

Examination Scheme

Scheme of examination for University Practical exam 100 Marks

Short Case	Long Case	Viva voce	Communication skills	Total
25 marks	50marks	20 marks	5 marks	100 marks

COMMUNITY OCCUPATIONAL THERAPY & REHABILITATION

Course Description:

This course involves a better understanding of the overall Occupational Therapy application in community-based setup & rehabilitation perspective in Occupational therapy. The course involves a better understanding and application of different interventions Frames of references, approaches in community base Occupational Therapy & skills required for planning rehabilitation goals

Goals:

The broad goal to teach the undergraduate students different aspects of Community Occupational Therapy is to have the knowledge, skills and behavioral attributes to function effectively as a occupational therapist in community improve Quality of life & understand different rehabilitative measures to enhance functional independence and Quality of Life of the patient.

Course Objectives (competency statements) – The objectives of this course are:

Knowledge:

1. Describe e community based rehabilitation, difference between IBR & CBR & understand role of occupational therapist in the team
2. Describe the components in wellness program in occupational therapy
3. Understand the term community integration, mobility & strategies to enhance the community integration
4. Understand about low cost aids & appliances used in Occupational Therapy intervention
5. Understand the organisation of Community based rehabilitation centre

6. Enumerate various additive therapies & explain their uses, describe about assistive technologies used in persons with disabilities
7. Identify need for various adjunctive therapies to occupational therapy & discuss their benefits to persons with disabilities
8. Understand Physical agent modalities, its principles & implementation in Occupational Therapy intervention

Skills:

1. Understand role of occupational therapy intervention in disaster management
2. Identify the environmental & architectural barriers, plan intervention to overcome them
3. Evaluate the disability as per Gazette guidelines. Laws for certification, perform Disability assessment for person with disability
4. Identify occupational demands in driving & plan strategies for driving rehabilitation
5. Evaluate various factors responsible for successful mobility & adaptations used for wheelchair mobility & seating adaptations
6. Identify pain management & plan intervention in occupational therapy

NCAHP
Since-2021

Attitude:

1. The teaching and training in "CB OT & Rehabilitation" must aim at developing the attitude in students to apply the knowledge & skills he/she acquires for benefit and welfare of the patients.
2. It is necessary to develop in students a sense of responsibility towards holistic patient care & prognostic outcomes of therapy.
3. Students should develop behavioural skills and humanitarian approach while communicating with patients, as individuals, relatives, society at large & the co- professionals.

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies	Core Y/N	Teaching Learning methods	Assessment methods	Number required to certify P	Vertical Integration	Horizontal Integration
COMMUNITY OCCUPATIONAL THERAPY									
Topic: Community Based Rehabilitation –Introduction					**No of competencies: 5**				
COTR 1.1	Define Community Based Rehabilitation	K	KH	Y	Lecture	written			
COTR 1.2	Explain models, structure, process and outcome of CBR.	K	KH	Y	Lecture, DOAP	Written			
COTR 1.3	Discuss the Role of Occupational Therapy and the contributions of other health professionals in CBR.	K	KH	Y	Lecture	Written, viva			
COTR 1.4	Describe Difference between CBR and IBR	K	KH	Y	Lecture	Written			
COTR 1.5	Explain Treatment approach Alternatives	K	KH	Y	Lecture	written			

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies	Core Y/N	Teaching Learning methods	Assessment methods	Number required to certify P	Vertical Integration	Horizontal Integration
Topic: Wellness program & Preventive Occupational Therapy				**No of competencies: 4**					
COTR 2.1	Define Health, Health promotion & wellness	K	KH	Y	Lecture	written			
COTR 2.2	Explain the hypothesis of association of occupation with balance & participation to promote Health	K	K	Y	Lecture	viva			
COTR 2.3	Discuss research related to wellness & health promotion	K	K	Y	Lecture	Viva, written			
COTR 2.4	Describe the wellness & health promotion in Occupational therapy	K	KH	Y	Lecture	written			
Topic: Community Integration			**No of Competencies: 6**						
COTR 3.1	Identify community integration factors	K	K	Y	Lecture	written			
COTR 3.2	Describe the approaches used in Fall prevention to enhance mobility and safety	K	KH	Y	Lecture	written			

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies	Core Y/N	Teaching Learning methods	Assessment methods	Number required to certify P	Vertical Integration	Horizontal Integration
COTR 3.3	Enumerate the factors required for Driving Skills	K	K	Y	Lecture	Written, Viva voce			
COTR 3.4	Identify Prerequisite for Driving skills	K	KH	Y	Lecture	written			
COTR 3.5	Demonstrate Visual perceptual assessment for driving	K	SH	Y	Lecture/ DOAP	Written, Viva voce, Skill assessment			
COTR 3.6	Describe The occupational therapy intervention to improve/enhance driving skills	K, S	KH	Y	Lecture, DOAP session	Written, Viva voce			
Topic: OT in occupational hazards			**No of Competencies: 2**						
COTR 4. 1	Identify Occupational Hazards	K	K	Y	Lecture	Written, Viva voce			
COTR 4. 2	Describe the strategies for management of prevention of occupational hazards	K	K	Y	Lecture	Written, Viva voce			

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies	Core Y/N	Teaching Learning methods	Assessment methods	Number required to certify P	Vertical Integration	Horizontal Integration
Topic: Occupational therapy in Disaster management			**No of Competencies: 3**						
COTR 5.1	Describe Anticipated calamities or Disaster in India	K	K	Y	Lecture	Written, Viva voce			
COTR 5.2	Identify the role of Occupational therapy in prevention of disaster	K	K	Y	Lecture	Written, Viva voce			
COTR 5.3	Describe the role of Occupational therapy in Acute & post disaster events as a team member	K	K	Y	Lecture	Written, Viva voce			
Topic: Environmental Vs. Architectural Barriers			**No of Competencies: 4**						
COTR 6. 1	Describe various factors in Assessment of Environment	K	K	Y	Lecture	Written, Viva voce			
COTR 6. 2	Describe the strategies to manage & overcome architectural barriers	K	KH	Y	Lecture	Written, Viva voce			

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies	Core Y/N	Teaching Learning methods	Assessment methods	Number required to certify P	Vertical Integration	Horizontal Integration
COTR 6. 3	Indian & international guidelines for barrier free environment (Toilet, Kitchen, bed room, Ramp/stairs, public transport facility etc.)	K	KH	Y	Lecture	Written, Viva voce			
COTR 6. 4	Web accessibility	K	KH	Y	Lecture	Written, Viva voce			
Topic: Disability & Health evaluation, certification & rights to disabled person							**No of Competencies: 5**		
COTR 7.1	Describe International Classification of Functioning, Disability & Health: WHO's ICF 2001 & older editions of ICIDH	K	SH	Y	Lecture	Written, Viva voce			
COTR 7.2	Discuss Magnitude of disability problems, its causes & future trends	K	KH	Y	Lecture	Written, Viva voce			

NCAHP Since-2021

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies	Core Y/N	Teaching Learning methods	Assessment methods	Number required to certify P	Vertical Integration	Horizontal Integration
COTR 7.3	Describe Persons with Disability Act (1995), National Trust Act 1999, RCI Act 1992, Right to Person with Disabilities (RPwD) Act (2016) by Government of India	K	KH	Y	Lecture	Written, Viva voce			
COTR 7.4	Identify & describe the concepts of disability evaluation and certification in India and its Social Legislation	K	SH	Y	Lecture	Written, Viva voce			
COTR 7.5	Describe the role of Occupational Therapy in Prevention & detection of disability	K	KH	Y	Lecture	Written, Viva voce

REHABILITATION									
Topic: Driving Rehabilitation for persons with Disabilities				**Competencies: 3**					
COTR 8.1	Describe the skills required in Driving	K	KH	Y	Lecture	Written, Viva voce			
COTR 8.2	Enumerate the factors affecting driving skills	K	KH	Y	Lecture	Written, Viva voce			
COTR 8.3	Describe standardised Assessments used in Driving	K	SH	Y	Lecture, DOAP	Written, Viva voce			
Topic: Mobility & seating			**No of Competencies: 5**						
COTR 9.1	Identify needs of assessment mobility aids	K	K	Y	Lecture	Written, Viva voce			
COTR 9.2	Describe assessment factors for mobility aids	K	KH	Y	Lecture	Written, Viva voce			
COTR 9.3	Discuss the prescription of mobility & seating aids & appliances	K	SH	Y	Lecture, DOAP	Written, Viva voce			

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies	Core Y/N	Teaching Learning methods	Assessment methods	Number required to certify P	Vertical Integration	Horizontal Integration
COTR 9.4	Identify the needfor selection of Assistive aids for mobility & ambulation	K	KH	Y	Lecture	Written, Viva voce			
COTR 9.5	Describe the factors considered for fitting of Assistive devicesfor ambulation	K	KH	Y	Lecture	Written, Viva voce			
Topic: Wheelchair & seating training & adaptations				**No of Competencies: 4**					
COTR 10.1	Describe Wheel chair selection process	K	KH	Y	Lecture	Written, Viva voce			
COTR 10.2	Describe Wheel chair assessment, assessment for adaptations	K	SH	Y	Lecture, DOAP	Written, Viva voce			
COTR 10.3	Describe types, parts, adaptations in wheelchair	K	SH	Y	Lecture, DOAP	Written, Viva voce			
COTR 10.4	Describe training wheelchair maneuvering & safety assessment in wheelchair	K	SH	Y	Lecture, DOAP	Written, Viva voce			

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies	Core Y/N	Teaching Learning methods	Assessment methods	Number required to certify P	Vertical Integration	Horizontal Integration
Topic: Low cost aids & appliances			**No of Competencies: 3**						
COTR 11.1	Identify needs of low cost appliances	K	K	Y	Lecture	Written, Viva voce			
COTR 11.2	Describe innovative low cost aids & appliances	K	KH	Y	Lecture	Written, Viva voce			
COTR 11.3	Describe various therapeutic equipment, splints, adaptive devices used in CBR setup	K	KH	Y	Lecture	Written, Viva voce			
Topic: Organisation & administration of CBR centre				**No of Competencies: 3**					
COT R 12.1	Describe the principles of organization & administration.	K	KH	Y	Lecture	Written, Viva voce			
COT R 12.2	Prepare Organizational chart	K	K	Y	Lecture	Written, Viva voce			
COT R 12.3	Describe procedure for starting a new Rehabilitation Centre, survey required & planning	K	KH	Y	Lecture	Written, Viva voce			

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies	Core Y/N	Teaching Learning methods	Assessment methods	Number required to certify P	Vertical Integration	Horizontal Integration
Topic: Additive Therapy		**No of Competencies: 5**							
COTR 13.1	Enumerate the principals & the modalities used in Ayurveda, Yoga and Naturopathy, Unani, Siddha, Homeopathy	K	K	N	Lecture	Written, Viva voce			
COTR 13.2	Describe the various approaches & techniques used in Virtual Reality	K	KH	Y	Lecture	Written, Viva voce			
COTR 13.3	Describe about Assistive & adaptive Technology	K	KH	Y	Lecture	Written, Viva voce			
COTR 13.4	Describe the various new approaches in rehabilitation such as Tele-rehabilitation and Robotics	K	KH	Y	Lecture	Written, Viva voce			
COTR 13.5	Describe Computer / IT application in rehabilitation	K	KH	Y	Lecture	Written, Viva voce			

NCAHP Since-2021

OCCUPATIONAL THERAPY PRACTICES IN PSYCHIATRY

Course Description : This course offers the student to learn the foundational concepts of occupational therapy in psychiatry. It includes standardised and non-standardised occupational therapy psychiatric evaluations and assessments. The course introduces the student to various occupational therapy psychiatric settings and teaches theoretical and practical skills in using appropriate Models/ Frames of references/ Approaches for Occupational Therapy intervention throughout human lifespan.

Goal: The broad goal of Occupational therapy in psychiatry subject, is to enable the undergraduate student, to be an active participant in learning the knowledge, skills, behavioral, and attitudinal attributes, for assessing and providing occupational therapy intervention in psychiatry.

Course Objectives:

A. **Knowledge**: At the end of the course, the student shall be able to:

1. Outline the history and evolution of occupational therapy in psychiatry.
2. Apply the foundational knowledge of occupational therapy in psychiatry.
3. Relate to the various settings of occupational therapy in psychiatry.
4. To study the theory and practical skills in using appropriate Models/ Frames of references/ Approaches for Occupational Therapy intervention throughout human lifespan

B. **Skills:**

1. Select and perform the various evaluations and assessments used in occupational therapy in psychiatry.
2. Document occupational therapy assessment and intervention based on Occupational therapy practice framework.
3. Develop clinical skills to apply therapeutic use of self, activity prescription and grading, and environmental modifications.

C. **Attitude:**

1. Develop an empathetic and humanitarian approach.
2. Value confidentiality and priorities of the service seeker.
3. Respect towards the service seeker.

Course Outcome:

1. Know the history and evolution of occupational therapy mental health.
2. Describe the foundational knowledge of occupational therapy mental health.
3. Demonstrate the skills needed for occupational therapy assessment and intervention of various psychiatry conditions.

Scheme of examination for University Practical exam 100 Marks

Occupational Therapy in Paediatric Conditions

COURSE DESCRIPTION: This course intends to familiarize students with terminology & abbreviations for efficient & effective chart reviewing & documentation for occupational therapy in paediatric conditions. It also gives overview of etiology as well as primary & secondary clinical characteristics, complications and their management. Discusses & integrates subsequent occupational therapy management of Neurodevelopment disorders, genetic disorders, and musculoskeletal conditions, infective conditions of CNS in paediatrics, with reference to red flag indicators, indications, contraindications & precautions to formulate appropriate therapeutic intervention.

GOAL: The goal to teach the undergraduate students OT in Pediatrics is to have the knowledge, skills and behavioural attributes to function effectively as an occupational therapist and subsequently improve functional independence and Quality of Life of the patient.

OBJECTIVES:

A. KNOWLEDGE:

At the end of the course, the student shall be able to:

1. Identify the clinical presentation of common paediatric conditions with special reference to Neurodevelopmental conditions like cerebral palsy, Autism, ADHD and other conditions like congenital, metabolic and muscular disorders
2. Outline and apply various modalities and methods of management including various approaches, exercise protocol, splinting process.
3. Recognize atypical behaviour in children and its OT management
4. Plan and provide occupational therapy treatment under supervision for occupational performance areas of independent living/daily living skills, play/leisure skills, social skills, pre-vocational/work adjustment skills

B. SKILLS:

At the end of the course, the student shall be

1. Develop clinical skills (history taking, clinical examination and other instruments of examination) to know the clinical manifestations and its impact on function.
2. Perform simple assessments using standardised methods, test batteries and instruments to assess performance components.
3. Assist the common bedside evaluations and assessment procedures related to paediatric conditions and be able to document their findings and intervention.

C. ATTITUDE:

1. The teaching and training in "OT in paediatric condition" must aim at developing the attitude in students to apply the knowledge & skills he/she acquires for benefit and welfare of the patients.
2. It is necessary to develop in students a sense of responsibility towards holistic patient care & prognostic outcomes of therapy
3. Students should develop behavioural skills and humanitarian approach while communicating with patients, as individuals, relatives, society at large & the co- professionals.

Scheme of examination for University Practical exam

Short case	Long Case	Viva voce	Communication skills	Total
25 marks	50marks	20 marks	5 marks	100 marks

Competencies table: Occupational Therapy in Paediatric Conditions

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
OCCUPATIONAL THERAPY IN PAEDIATRIC CONDITIONS								
Topic: Development, Milestones and Reflexes **No of Competencies: 3**								
OTPC 1.1	Demonstrate developmental Milestones and physiological measures in typical and child with developmental delay. (Physical, sensory motor, Cognitive perceptual, play and social and emotional)	K, S, A, C	KH, SH	Y	Lecture, Observation, DOAP, Case study, Case presentation	Written, Viva, Practical, OSCE	FOT II, OTDP2, Developm-ental Psychology	OT in Neurological Conditions, OT Practices in Psychiatry
OTPC 1.2	Demonstrate the normal and abnormal reflex patterns.	K, S, A	KH, SH		Lecture, practical, case presentation	Written, Viva, practical, DOAP		
OTPC 1.3	Explain the Paediatric occupational dysfunctions using the ICF and OTP Frameworks.	K, S	KH, SH		Lecture, Case Presentation	Written, Viva, Practical	OTDP II	
Topic: Approaches used in Paediatric Occupational therapy **No of Competencies: 15**								

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
OTPC 2.1	Describe the principles and application of various evidence based treatment approaches used in paediatric OT.	K	KH	Y	Lecture, Case study, case presentation, seminar	Written, Viva Voce, Practical		
OTPC 2.2	Document the OT assessment and intervention in Paediatric conditions based on Occupational Therapy Practice	K	KH, SH		Lecture, DOAP session, case study, seminar, presentations	Written, Viva voce, Skill assessment ,		
OTPC 2.3	Discuss Philosophy of neurodevelopmental treatment	K	KH		Lecture	Written/ Viva Voce	OTDP I	
OTPC 2.4	Identify Key Principles of NDT-preparation of movement patterns , developmental sequences, sensorimotor experience ,key points of control, All day management	K/S	SH		Lecture/ DOAP session	Written/ Viva voce/Skill assessment /Practical	OTDP I	
OTPC 2.5	Document about Integrating NDT with Occupational Functioning Model in developmental Disorders	K/S	KH		Lecture/ DOAP session	Written/ Viva voce	OTDP I	

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
OTPC 2.6	Describe a Model for Sensory Processing Underlying Concepts for Sensory- Processing Patterns based on Sensory Integration Therapy	K	KH		Lecture	Written	OTDP I	
OTPC 2.7	Identify Patterns of Sensory Processing from Dunn's Model in children with Sensory processing disorders	K/S	SH		Lecture/DOAP session	Written/Viva voce/Skill assessment /Practicals	OTDP I, psychology, Psychiatry	
OTPC 2.8	Define Goals of Occupational Therapy Using Sensory Integration Strategies	K/S	KH		Lecture/ DOAP session	Written/ Viva voce	OTDP I, psychology, Psychiatry	
OTPC 2.9	Discuss Report Preparation for Sensory processing issues	K	KH		Lecture	Written/ Viva Voce	OTDP I, psychology, Psychiatry	
OTPC 2.10	Demonstrate the Sensory motor approaches such as Roods for improving Motor control	K/S	SH		Lecture/ DOAP session	Written/ Viva voce/Skill assessment /Practicals	OTDP I Neurology	

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
OTPC 2.11	Describe & discuss the use Play therapy in Paediatric Occupational therapy settings	K	KH		Lecture, small group discussion, Case based, study	Written/ Viva Voce	OTDP II	
OTPC 2.12	Describe adjunctive treatment measures in paediatric occupational therapy not limited to CIMT, , MFR, KT, HWT, Yoga, Animal assisted therapy, Aqua therapy, AAT.	K	KH,SH		Lecture/ DOAP session/case study/ seminar/ presentations	Written/ Viva voce/Skill assessment /Practical		
OTPC 2.13	Explain Classification-various neurological & neurosurgical Conditions & their considerations	K	KH		Lecture, DOAP	Written		
OTPC 2.14	Describe OT & Family based intervention in Occupational Therapy	K	KH		Lecture, DOAP	Viva, written	OT DP II	
OTPC 2.15	Demonstrate the appropriate documentation after follow up	K, S	KH, SH		Lecture, DOAP session, case study, seminar, presentations	Written, Viva voce, Skill assessment, Practical	Paediatrics	

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
Topic: Introduction to Neurodevelopmental Disorders No of Competencies: 4								
OTPC 3.1	Define and Explain Classification of neurodevelopmental disorders with emphasis on Intellectual Disabilities, Communication Disorders, Autism Spectrum Disorder, Attention - Deficit Hyperactive Disorder, Specific Learning disorder, and other Sensory Processing dysfunctions	K,S	KH, SH		Lecture, DOAP session, case study, seminar, presentations	Written, Viva voce, Skill assessment, Practical	Paediatrics	
OTPC 3.2	Explain the occupational dysfunctions in NDD (ICF and OTP Frameworks).	K, S	KH, SH		Lecture, DOAP session, case study, seminar, presentations	Written, Viva voce, Skill assessment, Practical		
OTPC 3.3	Enlist Treatment Approaches using Motor, Sensory, cognitive, perceptual and client centred based interventions.	K, S	KH, SH		Lecture, DOAP session, case study, seminar, presentations	Written, Viva voce, Skill assessment, Practical		

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
OTPC 3.4	Alternative treatment Management in the management of Neurodevelopmental disorders	K, S	KH, SH		Lecture, DOAP session, case study, seminar, presentations	Written, Viva voce, Skill assessment, Practical		
Topic :Early Intervention **No of competencies 6**								
OTPC 4.1	Discuss importance of Early intervention in developmental disabilities	K	KH	Y	Lecture	Written/ Viva voce	Paediatrics	
OTPC 4.2	List Legislation & influences on services for children with developmental deviations	K	KH		Lecture	Written		
OTPC 4.3	Identify Goal intervention of early	K, S	SH		Lecture, DOAP session	Written, Viva voce, Skill assessment, Practical		
OTPC 4.4	Discuss the Role of occupational therapy	K	KH		Lecture	Written, Viva voce		

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
OTPC 4.5	Choose Service delivery in early intervention program	K	KH		Lecture	Written		
OTPC 4.6	Inform Parent about role of Occupational Therapy & choose appropriate professional interaction	K, C	KH		Lecture, DOAP session	Written, Viva voce		
Topic - Cerebral Palsy No of competencies -11								
OTPC 5.1	Describe Historical Perspective	K	KH	Y	Lecture	written	OTD P I	CBOT & R
OTPC 5.2	Identify Scope of cerebral Palsy	K	KH		Lecture	written		
OTPC 5.3	Demonstrate Comparison of normal & abnormal development	K/S	SH		Lecture, DOAP session	Written, Viva voce, skills assessment, Practicals		

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
OTPC 5.4	Enumerate and describe the various Assessments in cerebral palsy	K	KH,SH		Lecture, DOAP session, case study, seminar, presentations	Written, Viva voce, Skill assessment, Practical		
OTPC 5.5	Classify Types of cerebral palsy	K	KH		Lecture	written		
OTPC 5.6	Demonstrate understanding of Consequences of abnormal neurological patterns of development	K	KH		Lecture	Written, Viva voce		
OTPC 5.7	Identify the Dysfunctions in oral motor abilities	K	KH		Lecture	written		
OTPC 5.8	Identify & discuss Assessment of oral Motor disabilities	K	SH		Lecture, DOAP	Viva, skills assessment, Practicals		
OTPC 5.9	Identify the treatment approaches for oral motor disabilities	K	KH		Lecture	Written, Viva voce		

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
OTPC 5.10	Describe Overview of treatment methods in cerebral Palsy	K	KH		Lecture, DOAP	Written, Viva voce		
OTPC 5.11	Document Occupational Therapy treatment in cerebral Palsy	K, S	SH		Lecture, DOAP	Written, Viva voce, skills assessment		
Topic: Other Neurodevelopmental disorders		**No of competencies- 4**						
OTPC 6.1	Discuss Incidence of Autism , ADHD & seizures disorders & their aetiology	K	KH	Y	Lecture	Written, Viva voce	Psychology	
OTPC 6.2	Describe the Developmental characteristics of Autism, ADHD & seizures disorders	K	KH		Lecture	Written, Viva voce		
OTPC 6.3	Describe Treatment & prognosis in Autism ,ADHD & seizures disorders	K	KH		Lecture	Written, Viva voce		

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
OTPC 6.4	Document Role of Occupational Therapy in the treatment of Autism, ADHD & seizures disorders	K, S, C	SH		Lecture, DOAP	Written, Viva voce, skills assessment		
Topic: OT in Neonatal Intensive care unit		**No of competencies- 6**						
OTPC 7.1	Understand the scope of Occupational Therapy & knowledge required for competent practice in the neonatal intensive care unit (NICU).	K	KH	Y	Lecture	Written, Viva voce		
OTPC 7.2	To understand the traditional occupational therapy approach of rehabilitation and developmental stimulation with current concepts of individualized developmentally supportive care in the NICU	K	KH		Lecture	Written, Viva voce		
OTPC 7.3	Define and compute postconceptional, chronologic, and corrected age.	K	KH		Lecture	Written, Viva voce		

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
OTPC 7.4	Identify potential negative effects of light, sound, and caregiving practices on infants in the NICU.	K, C	SH		Lecture, DOAP	Written, Viva voce, Skill assessments		
OTPC 7.5	Identify the basic principles and Techniques of developmentally supportive care & positioning in the NICU.	K, S	KH		Lecture, DOAP	Written, Viva voce		
OTPC 7.6	Understand the (limited) appropriate use for range of motion and splinting in the NICU	K	KH		Lecture	Written, Viva voce		
Topic: Occupational Therapy in Preschool -School setup			**No of competencies -10**					
OTPC 8.1	List Legislation aspect of school based Occupational therapy	K	KH	Y	Lecture	Written	Psychology	
OTPC 8.2	Demonstrate understanding of Team approach in school set up	K, A, C	KH		Lecture	Viva voce		

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
OTPC 8.3	Interpret outcome of school based Assessment & inform team members, parents	K, S, C	KH		Lecture	Written, Viva voce		
OTPC 8.4	Present Program planning & documentation	K, S	SH		Lecture, DOAP	Written, Viva voce, Practicals		
OTPC 8.5	Identify components for Implementing program	K, S	KH		Lecture, DOAP	Written, Viva voce		
OTPC 8.6	Identify factors that contribute to typical or atypical development of visual perception	K, S	KH		Lecture, DOAP	Written, Viva voce		
OTPC 8.7	Choosing the Most Appropriate Type of Assessment	K	KH		Lecture	Written		
OTPC 8.8	Describe models and theories that may be used in structuring intervention plans for children who have problems with visual-perceptual skills	K	KH		Lecture	Written		

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
OTPC 8.9	Outline the intervention strategies & development of skills	K	KH		Lecture	Written		
OTPC 8.10	Demonstrate skills for assisting children in improving or compensating for problems with visual-perceptual skills	K, S	KH		Lecture, DOAP session	Written, Viva voce		
Topic : OT in degenerative & genetic disorders, Neural tube defects (Spina Bifida, Muscular dystrophy)							**No of competencies-4**	
OTPC 9.9	List Etiology & Define Terms Neural Tube defects	K	KH	Y	Lecture	Written	Neurology, Orthopaedi -cs	
OTPC 9.2	Describe Neurological & Neurosurgical concerns, Functional limitations in neural tube defects	K	KH		Lecture	Written, Viva Voce		
OTPC 9.3	Discuss Orthopaedic concern	K	KH		Lecture	Written, Viva Voce		

Code No	Objectives/Competency Students should be able to	Domains of Learning	Competencies levels	Core Y/N	Teaching Learning methods	Assessment methods	Vertical Integration	Horizontal Integration
OTPC 9.4	Describe Occupational Therapy Role in treatment	K, S	SH		Lecture, DOAP session	Written, Viva voce, Skill assessment, Practical		
Topic: OT in Paediatric oncology		**No of competencies-2**						
OTPC 10.1	Identify conditions in paediatric oncology Enumerate occupational therapy goals in intervention	K	KH	N	Lecture	Written, Viva Voce	Surgery	
OTPC 10.2	Identify the Use of Play in Intervention	K	KH		Lecture, DOAP	Written, Viva Voce

Job Description for all levels

NATIONAL COMMISSION FOR ALLIED AND HEALTHCARE PROFESSIONS
राष्ट्रीय संबद्ध और स्वास्थ्य देख-रेख वृत्ति आयोग
स्वास्थ्यम् सर्वार्थसाधनम्
NCAHP
Since-2021

Job Description for all levels

1. **Level 6**

- **Responsibilities:**
  - Assess patients' physical, emotional, and social needs.
  - Develop individualized treatment plans to improve patients' ability to perform daily activities.
  - Implement therapeutic interventions, including exercises, adaptive equipment, and techniques.
  - Educate patients and families on home programs and adaptive strategies.
  - Maintain accurate patient records and document progress.
  - Collaborate with other healthcare professionals to ensure comprehensive patient care.
  - Stay updated with the latest practices and developments in occupational therapy.
- **Qualities Expected:**
  - Strong hold on subject knowledge and clinical skills
  - Strong communication and interpersonal skills.
  - Ability to work independently and as part of a team.

2. **Level 7**

- **Responsibilities:**
  - Oversee and mentor junior occupational therapists.
  - Handle more complex patient cases.
  - Develop and implement advanced therapeutic programs.
  - Conduct training sessions for staff on new techniques and equipment.
  - Lead research projects to improve treatment methods and outcomes.
  - Participate in departmental planning and development.
  - Advanced certification in specialized areas (e.g., hand therapy, pediatrics).
  - Leadership and supervisory skills.
  - Strong clinical and research skills.

3. Level 8

- **Responsibilities:**
  - Manage the daily operations of the occupational therapy department.
  - Develop and implement departmental policies and procedures.
  - Ensure compliance with regulatory standards and accreditation requirements.
  - Coordinate with other department heads for integrated patient care.
  - Monitor departmental budgets and resources.
  - Oversee the recruitment, training, and evaluation of staff.
  - Facilitate professional development and continuing education for staff.
- **Qualities Expected:**
  - Extensive clinical and supervisory experience.
  - Strong organizational and management skills.
  - Knowledge of healthcare regulations and accreditation processes.
  - Excellent communication and leadership abilities.

4. Level 9

- **Responsibilities:**
  - Provide strategic leadership and vision for the occupational therapy department.
  - Develop long-term goals and objectives for the department.
  - Oversee the implementation of innovative treatment programs and services.
  - Foster a collaborative and inclusive work environment.
  - Represent the department in organizational meetings and external forums.
  - Drive quality improvement initiatives and best practices.
  - Monitor departmental performance and outcomes.
  - Proven track record of leadership and innovation.
  - Ability to drive change and implement new strategies.
  - Strong analytical and problem-solving skills.
  - Excellent public speaking and advocacy skills.

5. Level 10

- **Responsibilities:**
  - Lead the overall strategic direction and administration of occupational therapy services.
  - Develop and implement organizational policies and procedures.
  - Ensure the highest standards of patient care and service delivery.
  - Manage departmental budgets, staffing, and resources.
  - Establish partnerships with other healthcare providers and organizations.
  - Advocate for the profession and promote occupational therapy within the community.
  - Oversee research initiatives and academic collaborations.
  - Report to the executive leadership on departmental performance and strategic goals.
- **Qualities expected:**
  - Significant experience in senior management roles.
  - Expertise in healthcare administration and policy.
  - Strong leadership and strategic planning skills.
  - Excellent communication, negotiation, and networking abilities.
  - Commitment to advancing the field of occupational therapy.

These descriptions can vary depending on the specific healthcare setting and organization. The roles typically build upon each other, with increasing levels of responsibility, expertise, and leadership as one moves up the hierarchy.

Annexure 1

Allied and Healthcare Professions

Allied and healthcare professionals includes individuals involved with the delivery of health or healthcare related services, with qualification and competence in therapeutic, diagnostic, curative, preventive and/or rehabilitative interventions. They work in multidisciplinary health teams in varied healthcare settings including doctors (physicians and specialist), nurses and public health officials to promote, protect, treat and/or manage a person ('s) physical, mental, social, emotional, environmental health and holistic well-being.

The wide variation in the understanding of the concept of allied and healthcare professional, better known as 'paramedic', the nomenclature, and functions has led to the poor image of allied and healthcare sciences in India. The use of the word paramedic itself limits the activities of AHPs in the system. Hence, it is imperative to adequately compensate these professionals based on their qualifications and specialties. Despite a huge demand for services from this sector, allied and healthcare sciences is highly fragmented. As per the report 'From Paramedics to Allied Health Sciences', in total 138 courses of varied levels were identified during the process. Although it is estimated that there may be many more courses which are yet to be identified.

Considering the lack of regulatory mechanism following 15 core professional groups (accounting for around 44 professions) has been enlisted below **(The list is illustrative of the allied and healthcare professions. In future there may be addition or removal of certain professions based on the state of their regulation and standardization). It also needs a mention that most of these professions are not restricted to the professional groups under which they have been categorized, their role may extend to other professional services too. Similarly, the categorization is an indicative categorization, however this may evolve over time based on deeper understanding of the roles and responsibilities of each professional group**:

Healthcare Professions

1. Optometry
2. Physiotherapy
3. Occupational Therapy
4. Nutrition Sciences
5. Physician Associate and Assistants
6. Allied Health Professions
7. Cardiology, Vascular and Pulmonary Technology
8. Medical Laboratory Sciences

9. Medical Radiology and Imaging Technology
10. Neurosciences Technology
11. Non- direct and Administrative services
12. Primary Care and Community services
13. Radiation Therapy
14. Renal Technology
15. Surgical and Anesthesia related Technology
16. Trauma Care Services

The above mentioned groups account for over 44 job profiles in the allied and healthcare space, which are as follows-

A Healthcare Professions

1. Optometry
    a. Optometrist
2. Physiotherapy
    a. Physiotherapist
3. Occupational Therapy
    a. Occupational Therapist
4. Nutrition Sciences
    a. Nutritionist
    b. Dietitian
5. Physician Associate and Assistants
    a. Physician Associates and Assistants

B Allied Health Professions

1. Surgical and anesthesia related technology
    a. Anesthesia Assistants and Technologist
    b. OT Technologist
    c. Endoscopy Technologist

2. Medical Laboratory Sciences
    a. Cyto-Technologist
    b. Dermatology/STD /Leprosy Lab Technologist
    c. Forensic Technologist
    d. Hemato-Technologist
    e. Histopath-Technologist
    f. Phlebotomist
    g. Medical and Clinical Lab Technologist
3. Medical Radiology and Imaging Technology
    a. Radiographer
    b. Radiologic /Imaging Technologist
    c. Diagnostic Medical Sonographer
4. Renal Technology
    a. Urology Technologist
    b. Dialysis Therapy Technologist
5. Radiation Therapy
    a. Radiotherapy Technologist
    b. Medical Dosimetrist
    c. Nuclear Medicine Technologist
6. Trauma Care Services
    a. Emergency Medical Technologist (paramedic)
    b. Critical Care/ICU Technologist
7. Neurosciences Technology
    a. EEG/END Technologist
    b. EMG Technologist
    c. Neuro Lab Technologist
    d. Sleep Lab Technologist

8. Cardiology, Vascular and Pulmonary Technology
    a. Cardiovascular Technologist
    b. ECG Technologist
    c. ECHO Technologist
    d. Perfusionist
    e. Pulmonary Function (PFT) Technologist
    f. Respiratory Therapist
9. Non- direct and Administrative Services
    a. Biomedical Engineers and Technologist
    b. Medical Assistant
    c. Medical Secretaries
    d. Medical Transcriptionist
    e. Health Information Management Technologist
10. Primary Care and community services
    a. Blood Bank Technologist
    b. Counselor- Integrated Behavioral Health Counselors, Palliative counselors etc.
    c. Sanitary Health Inspectors

Demographic Data

Name of the student	
Semester	
Placement period	
Placement Area	
Date of Initial Evaluation	
Date of Mid Evaluation	
Date of Final Evaluation	

Evaluation

Topic	Initial	Mid	Final	Remarks
Professional Attitude				
	Punctuality			
	Uses initiative			
	Personal appearance			
	Relationship with staff (subordinates, peers and seniors)			
	Response to criticism			
Communication Skills				
	Establishes relevant rapport with patient and family			
	Ask Relevant questions			
	Communicates effectively with patients and relatives at appropriate levels			
Evaluation and treatment planning				
	Obtain relevant data			
	Identifies problems areas to be treated			
	Formulates appropriate treatment procedure – a) Immediate b) Long term			

Topic	Initial	Mid	Final	Remarks
Treatment Implementation:				
	Uses treatment techniques appropriately			
	Re-evaluates and upgrades appropriately			
Records and Report				
	Maintains regular Relevant records: (Assessments)			
	Oral communication on: (Evaluation)			
Organization & Admin. Ability:				
	Accepts responsibility			
	Care of materials			
Assignments				
	Clinical Practice Files:			
	a) Time of Submission			
	b) Relevant information			
	c) Quality of presentation			
	d) Extra assignments			
	Case presentation			
	a) Time of Submission			
	b) Use of initiative			
Grading: 5 - Excellent 4 - Good 3 - Average 2 - Below average 1 – Poor

Annexure 3

Occupational Therapy Clinical Module

(Adult with Physical Dysfunctions/ Disabilities)

Level 1 (First year)

Area: OPD, Orthopaedic, Surgical & Medical wards

Competency:

At the end of their clinical posting in the first year, students should be able to demonstrate skills to identify Occupational profile of patients with physical conditions & learn the gross muscle testing & goniometry on normal individuals

Objective:

To learn the skills of identifying patient's occupational profile before and after their physical conditions.

The placement of Goniometers & positions of limbs for measurement of ROM & Muscle testing.

Learning needs:

- To learn the skills of developing rapport with the patients
- To understand the components of demographic details and history taking
- To differentiate activity and occupation
- To understand the concept of "Occupation" in person's life
- To understand the OTPF – Domain and Process relevant to physical conditions
- To identify the Occupational profile of patient's with physical conditions
- To learn the placement of Goniometers & positions of limbs for measurement of ROM & Muscle strength

(Second year) Level 2.1

Area: OPD : Orthopaedic, Surgical, Medical & Neurological cases Competences:

At the end of their one month posting, students should be able to demonstrate skills to evaluate factors affecting ADL, IADL, Education, Work, Leisure and Social participation in patients with orthopaedical conditions such as amputation, RA, OA, back pain and other neurological conditions.

Learning Objective:

To learn the skills to evaluate client factors, performance skills and contexts affecting ADL, IADL, Education, Work, Leisure and Social participation in patients with orthopaedical conditions such as amputation, RA, OA, back pain and other neurological conditions reporting to Occupational Therapy outpatient set up.

Client factors:

1. Range of Motion including factors that limits the movement (such as TCDs, Pain)
2. Muscle Power including Voluntary motor control (General)
3. Reflexes
4. Muscle tone
5. Sensation (General)
6. Perception

Performance skills:

1. Functional abilities
2. Hand functions

Weekly goals:

Week 1:

To learn and demonstrate assessing the ROM (TCDs), individual muscle testing and voluntary motor control

Week 2:

To learn and demonstrate assessing the reflexes and muscle tone

Week 3:

To learn and demonstrate assessing the sensation & perception

Week 4:

To learn and demonstrate assessing the functional abilities including balance and hand functions

Assignments:

- Levels of amputation in upper and lower extremity; types of amputation
- Assessment methods of muscle strength; muscle tone; voluntary control; reflexes and coordination
- Regulation of muscle tone
- Individual MMT of any one patient

(Second year) Level 2.2

Area: OPD, Orthopaedic, Surgical, Medical & Neurological cases

Competency:

At the end of their one month posting, students should be able to demonstrate skills to evaluate factors affecting ADL, IADL, Education, Work, Leisure and Social participation in patients with SCI, TBI, Stroke and other chronic neurological conditions.

Learning Objective:

To learn the skills to evaluate client factors, performance skills and contexts affecting ADL, IADL, Education, Work, Leisure and Social participation in participation in patients with SCI, TBI, Stroke and other chronic neurological conditions.

Client factor:

- Muscle power (Myotome) and sensory evaluation (Dermatome), ASIA scale
- Level of consciousness (including the scales GCS; RLA; CRS – R and WHIM)
- Voluntary motor control (Brunstrom stages)

Performance skills:

- Functional outcomes (ADL, Functional abilities and transfers) in SCI
- Hand functions in tetraplegia (including tenodesis grasp)

Weekly goals:

Week 1:

To learn and demonstrate skills in assessing the myotome and dermatome in patients with SCI and to determine the level and severity using ASIA scale.

Week 2:

To learn and demonstrate skills in assessing the ADL, functional abilities and hand functions in patients with SCI

Week 3:

To learn and demonstrate skills in assessing the level of consciousness (coma, unresponsive wakefulness syndrome, minimal conscious state and emergence from MCS) in patients with TBI.

Week 4:

To learn and demonstrate skills in assessing the voluntary control in patients with stroke

Assignments:

- Goal setting in SCI (including functional outcomes)
- Secondary complications in SCI
- Coma and related conditions and Theories and principles of coma stimulation

(Second year) Level 2.3

Area: OPD : Orthopaedic, Surgical, Medical & Neurological cases Competency:

At the end of their one month posting, students should be able to demonstrate skills to evaluate factors affecting ADL, IADL, Education, Work, Leisure and Social participation in patients with SCI, TBI, Stroke and other neurological conditions.

Learning objectives:

To learn the skills to evaluate client factors, performance skills and contexts affecting ADL, IADL, Education, Work, Leisure and Social participation in patients with SCI, TBI, Stroke and other neurological conditions.

Client factors:

- Revise module 2.1 & 2.2
- Cognitive - perceptual skills

Performance skills:

- Functional abilities and transfers in patients with brain injury
- Evaluation of Basic and instrumental ADL

Weekly Goals:

Week 1: Revise module 2.1

Week 2: To learn and demonstrate skills in assessing the cognitive and perceptual skills in patients with brain injury

Week 3: To learn and demonstrate skills in assessing the functional abilities and transfers in patients with brain injury

Week 4: To learn and demonstrate skills in assessing the basic and instrumental ADL (including MBI, SCIM)

Assignments:

- Goal setting in TBI (based on RLA stages)
- Cognitive perceptual skills and evaluation
- Secondary complications in Stroke and TBI

(Second year) Level 2.4

Area: Neurology Competency:

At the end of their one month posting, students should be able to demonstrate skills to evaluate factors affecting ADL, IADL, Education, Work, Leisure and Social participation in patients with Parkinson's disease, MND, MS, GBS , and other neurological conditions.

Learning objectives:

To learn the skills to evaluate client factors, performance skills and contexts affecting ADL, IADL, Education, Work, Leisure and Social participation in patients with Parkinson's disease, MND, MS, GBS and other neurological conditions.

Client Factors

- Cranial nerves testing
- Tonal abnormalities (Spasticity, Flaccidity, Rigidity, Dystonia)

Performance skills:

1. Co-ordination (Equilibrium & non equilibrium test)
2. Functional abilities

Weekly goals:

Week 1: To learn and demonstrate skills in performing cranial nerve testing

Week 2: To learn and demonstrate skills in assessing co-ordination

Week 3: To learn and demonstrate skills in assessing tonal abnormalities and the signs and symptoms of Parkinson's diseases, MND, MS and GBS.

Week 4: To learn and demonstrate skills in assessing milestones, functional abilities and balance in neurological conditions.

Assignment:

- Cranial nerve testing
- Cerebellar signs and co-ordination assessment
- Condition specific assignments

Level 3 (Third year) Area: (acute care management)

Competency:

At the end of their one month posting, students should be able to demonstrate skills to implement interventions and procedures to promote or enhance safety and performance in ADL, IADL, Education, Work, Leisure and Social participation in patient with brain injury, SCI and other acute neurological conditions

Learning Objective:

To learn the skills to implement interventions and procedures to promote or enhance safety and performance in ADL, IADL, Education, Work, Leisure and Social participation in patient with brain injury, SCI and other acute neurological conditions

Weekly goals:

Week 1: To learn and demonstrate skills in administering OT intervention strategies in patients with SCI during their acute stage.

- prevention of secondary complications;
- educating the significant caregivers about the condition, safety precautions;
- to train in basic skills such as functional abilities and ADL

Week 2: To learn and demonstrate skills in administering OT intervention strategies in patients with TBI during their acute stage

- OT interventions for patients in RLA stage 1-4
- Prevention of secondary complications
- Positioning to ensure safety and functions
- Techniques and strategies to use for cognitive training

Week 3: To learn to demonstrate skill in administering OT intervention strategies in patients with stroke during their acute care

- Evaluation, prevention and management of shoulder subluxation
- Management of shoulder hand syndrome
- Approaches, techniques and strategies to improve voluntary control

Week 4: To train and demonstrate skills in writing Occupational specific goals in SCI, TBI and stroke

- SMART goals to be incorporated in Long term and short term goals

Assignment:

Develop a protocol for sensory stimulation program / managing agitation for a patient with TBI

Level 3 (Third year)

Area: Rehab (Long term care management) Competency:

At the end of their one month posting, students should be able to demonstrate skills to implement interventions and procedures to promote or enhance safety and performance in ADL, IADL, Education, Work, Leisure and Social participation in patient with brain injury and SCI

Learning Objectives:

To learn the skills to implement interventions and procedures to promote or enhance safety and performance in ADL, IADL, Education, Work, Leisure and Social participation in patient with brain injury, SCI

Weekly goals:

Week 1: To learn and demonstrate skills in administering OT intervention strategies in patients with SCI (Paraplegia)

- Strategies to work with achieving functional outcomes (ADL, mobility and transfers) in paraplegia according to their level and severity

Week 2: To learn and demonstrate skills in administering OT intervention strategies in patients with SCI (Tetraplegia)

- Strategies to work with achieving functional outcomes (ADL, mobility and transfers) in patients with tetraplegia

Week 3: To learn and demonstrate skills in administering OT intervention strategies in patients with brain injury

- Interventions to work on positioning, functional abilities and balance in patients with brain injury
- Approaches and techniques to work on cognitive retraining
- Strategies to facilitate voluntary control and ADL independence

Week 4: To train and demonstrate skills in writing Occupational specific goals in SCI, TBI and stroke

- SMART goals to be incorporated in Long term and short term goals

Assignments:

1. Types, indication, selection and measurement of mobility aids including wheelchair
2. Cognitive retraining strategies for a specific patient with brain injury / stroke

Level 3 (Third year)

Area: All OPDs Except Psychiatry

Competency:

At the end of their one month posting, students should be able to demonstrate skills to implement interventions and procedures to promote or enhance safety and performance in ADL, IADL, Education, Work, Leisure and Social participation in patients with amputation, RA, OA, Back/neck pain.

Learning Objective:

To learn the skills to implement interventions and procedures to promote or enhance safety and performance in ADL, IADL, Education, Work, Leisure and Social participation in patients with amputation, RA, OA, Back/neck pain.

Weekly Goals:

Week 1: To learn and demonstrate skills in administering OT intervention strategies for patients with RA

- Deformities and its pathophysiology
- OT intervention for patients with RA including orthotic management
- OT in other types of arthritis

Week 2: To learn and demonstrate skills in administering OT intervention strategies for patients with upper and lower limb amputation

- Pre prosthetic, prosthetic training and prosthetic checkouts.

Week 3: To learn and demonstrate skills in administering OT intervention strategies in patients with chronic back/neck pain

- OT intervention for pain management
- Proper positioning and body mechanics to be followed
- Techniques to facilitate independence in the clients roles and occupations

Week 4: To train and demonstrate skills in writing Occupational specific goals in amputation, RA, OA, back and neck pain.

- SMART goals to be incorporated in Long term and short term goals
- Reviewing OT management for Orthopaedical conditions such as burns, THR, TKR, Brachial plexus injury, fracture management and CRPS

Assignments:

- Design any Two splints commonly used in RA
- Checkout for upper and lower limb prostheses

Level 3 (Third year) Area: Neurology

Competency:

At the end of their one month posting, students should be able to demonstrate skills to implement interventions and procedures to promote or enhance safety and performance in ADL, IADL, Education, Work, Leisure and Social participation in patients with PD, GBS, MND, MS and other neurological conditions.

Learning Objective:

To learn the skills to implement interventions and procedures to promote or enhance safety and performance in ADL, IADL, Education, Work, Leisure and Social participation in patients with PD, GBS, MND, MS and other neurological conditions.

Weekly Goals:

Week 1: To learn and demonstrate skills in administering OT intervention strategies for patients with Parkinson's Disease (PD) including fall prevention protocols

Week 2: To learn and demonstrate skills in administering OT intervention strategies for patients with Multiple sclerosis (MS)

Week 3: To learn and demonstrate skills in administering OT intervention strategies for patients with Guillaine Barre Syndrome (GBS) and Motor neuron disease (MND).

Week 4: To train and demonstrate skills in writing Occupational specific goals in PD, GBS, MND, MS and other neurological conditions.

- SMART goals to be incorporated in Long term and short term goals
- Reviewing OT management for peripheral neuropathies and Muscular dystrophy
- Plan a fall prevention protocol for a patient with Parkinson's disease
- Management of Spasticity, flaccidity, rigidity and dystonia
- Strategies to improve co-ordination

Level 4 (Fourth year) Area: OPD

Competency:

At the end of their one month posting, students should be able to demonstrate skills to implement rehabilitation strategies for patients with RA, OA, haemophilia, amputation, burns, cancer and cardiac conditions.

Learning objective:

To learn the skills to implement rehabilitative strategies such as

i) Training in self care, home management, and community reintegration
ii) Education and training of individuals and family members
iii) Modification of environments and adaptation of processes
iv) Application of physical agent modalities to enhance performance skills

To carry out specialized assessment including standardized tools and scales specific to ADL, hand function, cognitive – perceptual skills, home evaluation and leisure.

Weekly Goals:

Week 1: To provide appropriate rehabilitation strategies for patients with amputation/ Arthritis/Ankylosing spondylitis/other conditions

Case assessment: Hand functions and ADL for a patient with RA/AS; ADL for a patient using upper or lower extremity prostheses

Week 2: To provide appropriate rehabilitation strategies for patients with Haemophilia,

Case assessment: ADL (FISH) for a patient with hemophilia

Week 3: To provide appropriate rehabilitation strategies for patients with intra cranial/ intra spinal tumors

Case assessment: Cognitive – perceptual skills and ADL for a patient with a Tumour

Week 4: To learn and understand the application of physical agent modalities

1. Disability evaluation for a person with disability (RA and amputation)
2. Adjuvant therapies used in OT
3. Occupational Therapy and physical agent modalities
4. Design a home program for a patient with RA

Level 4 (Fourth year) Area: OPD, Neurology & community rehab

Competency:

At the end of their one month posting, students should be able to demonstrate skills to implement rehabilitation strategies for patients with TBI, stroke and SCI.

Learning objective:

To learn the skills to implement rehabilitative strategies such as

i) training in self care, home management, and community reintegration
ii) education and training of individuals and family members
iii) modification of environments and adaptation of processes
iv) training in assistive technology
v) assessment, recommendation, and training in techniques to enhance functional mobility including wheelchair and community mobility

To carry out specialized assessment including standardized tools and scales specific to ADL, hand function, cognitive – perceptual skills, home evaluation and leisure.

Weekly Goals:

Week 1: To provide appropriate rehabilitation strategies for patients with SCI

- Different aids for self care and communication for patients with tetraplegia

Case assessment: Hand functions and ADL for a patient with tetraplegia

Week 2: To provide appropriate rehabilitation strategies for patients with SCI

- Strategies and training for IADL task for a patient with paraplegia
- Strategies and training for community ambulation and participation
- Functional mobility using wheelchair and other aids

Case assessment: Plan any one practical session to perform an IADL task for a patient with paraplegia

Week 3: To provide appropriate rehabilitation strategies for patients with TBI / Stroke

- Occupational Therapy and Assistive technology
- Adjuvant therapy for managing stroke

Case assessment: Assessment of Cognitive – perceptual skills and ADL

Week 4: To provide appropriate rehabilitation strategies for patients with TBI / Stroke / SCI

Case assessment: Vocational or pre – vocational assessment

Assignment:

1. Occupational therapy and assistive technology

Level 4 (Fourth year) Area: Peripheral posting (One week each in Neurology IP, Orthopaedics, Cardiology, Geriatrics)

Competency:

At the end of their one month posting, students should be able to demonstrate skills to implement rehabilitation strategies for patients with neurological, orthopaedical (burns, THR, TKR), cardiological and geriatric conditions.

Learning objective:

To learn the skills to implement rehabilitative strategies such as

i) Training in self care, home management, and community reintegration
ii) Education and training of individuals and family members
iii) Modification of environments and adaptation of processes
iv) Assessment, recommendation, and training in techniques to enhance functional mobility including wheelchair and community mobility

To carry out specialized assessment including standardized tools and scales specific to ADL, hand function, cognitive – perceptual skills, home evaluation and leisure.

Weekly Goals:

Week 1: To provide appropriate rehabilitation strategies for patients with neurological conditions

Case assessment: Hand functions and ADL for a patient with PD/ GBS/ MND/ Others

Week 2: To provide appropriate rehabilitation strategies for patients with burns/ hip or knee replacement

Case assessment: ADL assessment for a patient with burns

Week 3: To provide appropriate rehabilitation strategies for any one Geriatric condition

Case assessment: Assessment of Cognitive – perceptual skills and ADL

Week 4: To provide appropriate rehabilitation strategies for a patient with myocardial infarction or post op management

Case assessment: ADL assessment for a patient with myocardial infarction

Assignment:

Role of OT in cardiology

(Second year) Level 2.1 Occupational Therapy unit Clinical Module

Area: OPD : Orthopaedic, surgical, Medical & neurological cases

Competences:

At the end of their one month posting, students should be able to demonstrate skills to evaluate factors affecting ADL, IADL, Education, Work, Leisure and Social participation in patients with orthopaedical conditions such as amputation, RA, OA, back pain and other neurological conditions.

Learning Objective:

To learn the skills to evaluate client factors, performance skills and contexts affecting ADL, IADL, Education, Work, Leisure and Social participation in patients with orthopaedical conditions such as amputation, RA, OA, back pain and other neurological conditions reporting to Occupational Therapy outpatient set up.

Client factors:

1. Range of Motion including factors that limits the movement (such as TCDs, Pain)
2. Muscle Power including Voluntary motor control (General)
3. Reflexes
4. Muscle tone
5. Sensation (General)
6. Perception

Performance skills:

1. Functional abilities
2. Hand functions

Weekly goals:

Week 1: To learn and demonstrate assessing the ROM (TCDs), individual muscle testing and voluntary motor control

Week 2: To learn and demonstrate assessing the reflexes and muscle tone

Week 3: To learn and demonstrate assessing the sensation & perception

Week 4: To learn and demonstrate assessing the functional abilities including balance and hand function

Assignments:

- Levels of amputation in upper and lower extremity; types of amputation
- Assessment methods of muscle strength; muscle tone; voluntary control; reflexes and coordination
- Regulation of muscle tone
- Individual MMT of any one patient

(Second year) Level 2.2 Occupational Therapy Clinical Module

Area: OPD, Orthopaedic, surgical, Medical & neurological cases Competency:

At the end of their one month posting, students should be able to demonstrate skills to evaluate factors affecting ADL, IADL, Education, Work, Leisure and Social participation in patients with SCI, TBI, Stroke and other chronic neurological conditions.

Learning Objective:

To learn the skills to evaluate client factors, performance skills and contexts affecting ADL, IADL, Education, Work, Leisure and Social participation in patients with SCI, TBI, Stroke and other chronic neurological conditions.

Client factor:

1. Muscle power (Myotome) and sensory evaluation (Dermatome), ASIA scale
2. Level of consciousness (including the scales GCS; RLA; CRS – R and WHIM)
3. Voluntary motor control (Brunstrom stages)

Performance skills:

1. Functional outcomes (ADL, Functional abilities and transfers) in SCI
2. Hand functions in tetraplegia (including tenodesis grasp)

Weekly goals:

Week 1:

To learn and demonstrate skills in assessing the myotome and dermatome in patients with SCI and to determine the level and severity using ASIA scale

Week 2:

To learn and demonstrate skills in assessing the ADL, functional abilities and hand functions in patients with SCI

Week 3:

To learn and demonstrate skills in assessing the level of consciousness (coma, unresponsive wakefulness syndrome, minimal conscious state and emergence from MCS) in patients with TBI.

Week 4:

To learn and demonstrate skills in assessing the voluntary control in patients with stroke

Assignments:

1. Goal setting in SCI (including functional outcomes)
2. Secondary complications in SCI
3. Coma and related conditions and theories and principles of coma stimulation

Annexure 4

1. **Example of a learning experience in Elective 1**

Elective 1 / 2	**1**
Name of Elective	Haemophilia Management
Location of hospital Lab or research facilities	Haemophilia clinic & Occupational Therapy OPD
Name of internal preceptor(s)	XYZ
Name of external preceptor if applicable	NA
Learning objectives of elective	1. Observation of evaluation of haemophilic patients in acute phase 2. Planning of Occupational Therapy Intervention 3. Design and Fabrication of protective devices and orthoses according to patients needs 4. Counselling patients regarding joint protection and precautions for prevention of injuries.
Number of students that can be accommodated in this elective	4
Prerequisites for elective	Basic knowledge of the type and progression of the disease process
List of activities of student participation	1. Attend Haemophillia clinic and observe clinical evaluation 2. Select patients for O T Intervention 3. Educate patient for home care management 4. Implement exercise program in O T OPD 5. Decide material and fabricate orthoses and devices according to patients needs 6. Present at least 2 of the worked up cases
Learning Resources	1. Davidson's Principles and Practice of Medicine 2. Occupational Therapy for Physical Dysfunction by Radomski M, Trombly Latham C
Log book entry required	1. Documentation of worked up cases 2. Documentation of presentation done 3. Completion of posting signed by preceptor with a "meets expectation '(M)' grade"

Elective 1 / 2	1
Assessment	**Formative:** Attendance; day-to-day participation in departmental activity; performance of assigned tasks and presentation of worked up case in department
Other comment

Since-2021

2. **Example of a learning experience in Elective 2**

Elective 1 / 2	**2**
Name of Elective	Gericare
Location of hospital Lab or research facilities	Geriartric clinic and Occupational Therapy OPD
Name of internal preceptor(s)	ABC
Name of external preceptor if applicable	NA
Learning objectives of elective	1. Observation of evaluation of Geriartric patients in the clinic 2. Identifying patients for Occupational Therapy Services 3. Planning Restorative Therapy for specific physical condition 4. Plan O T Management for cognitive deficits 5. Identify required environmental modifications using Preventive and Accommodative approach 6. Counselling patients regarding fall prevention and energy conservation
Number of students that can be accommodated in this elective	4
Prerequisites for elective	Handling skills and Communication with the Elderly
List of activities of student participation	1. Attend the geriartric clinic, observe and identify the case for O T management 2. Implement exercise protocol for physical conditions 3. Teach cognitive management techniques 4. Administer standardised tests to identify psychological problems 5. Evaluate environmental barriers and provide support

Elective 1 / 2	2
	6. Teach patient safety methods and fall prevention techniques 7. Counsel the caregiver regarding management of medication, exercise protocol, fall prevention and engage in activity. 8. Present at least 2 of the worked up cases
Learning Resources	Willard and Spackman 's Occupational Therapy
Log book entry require	1. Documentation of worked up cases 2. Documentation of presentation done 3. Completion of posting signed by preceptor with a "meets expectation '(M)' grade"
Assessment	**Formative:** Attendance; day-to-day participation in departmental activity; performance of assigned tasks and presentation of worked up case in department

Logbook (MOT)

Sr. No	Particular	Points of assessment (Total points =50)	Minimal Standards
1	Clinical Work Posting	Punctuality, Regularity, Maintenance of Case Record or Documentation, Presentation of cases, assessment, Management, Rapport with Patient and team members, and follow-up of patient	Compulsory Rotational Clinical fieldwork of 6weeks to 8 weeks in all Two years
Gradation: 1= Below Average, 2= Average, 3= Good, 4= Very Good, 5= Excellent			
2	Title synopsis/ Dissertation (TOPIC)	Interest shown in selecting the topic, Appropriate review, Discussion with Guide and other faculty, Quality of protocol, Preparation of Proforma, Periodic Consultation with guide/ co-guide, Regular collection of case material, Depth Analysis/ Discussion, Quality of Write-up	Selection of Title in first three months of admission and submission to Institutional Ethics Committee Submission of approved synopsis Collection of Data for 12 months from the date of approval Compiling of Data Submission of the dissertation three months prior to the examination
Gradation: 1= Below Average, 2= Average, 3= Good, 4= Very Good, 5= Excellent			
3	Case Presentation/ Seminar/Group Discussion	Completeness of history, Physical findings, Investigations, Differential diagnosis, Management, Demonstration of skills, Theoretical Background, Appropriate answers to the questions asked	2 Cases/ Discussion/ Seminar in each clinical posting
Gradation: 1= Below Average, 2= Average, 3= Good, 4= Very Good, 5= Excellent			

Sr. No	Particular	Points of assessment (Total points =50)	Minimal Standards
4	Participation in Teaching Activities	Communication of the purpose of the talk, evokes audience interest in the subject, sequences of ideas, the use of practical example and/or illustration, Speaking style, Attempts audience participation, Answers question asked by the audience, Rapport of speaker with his audience, Use of audio visual aids, Summary of the main points at the end	Minimum 5 demonstration/ classroom teaching each year
Gradation: 1= Below Average, 2= Average, 3= Good, 4= Very Good, 5= Excellent			
5	Journal Articles Presented		Minimum 1 per posting
6	CME/COTE/ Workshops attended Institute, National, International		Minimum 2 in Allied subjects & 2 in speciality subjects
7	Conferences attended-		Minimum 2
8	Paper Presented	Desirable	
9	Published research articles	Desirable	

Fellowship Module in Occupational Therapy on Elective subjects as described in "Elective Modules" in chapter 4

The Institutions running BOT/MOT Courses approved by State Council / NCAHP & affiliated by their respective recognized universities can start this fellowship Module.

The details of proposals as per the elective subjects may be formulated as & when required by the concerned universities with the permission of NCAHP.
